Productions V.Y. Mudimbe, 2013-01-31 All over Africa an explosion in cultural productions of various genres is in evidence
Whether in relation to music song and dance drama poetry film documentaries photography cartoons fine arts novels and
short stories essays and auto biography the continent is experiencing a robust outpouring of creative power that is as
remarkable for its originality as its all round diversity Beginning from the late 1970s and early 1980s the African continent
has experienced the longest and deepest economic crises than at any other time since the period after the Second World War
Interestingly however while practically every indicator of economic development was declining in nominal and or real terms
for most aspects of the continent cultural productions were on the increase Out of adversity the creative genius of the African
produced cultural forms that at once spoke to crises and sought to transcend them The current climate of cultural pluralism
that has been produced in no small part by globalization has not been accompanied by an adequate pluralism of ideas on
what culture is and or should be nor informed by an equal claim to the production of the cultural packaged or not
Globalization has seen to movement and mixture contact and linkage interaction and exchange where cultural flows of capital
people commodities images and ideologies have meant that the globe has become a space with new asymmetries for an
increasing intertwinement of the lives of people and consequently of a greater blurring of normative definitions as well as a
place for re definition imagined and real As this book Contemporary African Cultural Productions has done researching into
African culture and cultural productions that derive from it allows us among other things to enquire into definitions explore
historical dimensions and interrogate the political dimensions to presentation and representation The book therefore offers
us an intervention that goes beyond the normative literary and cultural studies main foci of race difference and identity
notions which while important in themselves might without the necessary historicizing and interrogating result in a discourse
that rather re inscribes the very patterns that necessitate writing against This book is an invaluable compendium to scholars
researchers teachers students and others who specialize on different aspects of African culture and cultural productions as
