

ENTERIC NERVOUS SYSTEM (ENS)

Types of enteric neurons

- **SENSORY NERVES**

It monitor the stimuli – the pressure, chemical composition in the gut and muscle movement

- **MOTOR NEURONS**

It activate the smooth muscles in the gut wall and regulate the secretions of mucus and digestive juices from the glands.

- **INTERNEURON NERVES**

Local neurons called Interneurons integrate information from sensory and motor neurons.

Arrangement of enteric neurons

- **MYENTERIC (OR AUERBACH'S) PLEXUS**

Myenteric plexus regulates the workings of gut muscles, resulting in peristalsis and coordinated contraction and expansion of gut muscles.

- **SUBMUCOUS (OR MEISSNER'S) PLEXUS**

Submucous plexus is located under the mucus-secreting layer in the gut. It monitors the chemical composition of the gut and regulates secretion from glands.

Enteric Nervous System Jack D. Wood, 2011 Moreover our incomplete understanding of the pathobiology of these disorders highlights a need for research directed to expansion of current knowledge of the neurobiology of the ENS at all levels of organization from the cellular biology of individual neurons to the biophysics of integrated networks to whole organ behavior Investigation of the normal and disordered ENS and its interactions with the central nervous system is a branch of neurogastroenterology Neurogastroenterology is a scientific and clinical subspecialty of gastroenterology that deals with the neural mechanisms that influence function of the digestive tract and that underlie projection of conscious sensations to the gut

Pathophysiology of the Enteric Nervous System Robin Spiller, David Grundy, 2008-04-15 Over the last few years there have been huge advances made in our understanding of the interactions between the brain and the gut the enteric nervous system This book is particularly relevant in the understanding diagnosis and management of irritable bowel syndrome the most common functional disorder of the bowel IBS has been diagnosed in 10-20% of adults in the US and symptoms of IBS are responsible for more than 3 million visits to the physician in the US This book is aimed at specialist gastroenterologists but also should be of interest for trainees and fellows in gastroenterology as well as PCPs and GPs with an interest in this subject

The Enteric Nervous System Stuart Brierley, Marcello Costa, 2016-07-05 Nearly 30 years ago a number of scientists working on the Enteric Nervous System ENS gathered at Flinders University in Adelaide Australia to discuss the advances and future of their research It was a friendly and stimulating meeting attended by most of the major players in what was to become the discipline of Neurogastroenterology In 2014 the main Australasian Neuroscience Society meeting was held in Adelaide Australia providing the perfect opportunity to recreate a follow up ENS meeting As such the ENS II 2014 meeting aimed to identify how far the field of enteric neuroscience had developed where the future was heading and what technological advances had been made to address current and future unresolved questions 30 speakers from around the world were invited to give talks and revisit the original expectations the advances made since and the future directions of ENS research These discussions included three generations of investigators from 7 different countries This publication represents the majority of proceedings from the The Enteric Nervous System II 2014 conference which was held

on February 1st 2nd 2014 at the National Wine Centre of Australia Adelaide This meeting was an Official satellite meeting of the 34th Annual Meeting of Australasian Neuroscience Society which was also held in Adelaide The 20 contributions contained within this submission are from international researchers in the field of the ENS who reviewed the advances made since the first meeting in the early 1980s and summarizes the present and future perspectives of neuro gastroenterology Some colleagues could not attend but did send greetings and their messages are included in these proceedings
