Leo van den Berg, Willem van Winden, 2017-10-05 This title was first published in 2002 The information revolution has deeply influenced the development of Europe s large cities They are faced with new opportunities and threats from the information and communication technologies ICTs and require strategic policy responses By examining and comparing five European cities Eindhoven Helsinki Manchester Marseilles and the Hague this book sheds light on the impact of ICTs on urban development and considers the consequences for urban management Case studies show how cities use new technologies to improve the delivery of municipal services to increase civil participation and local democracy to help their citizens and businesses make the shift to the information society and to fight the digital divide These analyses reveal strategic challenges and potential pitfalls for ICT policy The book offers a unique international perspective on the impact and potential of information technologies on urban development The integrative approach taking economic social and accessibility issues into account reveals many new insights **The Smart City - how smart can 'IT' be?** Malin Granath, 2016-08-30 Cities are

facing many challenges challenges linked to world wide trends like urbanisation climate changes and globalisation In parallel to these trends we have seen a rapid digitalisation in and of different parts of society Cities and local governments have been appointed an important role in overcoming these world wide challenges and subsequently in policy practices digitalisation is perceived as an important dimension in delivering better and sustainable services to its citizens As a result the smart city has emerged as a concept and approach to contemporary urban planning and development There is still no common understanding of the concept and what components and dimensions it covers However in all definitions digitalisation constitutes one dimension but the role and function of it is still not clear In this study I have examined how different stakeholders talk about digitalisation in policy and planning practices of urban development The aim has been to identify and analyse different repertoires of discourses on digitalisation to advance our knowledge on how goals related to the smart city and digitalisation are put into practice The results are based on a qualitative and interpretative case study with a social

constructionist approach An analytical framework based on discourse analysis stakeholder theory and new institutional theory has been constructed to analyse the case Main results show that repertoires on digitalisation are limited in both policy and planning of urban development In these practices digitalisation is primarily seen as a means or as a communication infrastructure in relation to two city services functions i e services related to governance and to environment Results also show that practices of urban planning and development are institutionalised where different stakeholders salience and stakes in urban development and in digitalisation differ but it is clear that digitalisation is a secondary issue Implications of these results are that the taken for granted discourses in policy and planning practices of urban development limit both practice and research when developing a smart city St der st r inf r m nga utmaningar kopplat till v rldsomsp nande trender s som urbanisering klimatf r ndringar och globalisering Parallellt med dessa trender har vi sett en snabb digitalisering i och av olika delar av samh llet I detta sammanhang har st der och kommuner blivit tilldelade en viktig roll i hanteringen av dessa utmaningar P policyniv ses digitalisering som en viktig dimension f r att leverera h llbar och b ttre service till medborgarna Som ett led i detta har smarta st der vuxit fram som b de begrepp och metod f r stadsplanering och stadsutveckling Det finns dock ingen gemensam tolkning av begreppet D remot finns digitalisering med som en dimension i definitionerna men vilken roll och funktion den har r fortfarande oklart I denna studie har jag unders kt hur olika intressenter talar om digitalisering i olika policy och planeringspraktiker kopplat till stadsutveckling Syftet har varit att identifiera och analysera repertoarer av digitaliseringsdiskurser f r att bidra med kunskap om hur m l kopplade till smarta st der och digitalisering oms tts i praktiken Resultaten r baserade p en kvalitativ och tolkande fallstudie med en socialkonstruktionistisk ansats Ett analytiskt ramverk baserat p diskursanalys intressentanalys och nyinstitutionell teori har tagits fram f r att analysera fallet Resultaten visar att digitaliseringsrepertoarer r begr nsade b de i policy och i planering av stadsutveckling I dessa praktiker ses digitalisering fr mst som ett verktyg eller en kommunikationsinfrastruktur i relation till tv samh llsfunktioner n mligen funktioner kopplade till styrning och administration och funktioner kopplade till milj Resultaten visar ocks att praktiker kopplade till stadsplanering och stadsutveckling r institutionaliserade praktiker d r olika intressenter har olika makt legitimitet och angel genhet g llande stadsutveckling och digitalisering Det r dock tydligt att digitalisering r en sekund r fr ga Implikationerna av dessa resultat r att de f rgivettagna diskurserna begr nsar b de praktiken och forskningen i utvecklingen av smart st der

Sappa, 2022-09-09 This book is the result of four year work in the framework of the Ibero American Research Network TICs4CI funded by the CYTED program In the following decades 85% of the world s population is expected to live in cities hence urban centers should be prepared to provide smart solutions for problems ranging from video surveillance and intelligent mobility to the solid waste recycling processes just to mention a few More specifically the book describes underlying technologies and practical implementations of several successful case studies of ICTs developed in the following smart city areas Urban environment monitoring Intelligent mobility Waste recycling processes Video surveillance Computer aided diagnose in healthcare systems Computer vision based approaches for efficiency in production processes The book is intended for researchers and engineers in the field of ICTs for smart cities as well as to anyone who wants to know about state of the art approaches and challenges on this field **ICT Futures** Paul Warren, John Davies, David Brown, 2008-04-30 Learn all about the major trends and future advancements in ICT ICT Futures provides an insightful introduction to the major technology trends in Information and Communication Technologies ICT and to the economic commercial and societal environment which is shaping them The experienced author team consisting of experts from both industry and academia addresses The interaction between people and technology how ICT affects every day social practices the rise of social computing how the way we interact with information and the devices we use are changing and how trust can be assured over the Internet The underlying ICT infrastructure the semantic web and the semantic intranet the real time service oriented infrastructure the future optical network self managing networks and agents P2P technologies pervasiveness mobility and wireless technology and how all this infrastructure can be made secure ICT technology and how it is affecting industries as diverse as health finance retail and law The book covers a vast wealth of material with a strong focus upon the impending changes to the way ICT operates This reference is a valuable tool for people in managerial roles CIOs CTOs business and technology strategists and students undertaking technology MBAs or technology modules in general MBAs Professionals working in ICT will also find this book valuable **ICT, Cities, and Reaching Positive Peace** Ali Cheshmehzangi, 2022-07-18 This book is the first attempt to explore the use and application of Information and Communication Technology ICT and related smart technologies in cities and for the sole purpose of reaching positive peace The everyday usage of digital technologies in cities encourages us to study the benefits co benefits disadvantages and threats of ICT application in cities and urban environments The continuous growth of digital technologies and their growing demand

in everyday urban practices and systems are already known to scholars practitioners and policy makers However this book explores whether or not such applications and usage help us reaching positive peace This approach is novel in the field of urban studies allowing us to identify and highlight best practices successes and failures of ICT application to meet positive peace pillars The scope of the book highlights our focus on positive peace and its eight pillars mainly how they are meant to be achieved in cities and urban areas With an analytical view on the topic we aim to reflect on the systematic features of urban systems using positive peace pillars as the primary targets We believe ICT application and usage in cities could be more directive and beneficial to reach peace and prosperity to achieve such a goal Therefore this book provides a holistic guideline and coverage of ICT use for positive peace pathways and peace building practices We hope the findings of the book help researchers and policy makers to come up with novel and integrated strategies ensuring that our everyday usage of digital technologies ICT and smart tools are more meaningful and people oriented From Smart City to Smart Region

Corinna Morandi,Andrea Rolando,Stefano Di Vita,2015-08-14 This book offers a fascinating exploration of the relationship between information and communication technologies ICTs and spatial planning expanding the concept of urban smartness from the usual scale of buildings or urban projects to the regional dimension In particular it presents the outcomes of research undertaken at Politecnico di Milano in collaboration with Telecom Italia that had three principal goals to investigate the use of ICTs for the representation promotion management and dissemination of an integrated system of services to explore the spatial impacts of digital services at different scales regional urban local and to understand how a system of mobile services can encourage new spatial uses and new collective behavior in the quest for better spatial quality of places Useful critical analysis of international case studies is also included with the aim of verifying the opportunities afforded by new digital services not only to improve the urban efficiency but also to foster the evolution of urban communities through enhancement of the public realm The book will be a source of valuable insights for both scholars and local administrators and operators involved in smart city projects **Good Urban Governance Through ICT**

Gaurav Relhan,2012 Africa is currently experiencing the world's fastest urbanization rate at 3.5 percent annually placing increasing pressure on resource constrained local governments to maintain and improve livability standards of their cities But simultaneously an Information and Communication Technologies ICT revolution has swept across the continent as evidenced by vastly improved telecommunications and internet infrastructure leapfrogging mobile communications penetration rates and emergence of a successful homegrown IT applications industry This report aims to 1 synthesize the role currently played by ICT towards improved governance management and accountability of urban service providers in Africa as well as other regions 2 explore current ICT initiatives that are relevant to the World Bank's thematic concerns 3 reconcile existing deficiencies barriers towards potential for replication and 4 develop a roadmap to render easy strategy implementation by project teams Section one outlines evolving trends in urban governance and presents ICT as a potential tool in the environment of modern

governance Section two discusses the role of ICT in some of the Bank's core areas of urban focus namely local governance and economic development intergovernmental fiscal relations and municipal finance urban poverty and slum upgrading urban planning land and housing urban environment and climate change and water and sanitation service delivery An analysis of fundamental ICT methodologies employed is discussed in section three Section four in conclusion suggests an action plan for enhancing ICT initiatives as a component of the Bank's lending activities **Smart City Implementation**

Renata Paola Dameri, 2018-04-22 In a series of essays this book describes and analyzes the concept and theory of the recent smart city phenomenon from a global perspective with a focus on its implementation around the world After defining the concept it then elaborates on the role of Information and Communication Technology ICT as an enabler for smart cities and the role of ICT in the interplay with smart mobility A separate chapter develops the concept of an urban smart dashboard for stakeholders to measure performance as well as the economic and public value It offers examples of smart cities around the globe and two detailed case studies on Genoa and Amsterdam exemplify the book's theoretical and empirical findings helping readers understand and evaluate the effectiveness and capability of new smart city programs
