*Mothers of Invention* Miléna Santoro, 2002-06-26 Santoro elucidates notoriously difficult works by the four mothers of invention studied Cixous and Hyvrard from France and Gagnon and Brossard from Quebec showing how the rethinking of images associated with femininity and motherhood a disruptive approach to language and a subversive relation to novelistic conventions characterize these writers search for a writing that will best express women's desires and dreams *Mothers of Invention* situates such ideologically motivated textual practices within the avant garde tradition even as it suggests how women's experimental writings collectively transform our understanding of that tradition Santoro makes clear the shared ethical and aesthetic commitments that nourished a transatlantic community whose contribution to mainstream literature and cultural productions including postmodernism is still being felt today
