Governing for the Environment B. Gleeson, N. Low, 2001-01-11 Governing for the Environment explores one of the dimensions of the value knowledge system needed in any movement towards humane governance for the planet the ecological sustainability and integrity of the Earth's environment The book begins from the premise that whilst environmental knowledge and values have developed rapidly their development must not overwhelm consideration of other core humane values peace social justice and human rights The book's contributors explore a variety of ethical issues that must inform future global regulation of the Earth's environment

Handbook on Agriculture, Biotechnology and Development Stuart J. Smyth, Peter W.B. Phillips, David Castle, 2014-03-28 This book is a compendium of knowledge experience and insight on agriculture biotechnology and development Beginning with an account of GM crop adoptions and attitudes towards them the book assesses numerous crucial processes concluding with detail

European Governance G.P.E. Walzenbach, 2017-03-02 This collection provides a balanced evaluation of multi level governance Written by international experts of policy making in the European Union each contribution builds on common conceptual definitions critically debating their adaptation to policy specific contexts and investigating their usefulness for conducting empirical research This engaging text uses case studies to identify the specific changes that have occurred in power relations across different levels of the EU system With varying emphasis on state and non state actors on country comparisons and international processes the reader is invited to join a fruitful dialogue among the contributors about the symbiotic relationship of multi level analysis with other conceptual innovations such as transnational regulation network formation or market internationalization This book confronts sophisticated theoretical reasoning with the actual realities of policy making and is therefore essential reading for all those interested in the risks and opportunities of a comparative interdisciplinary approach to European governance

The Policy Process in International Environmental Governance S. Aggarwal-Khan, 2011-11-30 This book questions the practices in the policy processes of international institutions It looks at the formal and informal practices

that are routinely undertaken as part of the structure of international policy processes and analyses how people behave and with what outcome for international environmental governance *Sustainable Urbanisation* Adriana Allen, Nicholas You, 2002 **Thinking Through the Environment** Mark J. Smith, 2005-09-30 This reader brings together material from ecological thought environmental policy environmental philosophy social and political thought historical sociology and cultural studies The extracts tell the story of the way the natural environment has been understood in the modern world and how this has recently been questioned as contemporary societies are seen as characterised by uncertainty and complexity The literature guides the reader through the conventional grounds for thinking about rights and obligations in relation to future generations non human animals and the biotic communities bringing each into question This then leads into a critical examination of social and political theories and their capacity for drawing on ecological thought Each of the seven sections of readings is introduced by the editor who locates the set of readings within the specific themes and issues at the heart of each section This broad reaching and thought provoking set of readings stresses the diversity of response to environmental problems both within and between anthropocentric and ecocentric approaches and will encourage the reader to examine how they are manifested in the areas of environmental ethics policy analysis and social and political theory

Logjam David Humphreys, 2012-05-04 Winner of the International Studies Association s Harold and Margaret Sprout Award 2008 for the best book on international environmental problems This pioneering study examines the impacts of neoliberal global governance on forests and provides an exhaustive overview of international forest politics Intergovernmental Panel on Forests World Commission on Forests and Sustainable Development Intergovernmental Forum on Forests United Nations Forum on Forests Forest Certification New policies to address illegal logging World Bank s forests strategy Convention on Biological Diversity and other international forest related processes The book is an essential reference for students of global environmental politics and required reading for forest policy makers It concludes by arguing for a democratization of global governance and a fundamental restructuring of the regulatory environment so that final decision making authority is restored to the local level Driven by concern at what forest loss means for communities and future generations this is a book that stands to make a difference **Capacity Building in National Environmental Policy** Helmut Weidner, Martin Jänicke, 2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building see Appen dix The OECD defines environmental capacity building as a society s ability to identify and solve environmental problems While various institutions including UNEP FAO World Bank and OECD have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries we have extended the concepts to industrialized countries as well The first collection edited by Martin Janicke Helge Joergens both Free University Berlin and Helmut Weidner Social Science Research Center Berlin was published in 1997 under the title National Environmental Policies A Comparative Study of Capacity

Building Berlin etc Springer Verlag It included 13 studies of countries As in the first volume chapter I presents the conceptual framework underlying the national case studies It is a slightly shorter version of the corresponding chapter in volume I The design of all case studies in the two volumes is largely congruent with this conceptual framework Although the various sections of the studies do not always have identical titles and subtitles the central elements of the capacity building approach have been applied in all cases

Governing Global Biodiversity Philippe G. Le Prestre, 2017-05-15 Predictions about the success of the Convention on Biological Diversity CBD are pessimistic It has now become commonplace to bemoan the scope ambition and deeply political nature of a convention that addresses issues ranging from ecosystems protection to the exploitation of genetic resources from conservation to justice and from commerce to scientific knowledge Ten years after its adoption how can we assess the difference that the CBD has made Is it in danger of collapsing under its own weight or is it building the foundations of new patterns of relations between societies and nature What achievements can we record and what challenges does it face In this book which is unique in its scope diversity and the wealth of information it contains contributors from a variety of academic disciplines tackle an issue of enduring importance to the protection of biodiversity and enhance our understanding of humanity's capacity to reconcile its various aspirations and halt the destructive path upon which it is set

Roadmap for A Sustainable World Atul Bora, 2025-08-20 The book attempts to provide a roadmap for transition to a sustainable world from its current unsustainable trajectory Unlike the 17 SDGs without the priority and interrelationship among the goals or more than 300 definitions of sustainable development the book envisions a Sustainable World which is simultaneously safe healthy and just While providing a roadmap the book discusses how a spiral of crises has emerged at the dawn of twenty first century in spite of showcasing miracles of science and technology A systemic precaution based and sustainable framework of governance is provided to address the complexity uncertainty ambiguity and diversity involved in the process of transition towards a simultaneously safe healthy and just world The book focuses for holistic solution of the systemic challenges and is ideally suited not only for all general and professional educational courses but also as lifelong learning process by all citizens and stakeholders The unique features of the book and why the book is suitable to everybody While the multi faceted issues of sustainability are widely discussed in isolated manner a blueprint for achieving a sustainable society nation and world in a single book is rare and this is an attempt to fill up this gap The figures of the book can be considered as its unique feature that will help public understanding of sustainability which in turn is crucial for participation of the world citizens in the process of achieving the Sustainable Development Goals SDGs or the Sustainable World as defined in the book as the simultaneously safe healthy and just world

[Global Environment Outlook - GEO-6: Healthy Planet, Healthy People](#) UN Environment, 2019-06-06 Published to coincide with the Fourth United Nations Environmental Assembly UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health By bringing together
