Entrepreneurism A Philosophy And A Sensible Alternative For The Market Economy

Gabriel R. Ricci

Entrepreneurism A Philosophy And A Sensible Alternative For The Market Economy:

Entrepreneurism: A Philosophy And A Sensible Alternative For The Market Economy Rowland R Kao, Kenneth R Kao, Raymond W Y Kao, 2002-12-10 Contrary to traditional belief entrepreneurship is not just about making money nor is it merely about starting up a venture or owning a small business it is a way of life applicable to all human economic activities Living on a planet with finite resources humanity is sustainable only if there is constant pursuit of innovation and creativity not just for personal gain but also for the common good This book provides concise definitions of entrepreneurship entrepreneur and entrepreneurial for education and application within the framework of the market economy acts as a signpost pointing the way toward balancing the short term need for survival with the long term need for sustainable growth and serves as a philosophical beacon that will guide individuals particularly business leaders toward actions in the interest of humanity Entrepreneurism Raymond W. Y. Kao, 2002 *Entrepreneurship and How to Establish Your Own Business* Johan Strydom, Alex Antonites, Cecile Nieuwenhuizen, Andreas De Beer, Mike Cant, Hannelize Jacobs, 2008-12 A new business rarely runs smoothly and indeed the failure rate of new enterprises is so high that many would be entrepreneurs prefer not to take the risk Entrepreneurship and How to Establish Your Own Business gives you practical guidelines on how to develop your business ideas and establish your own successful enterprise **Islamic Entrepreneurship** Rasem N. Kayed, M. Kabir Hassan, 2013-12-16 This book discusses the idea that there is a specific Islamic form of entrepreneurship Based on extensive original research amongst small and medium sized enterprises in Saudi Arabia it shows how businesses are started and how they grow in the context of an Islamic economy and society It argues that as specific Islamic approaches to a wide range of economic activities are being formulated and implemented there is indeed a particular Islamic approach to entrepreneurship Examining the relationship between Islamic values and entrepreneurial activity the book considers whether such values can be more effectively used in order to raise the profile of Islamic entrepreneurship and also to promote alternatives to development in the contemporary business environment The book analyses the nature of entrepreneurship and the special qualities of Islamic entrepreneurship and discusses how the Islamic approach to entrepreneurship can be encouraged and developed further still *Sustainable Economy* Raymond W. Y. Kao, 2010 This book explains how corporate social responsibility is linked to long term sustainability of an economy and that the activities of an organization should not be only for its self interest but must also be honed for the benefit of common good A major approach the book advocates is corporate decision makers in an organization should work towards earning the trust of stakeholders rather than focus on short term profitability It also emphasizes the importance of recognizing and rewarding the contribution and commitment by participants of an organization Written by academics and consultants this book will be of interest to academicians media professionals organizational participants entrepreneurs and general public Handbook of Qualitative Research Techniques and Analysis in Entrepreneurship Helle Neergaard, Claire M. Leitch, 2015-10-30 One of

the most challenging tasks in the research design process is choosing the most appropriate data collection and analysis technique This Handbook provides a detailed introduction to five qualitative data collection and analysis techniques pertinent to exploring entrepreneurial phenomena Techniques for collecting and analysing data are rarely addressed in detail in published articles In addition the constant development of new tools and refinement of existing ones has meant that researchers often face a confusing range from which to choose The experienced and expert group of contributors to this book provide detailed practical accounts of how to conduct research employing focus groups critical incident technique repertory grids metaphors the constant comparative method and grounded theory This Handbook will become the starting point for any research project Scholars new to entrepreneurship and doctoral students as well as established academics keen to extend their research scope will find this book an invaluable and timely resource *Critique of Entrepreneurship* Peter Armstrong,2005-05-11 The sponsorship of the entrepreneur as an agent of economic growth is now at the centre of a vast promotional industry involving politicians government departments and higher education This book examines the origins of this phenomenon and subjects its mythologies hero figures and policies to an empirically based critical examination

Stewardship-based Economics Raymond W. Y. Kao,2007 Ownership based economics has led to the rapid development and apparent universal success of the market economy It is a system built on the deception of resource availability ill defined profit and misled by the idea that an invisible hand can be an equitable system of distribution It has resulted in a high living standard for a few select individuals but at the expense of mankind and nature ultimately culminating in the development of human conflict This is a book with a blueprint for the twenty first century proposing a two fold approach to easing the pressure on both the human race and the world we live in It calls for a change of mindset from ownership to stewardship and a shift of responsibility to the corporate entities as a sub system of the market economy *Making Ecopreneurs* Michael Schaper,2016-05-06 The first edition of this book looked at the emergence of ecopreneurs environmental entrepreneurs gaining competitive advantage for their firms through understanding and utilising green issues These green entrepreneurs have led the way in enabling market forces to generate economic growth whilst protecting the environment and encouraging sustainability This new edition continues the examination of what distinguishes these green entrepreneurs from others It draws on a diverse range of case studies embracing examples of both successful and unsuccessful ecopreneurial ventures on at least four continents Contributions have been updated and a number of entirely new chapters describe sustainable business projects in places ranging from the USA India western Europe UK Australia central America and New Zealand *Making Ecopreneurs* second edition charts recent developments and remains highly relevant to researchers in the fields of sustainable business development and entrepreneurship to policymakers within governments and NGOs and to those running businesses *Stakeholders and Information Technology in Education* Torsten Brinda,Nicholas Mavengere,Ilkka Haukijärvi,Cathy Lewin,Don Passey,2017-03-14 This book constitutes the thoroughly refereed post conference proceedings of

the First IFIP TC 3 International Conference on Stakeholders and Information Technology in Education SaITE 2016 held in Guimar es Portugal in July 2016 The 15 full papers presented together with 2 short papers were carefully reviewed and selected from 48 submissions They are organized in four topical sections computer studies developing practices and involving stakeholders teacher education key stakeholder practices developments in educational management and information and communication technologies for social and national development

Handbook of Research in Entrepreneurship Education Alain Fayolle,2007-01-01 The Handbook of Research in Entrepreneurship Education is well worth reading and both editions are excellent volumes for all of us involved and interested in the debate on how to bring entrepreneurship education forward and whether to create a distinctive domain of entrepreneurship studies Domingo Ribeiro Soriano Academy of Management Learning Education a commendable source of reference for entrepreneurship education researchers and practitioners alike and would make a worthy addition to a library s collection David Douglas International Journal of Entrepreneurial Behaviour and Research In this the second volume of the Handbook of Research in Entrepreneurship Education leading international scholars highlight the unique characteristics and rich variety of research in entrepreneurship education They adopt several different perspectives focusing on key issues and significant developments in the field and highlighting emergent new insights The 35 contributors span 11 countries and three continents demonstrating not only the richness but also the complexity of the field in terms of culture geography and institutional ethical and political systems The Handbook is intended to collectively assist entrepreneurship educators in developing new programmes and pedagogical approaches that take into account the richness and diversity of these multiple perspectives Highlighting the unique characteristics of research in entrepreneurship education this Handbook will be of great interest to entrepreneurship researchers academics and students wishing to understand the unique notions of entrepreneurship education and entrepreneurial learning which are often quite distinct from current practical views The companion volume Handbook of Research in Entrepreneurship Education Volume 1 A General Perspective showcases the nature and benefits of the new wave in entrepreneurship education emerging as a result of revised academic programmes developed to reflect new forms of entrepreneurship

Early Childhood Education Management Mary Moloney,Jan Pettersen,2016-09-19 The Early Childhood Education sector around the world is constantly changing whether because of the unprecedented demand for ECE services globally accelerated social change or the introduction of pedagogical and regulatory practices Based upon empirical inquiry Early Childhood Education Management examines the somewhat controversial concept of operating an early childhood service as a business It challenges the assumption that an early childhood manager does not require specialist knowledge or skill and discusses which attributes an effective manager should possess In this book which brings together management theory and practice Moloney and Pettersen address core issues at the heart of the management role including the relationship between early childhood policy and broader legislative enactments as well as issues related to the challenges and development of management skills The

book also draws upon real life examples from practice in order to offer insight into some of the most common topics and challenges related to management practice in Early Childhood Education such as business acumen and entrepreneurship recruitment and selection financial management and budgeting supervision mentoring staff development curriculum management collaborative working and change management Written by leading academics with practice experience the book should be of great interest to researchers academics and postgraduate students in the field of education specifically those working in early years and education policy and management It should also be essential reading for managers working in Early Childhood settings

Handbook of Faith and Spirituality in the Workplace Judi Neal, 2012-12-09 While the field of management has developed as a research discipline over the last century until the early 1990s there was essentially no acknowledgement that the human spirit plays an important role in the workplace Over the past twenty years the tide has begun to turn as evidenced by the growing number of courses in academia and in corporate training and an exponential increase in the publications emerging through creative interaction of scholars and practitioners in organizational behaviour workplace diversity sustainability innovation corporate governance leadership and corporate wellness as well as contributions by psychotherapists theologians anthropologists educators philosophers and artists This Handbook is the most comprehensive collection to date of essays by the preeminent researchers and practitioners in faith and spirituality in the workplace featuring not only the most current research and case examples but visions of what will be or should be emerging over the horizon It includes essays by the people who helped to pioneer the field as well as essays by up and coming young scholars Among the questions and issues addressed What does it mean to be a spiritual organization How does this perspective challenge traditional approaches to the firm as a purely rational profit maximizing enterprise Is faith and spirituality in the workplace a passing fad or is there a substantial shift occurring in the business paradigm How does this field inform emerging management disciplines such as sustainability diversity and social responsibility In what ways are faith and spirituality in the workplace similar to progressive and innovative human resource practices Does faith and spirituality in the workplace bring something additional to the conversation and if so what The aim of The Handbook of Faith and Spirituality in the Workplace is to provide researchers faculty students and practitioners with a broad overview of the field from a research perspective while keeping an eye on building a bridge between scholarship and practice

Cultural Landscapes Gabriel R. Ricci, 2018-02-06 A dualism between man and nature has been a persistent feature of Western thought and spirituality from ancient times to the present The opposition of mind and body consciousness and world has tended to obscure the ways in which humans are ecologically part of interconnected systems some of which are obvious while others operate in hidden but life sustaining ways Cultural Landscapes explores the physical ways in which we are intimately linked to the land and the intellectual and aesthetic connections human consciousness has with the landscape Following the editor's introductory essay the lead article by Jame Schaeffer Quest for the Common Good A Collaborative Public Theology

for a Life Sustaining Climate assesses the lightning rod issue of global warming in the context of a public and ecumenical theology and sets the tone for this normative assessment of our relationship with nature Likewise David Kenley's essay Three Gorges be Dammed The Philosophical Roots of Environmentalism in China reveals the traditional philosophical and cultural values that can sustain a vital environmentalism in the East David Brown's historical insights into the use of the American landscape to define historical writing complement Patricia Likos Ricci's historical treatment of nineteenth century landscape painting and the first call to preserve wilderness in the United States Matt Willen An Feochszn and David Martinez What Worlds are Made of The Lakota Sense of Place both demonstrate how space is transformed into place through song and mythic tales On a metaphysical note Andreas Philippopoulos Mihalopolos essay On the Line of the Horizon Anxiety in de Chirico's Metaphysical Spaces provides the reader with psychological and existential insights into the disorienting paintings of de Chirico and Gabriel Ricci's concluding essay tours the landscape that underpins Heidegger's ontological speculations The contributions to this volume are posited on the belief that culture society and human history are ultimately rooted in the natural world This integration may explain why humanity has always looked to nature for moral and ethical guidelines Gabriel R Ricci is associate professor of humanities and the chair of the Department of History at Elizabethtown College in Pennsylvania He is the author of Time Consciousness The Philosophical Uses of History published by Transaction

The Seven Sins of Innovation D. Richards, 2014-11-13 Offers a psychology based model that features seven key determinants of success or failure for innovation and entrepreneurial endeavours Provides specific recommendations examples and case studies that demonstrate how individual and group psychology must be engaged effectively to create entrepreneurial cultures capable of powerful innovation An Entrepreneurial Approach to Stewardship Accountability Raymond W. Y. Kao, Kenneth R. Kao, Rowland R. Kao, 2005 The continuation of global poverty is inextricably entwined with the fundamental philosophy of the market economy It is driven by the individual's neverending desire for profit leading to a critically imbalanced distribution of resources As an entrepreneurial initiative this book advocates a shift in the responsibility for relief of poverty away from the government to the private sector and in particular to corporate entities The concept of the residual is used as the cornerstone of business operations and wealth distribution Corporate decision makers while making proprietary decisions for resources allocation must assume stewardship responsibility and be accountable not just to financial investors but to all contributors of the corporate entity

Development and Its Diverse Aspects Ahmad A Nasr, Jamil Farooqui, 2015-10-15 Development is the agenda and the priority of almost all nations They try to provide their people with a better way of living and better life chances In this attempt they concentrate on the economic and political systems of their societies and try to improve them to achieve the target The general feeling is that if one increases national wealth raises physical quality of life and gives freedom to the populace to govern themselves one achieves prosperity The past three centuries have shown that nations have made tremendous efforts to boost their economic productions and refine

the governing systems They initiated industrialization increased capital formation and developed sophisticated technology to change the physical conditions of their societies They further democratized their socio economic and political institutions to create a conducive atmosphere for development Some claimed that they had achieved the level of development others were in the process and still others have failed to do so The reality is that the so called development has failed to provide peaceful harmonious contended and dignified life to humans Still the majority of the people have no sufficient means to live with dignity and honour they are living below poverty line are exploited suppressed and subjugated by those who are wealthy affluent and enjoying power Development as generally perceived by and large brings luck to small portion of the population who no doubt have all the amenities of life live luxuriously and enjoy all the privileges of society but the rest of the population are deprived of basic requirements of life The Human Development Report 1992 reported that the rich have grown richer and the poor have become poorer due to the outcome of universal development efforts

Sustainable Innovation and Entrepreneurship Rolf Wüstenhagen, 2008-01-01 When I received the review copy I was rather excited the book as a collection of research papers that in themselves are very interesting and provide a fast track into the literature of the subject in question it is a worthwhile purchase to support thinking on entrepreneurship and innovation in a world where the sustainability agenda is increasingly becoming the agenda for inventors entrepreneurs and those who fund them or invest in their companies All the papers are well written and scholarly A particularly strong feature of the chapters is the range of sources quoted at the end of each chapter These references provide pathways into many different literatures that might save much time for subsequent researchers Lorraine Warren International Journal of Entrepreneurial Behaviour and Research In recent years our understanding of corporate sustainability has moved from exploitation to exploration from corporate environmental management to sustainable entrepreneurship and from efficiency to innovation Yet current trends indicate the need for radical innovation via entrepreneurial start ups or new ventures within existing corporations despite difficulties with the financing and marketing of such efforts Presenting both conceptual and empirical research this fascinating book addresses how we can combine environmental and social sustainability with economic sustainability in order to produce innovative new business models The international cast of contributors addresses the wide range of issues in the balance between growth and environmental concerns The first five chapters discuss various aspects of sustainable entrepreneurship This is followed by two chapters that look at innovation within existing firms Innovation is not successful until it finds a customer so the two chapters that follow delve into the marketing aspects of business to consumer and business to business settings The book closes with a broad discussion of the evolution and future of the research agenda into the intersection of sustainability innovation and entrepreneurship Academics students business professionals and NGOs will find this volume enlightening and useful

Entrepreneurship and Structural Change in Dynamic Territories Luísa Cagica Carvalho, Conceição Rego, M. Raquel Lucas, M. Isabel Sánchez-Hernández, Adriana Backx Noronha, 2018-05-03 Entrepreneurial

ecosystems involve a complex synergy of factors including social and structural changes that are frequently cumulative within territories promoting the improvement of citizens quality of life and higher development levels Further dynamic territories are characterized by constant change activity and progress Each chapter in this volume examines a specific entrepreneurial ecosystem in an effort to describe why and how certain companies and organizations manage to overcome adversities and achieve strong performance while others fail Unlike the conventional focus the volume examines microenterprises and Small and Medium Enterprises SMEs while also discussing selected experiences and case studies from developed and developing countries alike **The Asia-Pacific Biotech Directory** ,2003
