[The Green Stone Age: Exploration and Exploitation of Minerals for Green Technologies](#) M. Smelror, K. Hanghøj, H. Schiellerup, 2023-06-21 Raw materials have been essential in the development of all human societies through history and moving into a greener more carbon lean future we become increasingly reliant on access to a growing number of raw materials Minerals for new technologies improving the quality of our lives and the environment are the

building blocks of the new Green Stone Age This Special Publication presents ongoing research and mapping programmes focusing on minerals needed for the transformation to greener societies In addition to new exploration models and shared geological information on the different prospective currently mined areas the notion of criticality in different countries is discussed and examples of ongoing national and cross country research and mapping programmes are presented In addition to the resource reserve and technical economic aspects the social and environmental dimensions are also a focus in some of the contributions as holistic approaches to the exploration and exploitation of critical minerals and materials are needed to fulfil the green transition and goals for the Green Stone Age

Stratabound Ore Deposits in the Andes Lluís

Fontbote, G. Christian Amstutz, Miguel Cardozo, Esteban Cedillo, Jose Frutos, 2013-11-27 The present volume Stratabound Ore Deposits in the Andes has its roots in an international seminar on stratabound ore deposits which took place in September 1986 in Cusco Peru sponsored by Multi ciencias Peru and UNESCO During this seminar it became clear that the amount and quality of research done on stratabound ore deposits in the Andes required a synthesis Researchers in industry and government as well as in academia including many which had participated at the Cusco Seminar were invited to contribute The answer was extremely positive confirming the idea that a book expressing the state of the art of the study of stratabound ore deposits in the Andes was long overdue As editors we sought to give maximum coverage to the present knowledge yet keeping the length and thereby the price within reasonable limits The book contains three types of contributions In the first part the reader will find review papers focusing on 1 the geologic framework Frutos 2 the metallogenesis in Andean countries including also types of deposits differing from those of stratabound nature Cardozo and Cedillo Oyarzun and 3 an introductory overview of the stratabound ore deposits in the Andes emphasizing their geotectonic position as a classification tool Fontbote
