Entrepreneurship And Economic Development In Hong Kong:

Studies in Entrepreneurship, Business and Government in Hong Kong Fu-Lai Tony Yu, 2006 Using institutional and Austrian theories this book analyzes Hong Kong's economic transformation. It focuses on knowledge and coordination problems and examines the role of entrepreneurship, small Chinese family enterprises and government policies in the economic development of Hong Kong.

Entrepreneurship and Economic Development in Hong Kong Tony Fu-Lai Yu, 1997-07-31 This is the first systematic study of the nature, operation and contribution of entrepreneurship to the growth of Hong Kong. From a new entrepreneurial perspective of economic development, the author argues that the success of Hong Kong is attributable principally to adaptive entrepreneurship, product imitation, small scale enterprise subcontracting.

Institutions, Entrepreneurship, and Economic Performance David Urbano, Sebastian Aparicio, David B. Audretsch, 2019-04-11 Using institutional economics as a theoretical framework, this book analyzes the institutional environment conducive to entrepreneurial activity in order to enhance economic performance across countries. In particular, the main contributions of this book to the entrepreneurship literature are the following: Identify past and current research about the institutional context shaping entrepreneurial activity and its effect on economic growth. Examine social progress orientation as those institutional factors that are shaping innovative entrepreneurial activity. Explore the effect of different types of entrepreneurial activities on economic growth. Examine how social progress orientation through opportunity-driven entrepreneurship affects economic development. Analyze the interrelationships between institutions, entrepreneurial activity and economic development across countries. Study how the country's institutional context influences the way in which entrepreneurial activity affects social progress. Two sides of the same coin might be observed when analyzing policy aspects of those institutions affecting entrepreneurial activity. On the one hand, effective public policy to promote entrepreneurship is predicated on understanding the underlying forces as well as the consequences and impacts of entrepreneurship. On the other hand, different endeavors to promote entrepreneurial activity might have deleterious economic effects since they could actually reduce employment in the long term. Thus, it is crucial to understand the institutional environment in which entrepreneurs are interacting and making decisions. The comprehension of these phenomena serves to move forward the theoretical, practical and policy debate on entrepreneurship as a mechanism to achieve higher economic performance.

Modernization And Chinese Entrepreneurship East Asian Institute, 1998-05-13 Does modernization in Asia mean westernization? Can Asia achieve modernity without westernization? How can Asia maintain its own cultural traditions in an age of globalization? How can Asian cultures, especially Chinese culture, facilitate modernization? The two articles in this publication address these questions by examining various links between culture, modernity and development.

Entrepreneurship and Economic Development Steven G. Koven, 2021-06-28 The U S is home to some of the largest corporations on the planet American entrepreneurs spawned massive companies such as Facebook Google Apple Amazon and Oracle Founders of these companies became very wealthy Government entities and consumers benefited from the unmarketable products entrepreneurial visionaries developed Entrepreneurship and Economic Development The People and their Environment provides in depth case studies of contemporary entrepreneurs that are building the future The author argues that the famous billionaire entrepreneurs of today such as Gates Bezos Zuckerberg Bloomberg Page Brin Ellison and others possessed individual drive and talent However it is also argued that talent may not be enough Talent withers or thrives in its social cultural political and legal environment The environment of the U S and its entrepreneurial ecosystem has been conducive to innovators and entrepreneurs of the past such as Benjamin Franklin Levi Strauss Henry Ford and Andrew Carnegie and Thomas Edison This book explores how both talent and context influence entrepreneurial development

Chinese Family Business and the Equal Inheritance System Victor Zheng, 2009-12-17 This book disputes the traditional argument that the equal inheritance system hinders the growth of Chinese family business approaching this not only in terms of economic capital but also in terms of human capital such as education and leadership and social networks Zheng argues that most of the family business patriarchs only focus on the passing on economic capital but give little attention to human capital and social capital when they come to the stage to transfer control to the next level It further elaborates that the equal inheritance system itself isn't the destructive force that weakens family business competitiveness but can assist economic development by generating dynamism and capital Based on extensive primary research the work discusses how equal division encourages sibling comparison analysing how such comparisons initially generate stress and anxiety but will ultimately galvanize competition benefiting the business The author also assesses how family division can offer initial economic human and social capitals that can motivate siblings to start their own businesses and be free from the subjugation sometimes associated with a family firm Through the evaluation of these issues the book argues that the equal inheritance system can be regarded as the origin of the self employment mentality which not only fosters the growth of Chinese family business by plays crucial role in promoting economic development Providing a valuable contribution to the field this work will be of great interest to all scholars of Chinese and Asian business

Entrepreneurship and Institutions Nick Williams, Tim Vorley, Colin

Williams, 2017-07-13 Entrepreneurship does not occur in a vacuum The institutions which provide the framework for economic activity matter As countries around the world strive for economic growth this book examines how institutional arrangements are critical in fostering entrepreneurship Through 12 case studies drawn from Asia Europe and America the book demonstrates how different institutional arrangements impact the nature scope and scale of entrepreneurial activity Each chapter highlights how the prevailing formal and informal institutional arrangements interact and how this has consequences for the development of more entrepreneurial economies By synthesizing empirical and theoretical insights the book explores how fostering more entrepreneurial economies is as much a question of institutional alignment as it is the creation of more supportive formal and informal institutions The Dark or Bright Side of Entrepreneurship Yenchun Jim Wu, Wenqing Wu, Ying-Jiun Hsieh, 2022-11-17 **Entrepreneurship and Economic Growth in China** Ting Zhang, Roger Stough, 2013 This book provides an analysis of the existing economic dynamics and factors contributing to entrepreneurship in China Featuring contributions from prominent authors such as Zoltan Acs and Jian Gao it first poses a theoretical question of whether entrepreneurship exists in China and if so the extent and form it takes This book also examines whether the nature of entrepreneurship in China differs from that elsewhere Following this investigation empirical tests and analyses focus on important issues such as What is the special value of entrepreneurship in China Does entrepreneurship in China drive economic growth like it does in other more market oriented economies What is entrepreneurship in China like What is its history nature environment and what are some of the underlying diversities or challenges it is facing Assuming entrepreneurship in China is important to economic growth how can public policy help to enhance the entrepreneurship milieu in China Finally based on the empirical findings and potential policy implications future directions of investigation are suggested **East Asian Business Systems in Evolutionary Perspective** Fu-Lai Tony Yu, 2003 Economic studies on East Asia economies in general and Chinese economies are not lacking However most studies hitherto adopt the conventional neo classical economic approach In particular the Cobb Douglas production function and or theory of comparative advantage are often applied to explain economic growth of an Asian economy In international business Dunning's eclectic theory is also widely adopted to understand the pattern of foreign direct investments in East Asian economies Yet it is generally agreed that the mainstream neo classical approach has severe drawbacks and limitations In particular it does not consider the role of knowledge and uncertainty Entrepreneurship which is the true engine of growth is largely missing in neo classical economics This book uses the evolutionary approach to analyse economic and business activities in East Asian economies Specifically the book focuses on knowledge and coordination problems and examines the role of entrepreneurship in economic affairs **Chinese Entrepreneurship in a Global Era** Raymond Sin-Kwok Wong, 2008-06-18 As we enter the 21st century it is clear that the economic growth China has enjoyed has been extraordinary Although Western countries continue to dominate the world economy and financial markets the capital markets of Hong Kong Singapore Shanghai and
