Quality Health Care Robert C. Lloyd, 2004 Written by an internationally recognized expert in the field of quality management this book will serve as your guide for planning and implementing a successful quality measurement program in your healthcare facility It begins by presenting an overview of the context for quality measurement the forces influencing the demand for quality reform how to listen to the voice of the customer and the characteristics of quality that customers value most You ll also learn how to select and define indicators to collect data and how to organize data into a dashboard that can provide feedback on your progress toward quality measurement Finally this book shows you how to analyze your data by detailing how variation lives in your data and whether this variation is acceptable Case studies are provided to demonstrate how quality measurement can be applied to clinical as well as operational aspects of healthcare delivery

D3.js: Cutting-edge Data Visualization Andrew H. Rininsland, Michael Heydt, Pablo Navarro Castillo, 2017-03-31 Turn your raw data into real knowledge by creating and deploying complex data visualizations with D3 js About This Book Understand how to best represent your data by developing the right kind of visualization Explore the concepts of D3 js through examples that enable you to quickly create visualizations including charts network diagrams and maps Get practical examples of visualizations using real world data sets that show you how to use D3 js to visualize and interact with information to glean its underlying meaning Who This Book Is For Whether you are new to data and data visualization a seasoned data scientist or a computer graphics specialist this Learning Path will provide you with the skills you need to create web based and interactive data visualizations Some basic JavaScript knowledge is expected

but no prior experience with data visualization or D3 is required

What You Will Learn

- Gain a solid understanding of the common D3 development idioms
- Find out how to write basic D3 code for servers using Node.js
- Install and use D3.js to create HTML elements within a document
- Create and style graphical elements such as circles, ellipses, rectangles, lines, paths and text using SVG
- Turn your data into bar and scatter charts and add margins, axes, labels and legends
- Use D3.js generators to perform the magic of creating complex visualizations from data
- Add interactivity to your visualizations including tool tips, sorting, hover to highlight and grouping and dragging of visuals
- Write, test and distribute a D3 based charting package
- Make a real time application with Node and D3

In Detail

D3 has emerged as one of the leading platforms to develop beautiful interactive visualizations over the web. We begin the course by setting up a strong foundation, then build on this foundation as we take you through the entire world of reimagining data using interactive, animated visualizations created in D3.js. In the first module, we cover the various features of D3.js to build a wide range of visualizations. We also focus on the entire process of representing data through visualizations. By the end of this module, you will be ready to use D3 to transform any data into a more engaging and sophisticated visualization. In the next module, you will learn to master the creation of graphical elements from data. Using practical examples provided, you will quickly get to grips with the features of D3.js and use this learning to create your own spectacular data visualizations with D3.js. Over the last leg of this course, you will get acquainted with how to integrate D3 with mapping libraries to provide reverse geocoding and interactive maps among many other advanced features of D3. This module culminates by showing you how to create enterprise level dashboards to display real time data. This Learning Path combines some of the best that Packt has to offer in one complete, curated package. It includes content from the following Packt products:

- Learning D3.js: Data Visualization, Second Edition** by Andrew H. Rininsland
- D3.js By Example** by Michael Heydt
- Mastering D3.js** by Pablo Navarro Castillo

Style and approach

This course provides a comprehensive explanation of how to leverage the power of D3.js to create powerful and creative visualizations through step by step instructions in the form of modules. Each module helps you skill up a level in creating meaningful visualizations.

The Computerised Lawyer Philip Leith, Amanda Hoey, 2012-12-06 The Computerised Lawyer provides a comprehensive introduction to the technology and application of computers in law. Over the last 5 years, it has become increasingly recognised that the skills associated with new technology are so important that proficiency in the field is now being viewed as an integral element in the education and skills development of all law students. New curriculums are being developed which incorporate the issues discussed in this book and professionals will find the text useful and highly relevant. This book fulfils the need for a textbook which whilst assuming no prior knowledge of computing, manages to cover all the key issues associated with information technology and its

relevance to legal issues and practice Philip Leith and Amanda Hoey have completely rewritten the first edition of this book to bring the reader an up to date text that will be important to everyone working with computers in law **Mobilizing**

proposal that we think about digital technologies such as machine learning not in terms of artificial intelligence but as artificial communication Algorithms that work with deep learning and big data are getting so much better at doing so many things that it makes us uncomfortable How can a device know what our favorite songs are or what we should write in an email Have machines become too smart In Artificial Communication Elena Esposito argues that drawing this sort of analogy between algorithms and human intelligence is misleading If machines contribute to social intelligence it will not be because they have learned how to think like us but because we have learned how to communicate with them Esposito proposes that we think of smart machines not in terms of artificial intelligence but in terms of artificial communication To do this we need a concept of communication that can take into account the possibility that a communication partner may be not a human being but an algorithm which is not random and is completely controlled although not by the processes of the human mind Esposito investigates this by examining the use of algorithms in different areas of social life She explores the proliferation of lists and lists of lists online explaining that the web works on the basis of lists to produce further lists the use of visualization digital
