OECD Environmental Performance Reviews OECD Environmental Performance Reviews: Korea 2006 Organisation for Economic Co-operation and Development, 2006-09-26 This comprehensive review of Korea's environmental policies and programmes brings the reader information on the extent to which Korea is meeting its domestic environmental objectives and international commitments. It reviews progress in pollution abatement and nature and biodiversity management as well as progress in integrating environmental concerns in agricultural energy fiscal and transport policy. It also examines the environmental social interface and international commitments. The report includes a series of recommendations and selected statistical data. **OECD Environmental Performance Reviews**, 2005 OECD Environmental Performance Reviews: Sweden 2004 OECD, 2004-10-04 This review of the Sweden's environmental conditions and policies evaluates progress in reducing the pollution burden improving natural resource management integrating environmental and economic policies and strengthening international co-operation. **OECD Environmental Performance Reviews**, 2004 *OECD Environmental Performance Reviews: Sweden 2014* OECD, 2014-11-28 This report is the third OECD review of Sweden's environmental performance. It evaluates progress towards sustainable development and green growth with a focus on Sweden's longstanding commitment to mitigating emissions of greenhouse gases and its management of marine ecosystem services and water. **OECD Environmental Performance Reviews** Organization for Economic Cooperation and Development, 2014 This third OECD Environmental Performance Review confirms that Sweden remains a front runner in environmental policy and has developed approaches that will be of interest to other countries. However the report highlights that Sweden will have to step up its efforts if it is to achieve its ambitious environmental targets including the goal of zero net greenhouse gas emissions by the second half of the century. The burden of achieving these objectives will also have to be more equitably shared to maintain the necessary high level of public support. The Swedish people have long placed a high value on protecting the environment. Relatively high income and low inequality have underpinned the implementation of ambitious policies by successive Swedish governments. As a result the population appears to be more satisfied with its country's environmental quality than people in other European countries. Air and water quality is generally good. Less than 1% of waste is disposed of in landfills while the rates of recycling and recovery are high. Protected areas have expanded and now cover 14% of the country's surface and 6% of marine waters. A notable feature of Swedish environmental policy has been the successful use of environmentally related taxes. Sweden was among the first countries to introduce a carbon tax and one of the few countries to have successfully implemented a green tax shift by reallocating the tax burden from labour to environmentally harmful activities. **OECD Environmental Performance Reviews OECD Environmental Performance Reviews: Sweden 2004** OECD, 2004-10-07 This review of the Sweden's environmental conditions and policies evaluates progress in reducing the pollution burden improving natural resource management integrating environmental and economic
