Enterprise And The State In Korea And Taiwan Studies In Political Economy:

Enterprise and the State in Korea and Taiwan Karl J. Fields, 1995 Children's cars first appeared between 1901 and 1903 by 1910 they were being made commercially and mass produced by the 1920s This book outlines the history of children's cars in Britain from the first custom built models through the period of greatest popularity to the revival of interest in miniature replicas of famous makes of motor car *Comparative Political Economy of East and South Asia* R. Mascarenhas, 1999-02-17

In this study of the Comparative Political Economy of East and South Asia the author adopts an interdisciplinary perspective on Third World development thus recognising the importance of the interrelationships between the economy and the society and emphasising the need to direct attention to political institutional and historical factors

Corporatism and Korean Capitalism Dennis L. McNamara, 2012-10-02 Corporatism and Korean Capitalism employs corporatist theory to examine the Korean experience of state business ties It includes theoretical chapters on Asian and Korean corporatism case studies of agriculture industry and industrial relations and an introduction to comparative corporatism It helps to push the study of Korean political and economic change from description on to theoretical analysis This volume will challenge researchers and students of Asian studies economics and politics to extend and refine their understanding of both corporatism and Korea Moreover this book offers a guide to policymakers confounded by the curious mix of collusion and competition in Korean political economy *Democratization in Taiwan* Philip Paolino, 2016-12-05

Taiwan faces many of the same challenges as most newly democratized nations such as the legacy of an authoritarian government a traditional culture ethnic division and non majoritarian political institutions Each chapter in this volume sheds light on the democratization process The contributors examine questions concerning the state of political trust ethnicity democratic values and political institutions In the post Cold War era when America's foreign policy is focusing on how best to foster democratic transition throughout the world the lessons that can be learned from Taiwan's democratization impart valuable lessons to students and scholars

Political Business in East Asia Edmund Gomez, 2003-09-02 The relationship between government and business has become a central issue in East Asia since the financial crisis of 1997 As the Asian economies try to advance the reform process recent scandals involving corruption and cronyism have demonstrated the ongoing significance of the issue This edited book features a range of distinguished international specialists and explores the interaction between politics and business across the region Detailed case studies focus on Japan China South Korea Malaysia Thailand Singapore and Indonesia This is the first comprehensive introduction to government business relations in the region and makes a significant contribution to our understanding of the problems faced by the Asian economies

Democratization, Development, and the Patrimonial State in the Age of Globalization Eric N. Budd, 2004-01-01 Postcolonial Third World states have historically faced two major challenges the promotion of economic development and the creation of stable democracies These challenges persist today in the face of globalization While some developing former

colonial countries have gotten a foothold up on globalization others are not so fortunate In Democratization Development and the Patrimonial State in the Age of Globalization author Eric Budd investigates and compares forms of patrimonialism in several developing states The traditional criticism of development countries leveled by liberal democracies and their constituents is that too much patrimonialism acts as a barrier in the face of economic development and democratization The author considers this criticism through a comparative study of the Philippines Peru Taiwan Chile Ecuador and Indonesia Each case holds a specific relationship to patrimonialism As a result these cases provide the author with a unique window into the question of patrimonialism and its effect on economic development and the development of democratic societies Democratization Development and the Patrimonial State in the Age of Globalization offers a significant contribution to disciplinary discussions in international relations economics sociology development studies and globalization studies

The Politics of Developmentalism in Mexico, Taiwan and South Korea J. Minns, 2006-01-10 Minns argues that the industrial transformations of Mexico South Korea and Taiwan were based on the existence of powerful developmentalist states in each It explores the origins of such states and their dynamics and connects the form of autonomy they enjoy within their countries to the policies they pursue

The Political Economy of Korea J. Uttam, 2014-12-10 Korea's twin transitions agrarian to industrial and industrial to post industrial transformed the country's political economy Moving away from the traditional focus on aspects such as market culture and colonialism the author argues that Korea's second state was revitalized through the people's movement and citizens movement

The Political Economy of Policy Coordination Michael C. Webb, 2019-05-15 Michael C Webb explores a central question about postwar economic history how has the growth of international markets affected the coordination of economic policy among nations His analysis overturns the popular assumption that policy coordination has eroded as American hegemony has receded Instead he argues that the growing mobility of capital forced governments to abandon the strategies they had used in the 1950s and 60s to insulate monetary and fiscal policies from international influences and to move toward more direct coordination of central economic strategies Webb shows that since 1945 there has been a crucial shift in the pattern of international collaboration He focuses on three types of adjustment policy trade and capital controls balance of payment lending and intervention in foreign exchange markets and monetary and fiscal policies Noting that the first two types are no longer effective he demonstrates that governments now rely more on monetary and fiscal policy coordination to regulate the global economy As the expansion of international finance created greater turbulence in the global economy in the 1980s the liberal system of international trade threatened to collapse Webb examines in particular how the United States Japan and Germany took unprecedented steps to coordinate monetary and fiscal policies in the late 1980s and early 1990s although domestic political obstacles not any decline in U S power limited the impact of this policy coordination He concludes by assessing the effectiveness of these attempts to reconcile the goal of a stronger liberal system of economic exchange with the desire to maintain national

autonomy **New Multinational Enterprises from Korea and Taiwan** Roger van Hoesel, 2013-01-11 This volume represents the first substantive study of emerging multinationals MNEs from Asian economies drawing on the unique experiences of South Korea and Taiwan Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies it aims to demystify the nature and theoretical implications of these dynamic economic regions The author argues that many of these new multinationals do not possess the characteristics typically ascribed to MNEs such as technological leadership strong marketing positions or advanced managerial capabilities This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored

Business and the State in Developing Countries Sylvia Maxfield, Ben Ross Schneider, 2018-09-05 Much of the debate about development in the past decade pitted proponents of unfettered markets against advocates of developmental states Yet in many developing countries what best explains variations in economic performance is not markets or states but rather the character of relations between business and government The studies in Business and the State in Developing Countries identify a range of close collaborative relations between bureaucrats and capitalists that enhance elements of economic performance and defy conventional expectations that such relations lead ineluctably to rent seeking corruption and collusion All based on extensive field research the essays contrast collaborative and collusive relations in a wide range of developing countries mostly in Latin America and Asia and isolate the conditions under which collaboration is most likely to emerge and survive The contributors highlight the crucial roles played by capable bureaucracies and strong business associations

Power, Place, and State-Society Relations in Korea Jongwoo Han, 2013-11-26 No book has addressed the simultaneous phenomena of Korea's rapid economic development and its vibrant democratization in a single coherent paradigm The late developmentalist approach emphasizes the strong role of Korea's state and bureaucratic efficiency but does not explain how political development was concurrent with the economic miracles in the Han River modernization and dependence theories also fail to explain the aspect of simultaneity in this phenomenon What these three theories commonly miss is the unique relationship between state and society in Korea's long history of political culture In this book Jongwoo Han takes a holistic approach to understanding these phenomena by examining the state's role in the unprecedented economic development and society's capabilities to resist the state's centralized power Han re-articulates state-society relations through Onuf's social constructivist approach based on three rules of a political community hegemony hierarchy and heteronomy This book expands upon this effort to re-construct the state and society relations in two ways First it produces case studies of the capital city of Hanyang Joseon Dynasty from 1392 to 1910 Gyeongseong Japanese colonial control from 1910 to 1945 and Seoul 1945 current The capital city is analyzed as a container for the major ideologies and ways of thinking that have shaped three important political eras Second it adopts two indigenous thoughts Neo Confucianism and geomancy as

sources of the main political and cultural ideologies that shape Korea's state and society relations. These sources have never been treated as units of political analysis. This book finds that both Neo Confucianism and geomancy over two periods of Hanyang and Gyeongseong are two main contributing factors of the emergence of the developmental state and vibrant democracy in Korea in the Seoul era.

Commerce and Capitalism in Chinese Societies Gary G. Hamilton, 2006-05-24
Consisting of sixteen articles which together provide historical comparative and theoretically informed perspectives on the spread of Chinese capitalism, this collection emphasizes the difference between Western and Chinese forms of capitalism.

Betting on Biotech Joseph Wong, 2011-10-15
After World War II, several late developing countries registered astonishingly high growth rates under strong state direction, making use of smart investment strategies, turnkey factories, and reverse engineering, and taking advantage of the postwar global economic boom. Among these economic miracles were postwar Japan and, in the 1960s and 1970s, the so-called Asian Tigers: Singapore, South Korea, and Taiwan, whose experiences epitomized the analytic category of the developmental state. In *Betting on Biotech*, Joseph Wong examines the emerging biotechnology sector in each of these three industrial dynamos. They have invested billions of dollars in biotech industries since the 1990s, but commercial blockbusters and commensurate profits have not followed. Industrial upgrading at the cutting edge of technological innovation is vastly different from the dynamics of earlier practices in established industries. The profound uncertainties of life science-based industries such as biotech have forced these nations to confront a new logic of industry development, one in which past strategies of picking and making winners have given way to a new strategy of throwing resources at what remain very long shots. *Betting on Biotech* illuminates a new political economy of industrial technology innovation in places where one would reasonably expect tremendous potential, yet where billion-dollar bets in biotech continue to teeter on the brink of spectacular failure.

State, 1994-07 [Contending Approaches to the Political Economy of Taiwan](#) Edwin A. Winckler, Susan Greenhalgh, 1988
This work compares IT parks in China, India, Malaysia, Singapore, Taiwan, and Hawaii in search of strategies that policy makers can employ to reduce the Global Digital Divide, advance distributional equity, and soften some of the negative effects of economic globalization.

The Evolution of China's Political Economy Rich Marino, 2023-05-01
For years, China's rapid economic transformation was hailed as a successful project that lifted hundreds of millions of people out of poverty. However, in recent times, the Chinese narrative has taken a more negative turn in the eyes of the West. Much of this has to do with the US perception about the role of the Chinese state in its economy and its military build-up, especially in the South China Sea. There's no question: China's complex economy can be difficult to understand. Information is often unclear and incomplete, and its data are not always reliable. However, this book presents the reader with a clear picture of China's economy and how it compares to other advanced economies, mainly the United States. The book unwraps the key features and structures of China's economy. Moreover, it examines and shows the similarities and differences in comparison with other like economies. In that effort, it underscores the differences by

evaluating their benefits as well as their disadvantages against the backdrop of China's incomplete transition to a market economy. This along with its governance structure becomes the crucial components shaping the way key stakeholders will act and react to opportunities and incentives as that economy evolves. The book supplements the definition of globalization for the academic, the student, the professional and anyone else interested in its positive and negative effects. It is also a good fit for anyone who wants to understand China's three elements of political economy: global trade, political power and its image on the global stage.

Toward the Rural-based Development of Commerce and Industry Y?jir? Hayami, 1998. A traditional paradigm in development economics assumes that the process of modern economic growth is associated with a major shift in labor from rural hinterlands to urban industrial centers. However, the logic of economic development does not dictate that industrialization and urbanization are intertwined and inseparable as assumed in the traditional paradigm. The studies reported in this volume examine whether an alternative route of economic development might exist in which the modern production base also moves into the rural sector instead of the rural labor force alone moving into the urban sector. Part I focuses on historical experiences in Japan such as technical and institutional innovations in rice marketing and the formation of Toyota's relationship with suppliers. Part II reports on current developments in East Asia including the rural garment and weaving industries in Northern Thailand and rural entrepreneurship and industrial development in Korea.

Startup Capitalism Robyn Klingler-Vidra, Ramon Pacheco Pardo, 2025-04-15. In *Startup Capitalism* Robyn Klingler Vidra and Ramon Pacheco Pardo explore the place of startups in contemporary East Asian economies. The last few decades have seen East Asian governments provide increasing support for startups, new high growth, technologically oriented firms. Yet as the authors observe, such initiatives do not necessarily benefit the growth of startups as challengers to large established firms. Rather, they often enable startups to function as boosters for the competitiveness of these firms. Startups in short are both disruptors to and resources for big businesses. Klingler Vidra and Pacheco Pardo demonstrate this dual role by examining the evolution of startup-centric policies in Japan, South Korea, Taiwan and China. They show that in the region, what they call startup capitalism, an economic and political system in which startups contribute to employment, innovation and growth, can take multiple forms. Rich with empirical detail, *Startup Capitalism* reveals how and why startups can end up working with or even for large firms to drive a country's technological capabilities.

The Political Economy of the New Asian Industrialism Frederic C. Deyo, 2018-08-06. The newly industrializing countries (NICs) of East Asia have undergone rapid economic expansion over the past twenty years. Unlike NICs elsewhere in the Third World, those in the Pacific basin—South Korea, Taiwan, Singapore and Hong Kong—have managed to achieve almost full employment, a relatively egalitarian distribution of income and the virtual elimination of poverty. In this collection of essays, nine development specialists explore the Asian NICs' exceptional ability to capitalize on the favorable economic environment of the 1960s and then to adapt flexibly to worsening conditions in the 1970s and 1980s.
