*Environmental Psychology* Tony Cassidy, 2013-10-31 This text contains an up to date survey of theory research and practice in environmental psychology drawing on international literature It adopts the perspective that physical and social factors are inextricably linked in their

influence on human behaviour and experience and that the world in which we live is changed and often damaged by human action Throughout the text the issues which are important in contemporary psychology such as levels of explanation methodological diversity and the relationship between psychology and other disciplines are brought to the fore The text covers established areas of environmental concern and also brings together research on rarely covered topics such as the effects of smell colour and light and the way in which physical environments influence social identity

**Environmental Psychology** Paul A. Bell, Jeffrey D. Fisher, Ross J. Loomis, 1978 *Advances in Environmental Psychology (Volume 5)* Andrew Baum, Jerome E. Singer, 2020-09-10 The development of a field or an area of inquiry is often marked by changes in measurement techniques shifts in analytic emphasis and disputes over the best ways of doing research In many areas of psychology a number of issues have characterized methodological evolution of the discipline including questions regarding context and reductionism or laboratory versus field research For some of the newer areas in psychology such as environment or health psychology this is not an issue of either or Although there has been some debate about these trade offs it is generally regarded by people in this field that some combination of the two approaches is essential Depending on the question being studied this balance may change However the questions asked are less likely to inquire which way is better and concentrate on how both may be used This observation serves to illustrate the fact that different research endeavours have different methodological issues Originally published in 1985 this volume explores some of the issues characterizing work on health environment and behavior

100 Key Concepts in Environmental Psychology Dorothee Marchand, Karine Weiss, Enric Pol, 2023-06-27 This accessible book defines 100 key concepts ideas and processes in Environmental Psychology to provide an introductory reference work that brings together research and theory in a bite size format With contributions from leading figures within Environmental Psychology each concept is clearly defined and explained within the context of issues around the environment sustainability climate change nature and architecture This book considers the involvement of psychological physiological and social processes to understand the mechanisms that explain and contribute to the evolution of behavior and attitudes that relate to our relationship with the environment Concepts covered include biodiversity eco anxiety place identity sustainable behaviour climate justice and environmental attitudes By integrating ideas from different disciplinary orientations in the field of Environmental Psychology this book allows for a better understanding of the processes related to the individual environment relationship as well as the applications that they allow for in various fields of intervention This is essential reading for students and researchers in Environmental Psychology Sustainability Studies Architecture and Built Environment Studies and related fields

*Environmental Psychology* Jorge Valentín, Lucila Gamez, 2010 This book presents original research results on the leading edge of environmental psychology Each chapter has been carefully selected in an attempt to present substantial advances across a broad spectrum

Environmental Psychology in Europe Enric Pol, 2024-11-07 Originally published in 1993 as part of the Ethnoscapes Current Challenges in the

Environmental Social Sciences series reissued now with a new series introduction and new preface Environmental Psychology in Europe From Architectural Psychology to Green Psychology sets out to explain the nature of environmental psychology how it was born how it developed what were its dominant subjects its principal actors and its present state in Europe at the time The volume covers each European country looking at the origin and development of the subject in the principal European cultural areas Environmental Psychology Charles J. Holahan,1982 **Conservation Psychology** Susan Clayton,Gene Myers,2011-09-19 This textbook introduces the reader to the new and emerging field of Conservation Psychology which explores connections between the study of human behavior and the achievement of conservation goals People are often cast as villains in the story of environmental degradation seen primarily as a threat to healthy ecosystems and an obstacle to conservation But humans are inseparable from natural ecosystems Understanding how people think about experience and interact with nature is crucial for promoting environmental sustainability as well as human well being The book first summarizes theory and research on human cognitive emotional and behavioral responses to nature and goes on to review research on people s experience of nature in wild managed and urban settings Finally it examines ways to encourage conservation oriented behavior at both individual and societal levels Throughout the authors integrate a wide body of published literature to demonstrate how and why psychology is relevant to promoting a more sustainable relationship between humans and nature **Psychology and Environmental Change** Raymond S. Nickerson,2002-12-18 This book stimulates thinking on the topic of detrimental environmental change and how research psychologists can help to address the problem In addition to reporting environmentally relevant psychological research the author identifies the most pressing questions from an environmental point of view Psychology and Environmental Change focuses on ways in which human behavior contributes to the problem deals with the assessment and change of attitudes and with studies of change of behavior proposes ways in which psychological research can contribute to making technology and its products more environmentally benign and introduces topics such as consumption risk assessment cost benefit and tradeoff analyses competition negotiation and policymaking and how they relate to the objective of protecting the environment
