Envisioning Cahokia A Landscape Perspective:

Envisioning Cahokia Rinita A. Dalan, 2003 The authors stress how Monk's Mound the gigantic centerpiece of the sprawling complex covers more area than most late prehistoric sites in the Mississippi Valley They point out how the central complex of mounds and plazas is comparable in scale to the core of Washington D C including the Mall major monuments the Capitol and the White House and they keep coming back to the words that others have used in trying to comprehend the complexity of the site

Landscapes of Ritual Performance in Eastern North America Cheryl Claassen, 2023-02-23 In the long history of documenting the material culture of the archaeological record meaning and actions of makers and users of these items is often overlooked The authors in this book focus on rituals exploring the natural and made landscape stages the ritual directors including their progression from shaman to priesthood and meaning of the rites They also provide comments on the end or failure of rites and cults from Paleoindian into post DeSoto years Chapters examine the archaeological records of Cahokia the lower Ohio Valley Aztalan Wisconsin Vermont Florida and Georgia and others scan the Eastern US investigating tobacco datura color symbolism deer symbolism mound stratigraphy flintknapping stone caching cults and their organization and red ochre These authors collectively query the beliefs that can be gleaned from mortuary practices and their variation from mound construction from imagery from the choice of landscape setting While some rituals were short lived others can be shown to span millennia as the ritual specialists modified their interpretations and introduced innovations

Cahokia's Complexities Susan M. Alt, 2018-04-24 Critical new discoveries and archaeological patterns increase understanding of early Mississippian culture and society The reasons for the rise and fall of early cities and ceremonial centers around the world have been sought for centuries In the United States Cahokia has been the focus of intense archaeological work to explain its mysteries Cahokia was the first and exponentially the largest of the Mississippian centers that appeared across the Midwest and Southeast after AD 1000 Located near present day East St Louis Illinois the central complex of Cahokia spanned more than 12 square kilometers and encompassed more than 120 earthen mounds As one of the foremost experts on Cahokia Susan M Alt addresses long standing considerations of eastern Woodlands archaeology the beginnings character and ending of Mississippian culture AD 1050 1600 from a novel theoretical and empirical vantage point Through this case study on farmers immigration and resettling Alt's narrative reanalyzes the relationship between administration and diversity incorporating critical new discoveries and archaeological patterns from outside of Cahokia Alt examines the cultural landscape of the Cahokia flood plain and the layout of one extraordinary upland site Grossman as an administrative settlement where local farmers might have seen or participated in Cahokian rituals and ceremonies involving a web of ancestors powers and places Alt argues that a farming district outside the center provides definitive evidences of the attempted centralized administration of a rural hinterland

Cahokia Timothy R. Pauketat, 2010-07-27 The fascinating story of a lost city and an unprecedented American civilization located in modern day Illinois near St Louis While Mayan and

Aztec civilizations are widely known and documented relatively few people are familiar with the largest prehistoric Native American city north of Mexico a site that expert Timothy Pauketat brings vividly to life in this groundbreaking book Almost a thousand years ago a city flourished along the Mississippi River near what is now St Louis Built around a sprawling central plaza and known as Cahokia the site has drawn the attention of generations of archaeologists whose work produced evidence of complex celestial timepieces feasts big enough to feed thousands and disturbing signs of human sacrifice Drawing on these fascinating finds Cahokia presents a lively and astonishing narrative of prehistoric America *Cahokia Mounds* William Iseminger, 2010-03-03 About one thousand years ago a phenomenon occurred in a fertile tract of Mississippi River flood plain known today as the American Bottom This phenomenon came to be called Cahokia Mounds America's first city Interpreting the rich heritage of a site like Cahokia Mounds is a balancing act the interpreter must speak as a scholar to the general public on behalf of an entirely different civilization Since even those three groups are splintered into myriad dialects of perspective sometimes it is hard to know what language to use But William Iseminger's work at the site has given him nearly four decades of practice in Cahokia Conversation 101 and he tells the story of the place and its ancient culture as well as its place in contemporary culture with the clarity and confidence of a native speaker *Archaeology and Ancient Religion in the American Midcontinent* Brad H. Koldehoff, Timothy R. Pauketat, 2018-11-06 Analyses of big datasets signal important directions for the archaeology of religion in the Archaic to Mississippian Native North America Across North America huge data accumulations derived from decades of cultural resource management studies combined with old museum collections provide archaeologists with unparalleled opportunities to explore new questions about the lives of ancient native peoples For many years the topics of technology economy and political organization have received the most research attention while ritual religion and symbolic expression have largely been ignored This was often the case because researchers considered such topics beyond reach of their methods and data In *Archaeology and Ancient Religion in the American Midcontinent* editors Brad H Koldehoff and Timothy R Pauketat and their contributors demonstrate that this notion is outdated through their analyses of a series of large datasets from the midcontinent ranging from tiny charred seeds to the cosmic alignments of mounds they consider new questions about the religious practices and lives of native peoples At the core of this volume are case studies that explore religious practices from the Cahokia area and surrounding Illinois uplands Additional chapters explore these topics using data collected from sites and landscapes scattered along the Mississippi and Ohio River valleys This innovative work facilitates a greater appreciation for and understanding of ancient native religious practices especially their seamless connections to everyday life and livelihood The contributors do not advocate for a reduced emphasis on technology economy and political organization rather they recommend expanding the scope of such studies to include considerations of how religious practices shaped the locations of sites the character of artifacts and the content and arrangement of sites and features They also highlight analytical approaches that are applicable to archaeological datasets

from across the Americas and beyond *Relational Engagements of the Indigenous Americas* Melissa R. Baltus, Sarah E. Baires, 2017-10-16 In *Relational Engagements of the Indigenous Americas* Melissa R. Baltus and Sarah E. Baires critically examine the current understanding of relationality in the Americas covering a diverse range of topics from Indigenous cosmologies to the life world of the Inuit dog. The contributors to this wide-ranging edited collection interrogate and discuss the multiple natures of relational ontologies touching on the ever-changing fluid and varied ways that people both alive and dead relate and are related to their surrounding world. While the case studies presented in this collection all stem from the New World, the Indigenous histories and archaeological interpretations vary widely and the boundaries of relational theory challenge current preconceptions about earlier ways of life in the Indigenous Americas The Cambridge World History Norman Yoffee, 2015-03-12 The most comprehensive account yet of the human past from prehistory to the present

Cahokia in Context Charles H. McNutt, Ryan Parish, 2019-12-16 This volume highlights the nucleation of St. Louis's ancient Indigenous population into a place we refer to as Cahokia Mounds. This allows us to address not only the broader context of Cahokia's creation as an urban center but also the rapid nature of change throughout its history Meaningful Places Rachel McLean Sailor, 2014-03-01 The early history of photography in America coincided with the Euro-American settlement of the West. This thoughtful book argues that the rich history of western photography cannot be understood by focusing solely on the handful of well-known photographers whose work has come to define the era. Art historian Rachel Sailor points out that most photographers in the West were engaged in producing images for their local communities. These pictures didn't just entertain the settlers but gave them a way to understand their new home. Photographs could help the settlers adjust to their new circumstances by recording the development of a place revealing domestication, alteration, and improvement. The book explores the cultural complexity of regional landscape photography, western places, and local sociopolitical concerns. Photographic imagery like western paintings from the same era enabled Euro-Americans to see the new landscape through their own cultural lenses, shaping the idea of the frontier for the people who lived there Earth into Property Anthony Hall, 2010-08-23 *Earth into Property: The Bowl with One Spoon, Part Two* explores the relationship between the dispossession of Indigenous peoples and the making of global capitalism. Beginning with Christopher Columbus's inception of a New World Order in 1492, Anthony Hall draws on a massive body of original research to produce a narrative that is audacious, encyclopedic, and transformative in the new light it sheds on the complex historical processes that converged in the financial debacle of 2008 and 2009 **Architectural Variability in the Southeast** Cameron H. Lacquement, 2007-10-28 Some of the most visible expressions of human culture are illustrated architecturally. Unfortunately for archaeologists, the architecture being studied is not always visible and must be inferred from soil inconsistencies or charred remains. This study deals with research into roughly a millennium of Native American architecture in the Southeast and includes research on the variation of construction techniques employed both above and below ground **Case Studies**

Michael Gear, Kathleen O'Neal Gear, 2014-05-06 Award winning archaeologists and New York Times and USA Today bestselling authors W Michael Gear and Kathleen O Neal Gear begin the stunning saga of the North American equivalent of ancient Rome in *People of the Morning Star* The city of Cahokia at its height covered more than six square miles around what is now St Louis and included structures more than ten stories high Cahokian warriors and traders roamed from the Great Lakes to the Gulf of Mexico What force on earth would motivate hundreds of thousands of people to pick up move hundreds of miles and once plopped down amidst a polyglot of

Chieftdoms and Other Archaeological Delusions Timothy R. Pauketat, 2007-05-30 In recent decades anthropology especially ethnography has supplied the prevailing models of how human beings have constructed and been constructed by their social arrangements In turn archaeologists have all too often relied on these models to reconstruct the lives of ancient peoples In lively engaging and informed prose Timothy Pauketat debunks much of this social evolutionary theorizing about human development as he ponders the evidence of chieftdoms left behind by the Mississippian culture of the American southern heartland This book challenges all students of history and prehistory to reexamine the actual evidence that archaeology has made available and to do so with an open mind

Authority, Autonomy, and the Archaeology of a Mississippian Community Erin S. Nelson, 2024-07-09 This book is the first detailed investigation of the important archaeological site of Parchman Place in the Yazoo Basin a defining area for understanding the Mississippian culture that spanned much of what is now the United States Southeast and Midwest before the mid sixteenth century Refining the widely accepted theory that this society was strongly hierarchical Erin Nelson provides data that suggest communities navigated tensions between authority and autonomy in their placemaking and in their daily lives Drawing on archaeological evidence from foodways monumental and domestic architecture and the organization of communal space at the site Nelson argues that Mississippian people negotiated contradictory ideas about what it meant to belong to a community For example although they clearly had powerful leaders communities built mounds and other structures in ways that re created their views of the cosmos expressing values of wholeness and balance Nelson s findings shed light on the inner workings of Mississippian communities and other hierarchical societies of the period A

volume in the Florida Museum of Natural History Ripley P Bullen Series **Archaeologies of Cosmospaces in the Americas** J. Grant Stauffer, Bretton T. Giles, Shawn P. Lambert, 2022-09-08 This volume examines how pre Columbian societies in the Americas envisioned their cosmos and iteratively modeled it through the creation of particular objects and places It emphasizes that American societies did this to materialize overarching models and templates for the shape and scope of the cosmos the working definition of cosmospace Noting a tendency to gloss over the ways in which ancestral Americans envisioned the cosmos as intertwined and animated the authors examine how cosmospaces are manifested archaeologically in the forms of objects and physically altered landscapes This book s chapters therefore offer case studies of cosmospaces that present themselves as forms of architecture portable artifacts and transformed aspects of the natural world In doing so it emphasizes that the creation of cosmospaces offered a means of reconciling peoples experiences of the world with their understandings of them [The Cambridge World History of Slavery: Volume 3, AD 1420-AD 1804](#) David Eltis, Stanley L.
