Environment And Democracy In The Czech Republic The Environmental Movement In The Transition Process:

Environment and Democracy in the Czech Republic Adam Fagan, 2004-01-01 the book's contents will appeal to academics working within the fields of environmental politics or central and east European studies as well as to political or social scientists with an interest in SMO development David Benson Environmental Politics Environment and Democracy in the Czech Republic is a succinct well written and scrupulously researched book Sean Hanley Europe Asia Studies this book provides a well researched survey of the development of the environmental movement in the Czech Republic and of its role in relation to the democratic transition process For scholars and students looking at environmental politics in Central and Eastern Europe it provides a wealth of information that will be useful in conducting comparative studies Alberto Costi European Environment Fagan has written a well researched analysis of the evolving role and status of Czech EMOs since the overthrow of communism John M Kramer Slavic Review This volume presents an original study of the development of the environmental movement in the Czech Republic particularly in relation to the democratic transition process It offers a broad historical analysis of the evolution of the movement through the 1990s to the present day and presents rich case studies on a number of environmental organisations The detailed empirical work reveals interesting insights into the character of contemporary Czech politics and the difficulties faced by the environmental movement This is a well researched and well written piece of work which will make a valuable contribution to the existing literature James Meadowcroft University of Sheffield UK Since a handful of environmental activists helped to bring down the communist regime in Czechoslovakia the arena of environmental politics has offered a valuable lens on the transition process providing a unique insight into the contradictory and highly contingent relationship between democratisation and neo liberalism Environment and Democracy in the Czech Republic offers a radical perspective on the democratisation process revealing the extent to which the consolidation of a politically efficacious and diverse civil society is far more complex than the earlier generation of commentators acknowledged The environmental movement has not flourished under political democracy its radical activists have been marginalized and targeted by the state their ideologies and strategies compromised and their critical voice silenced Yet the book concludes that whilst the mainstream environmental movement has become institutionalised and appears incapable of representing community interests the environmental issue retains the capacity to mobilise this time against the neo liberal agenda of the democratic government This definitive account of the evolution of the Czech environmental movement since 1990 offers a radical evaluation of the institutions and practice of political democracy and challenges some of the certainties of social movement theory Although focused on the Czech Republic the book will undoubtedly contribute to a better understanding of the role of environmental movements within contemporary politics throughout the world It will be welcomed by political and social scientists with an interest in Central and Eastern Europe and academics and students with an interest in environmental politics

A History of Modern Political Thought in East

Central Europe Balázs Trencsenyi, Michal Kopeček, Luka Lisjak Gabrijelčić, Maria Falina, Mónika Baár, 2018-10-18 A History of Modern Political Thought in East Central Europe is a synthetic work authored by an international team of researchers covering twenty national cultures and 250 years. It goes beyond the conventional nation centered narratives and presents a novel vision especially sensitive to the cross cultural entanglement of political ideas and discourses. Its principal aim is to make these cultures available for the global market of ideas and revisit some of the basic assumptions about the history of modern political thought and modernity as such. The present volume is the final part of the project following Volume I Negotiating Modernity in the Long Nineteenth Century and Volume II Part I Negotiating Modernity in the Short Twentieth Century 1918-1968. OUP 2018. Its starting point is the defeat of the vision of socialism with a human face in 1968 and the political discourses produced by the various consolidation or normalization regimes. It continues with mapping the exile communities and domestic dissidents' critical engagement with the local democratic and anti democratic traditions as well as with global trends. Rather than achieving the coveted end of history, however, the liberal democratic order created in East Central Europe after 1989 became increasingly contested from left and right alike. Thus, instead of a comfortable conclusion pointing to the European integration of most of these countries, the book closes with a reflection on the fragility of democracy in this part of the world and beyond.

EU Enlargement and Civil Society in the Western Balkans Natasha Wunsch, 2018-06-27. This book examines civil society empowerment during the EU enlargement process. Building on extensive fieldwork, it compares mobilisation around rule of law issues in Croatia, Montenegro and Serbia. Moving beyond the traditional focus on the top down impact of EU support, it demonstrates NGOs' agency and analyses their shifting strategies throughout the membership negotiations. Its approach and findings will appeal to scholars and advanced students of EU integration, social movements and the politics of South East Europe.

Transnational Protest and Global Activism Donatella Della Porta, Sidney G. Tarrow, 2005. Sociologists and political scientists from Europe and the US explore how global issues are transforming local and national activism and the interactions between local, national and supranational movement organizations. In addition to describing recent events, they adapt concepts and hypotheses developed in the social movement literature of the past.

Green Activism in Post-Socialist Europe and the Former Soviet Union Adam Fagan, JoAnn Carmin, 2014-06-11. Green activism played a critical role in the downfall of Soviet style communism in Eastern Europe at the end of the 1980s. After the revolutions, environmentalists were expected to exert influence within the new democracies and to form the bedrock of the new civil societies that were predicted to flourish across the region. The prospect of EU membership provided activist networks with even greater optimism about their political opportunities. Two decades later, what has been the impact of political and economic liberalisation on environmental campaigners and policy advocates? Has access to elites increased with democratisation and Europeanization? To what extent does the realm of environmental politics within individual states and across the region continue to represent an optic on change and continuity? Through country case studies

and comparative analysis of national movements this edited volume addresses each of these questions and provides a different perspective of green politics in the region This book was previously published as a special issue of Environmental Politics The Routledge Handbook of Environmental Movements Maria Grasso,Marco Giugni,2022-01-31 This handbook provides readers with up to date knowledge on environmental movements and activism and is a reference point for international work in the field It offers an assessment of environmental movements in different regions of the world macrostructural conditions and processes underlying their mobilization the microstructural and social psychological dimensions of environmental movements and activism and current trends as well as prospects for environmental movements and social change The handbook provides critical reviews and appraisals of the current state of the art and future development of conceptual and theoretical approaches as well as empirical knowledge and understanding of environmental movements and activism It encourages dialogue across the disciplinary barriers between social movement studies and other perspectives and reflects upon the causes and consequences of citizens participation in environmental movements and activities The volume brings historical studies of environmentalism sociological analyses of the social composition of participants in and sympathizers of environmental movements investigations by political scientists on the conditions and processes underlying environmental movements and activism and other disciplinary inquiries together while keeping a clear focus within social movement theory and research as the main lines of inquiry The handbook is an essential guide and reference point not only for researchers but also for undergraduate and graduate teaching and for policymakers and activists Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons CC BY NC ND 4.0 license *Negotiating Territoriality* Allan Charles Dawson,Laura Zanotti,Ismael Vaccaro,2014-07-11 This edited collection disrupts dominant narratives about space states and borders bringing comparative ethnographic and geographic scholarship in conversation with one another to illuminate the varied ways in which space becomes socialized via political economic and cognitive appropriation Societies must first and foremost do more than wrangle over ownership and land rights they must dwell in space Yet historically the interactions between the state s territorial imperative with previous forms of landscape management have unfolded in a variety of ways including top down imposition resistance and negotiation between local and external actors These interactions have resulted in hybrid forms of territoriality and are often fraught with fundamentally different perceptions of landscape This book foregrounds these experiences and draws attention to situations in which different social constructions of space and territory coincide collide or overlap Each ethnographic case in this volume presents forms of territoriality that are contingent upon contested histories politics landscape the presence or absence of local heterogeneity and the involvement of multiple external actors with differing motivations ultimately all resulting in the potential for conflict or collaboration and divergent implications for conceptions of community autochthony and identity **Historical Dictionary of the Green Movement** Miranda

Schreurs,Elim Papadakis,2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of Historical Dictionary of the Green Movement contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement **Dilemmas of**

Handbook of Environmental Sociology M. R. Redclift,Graham Woodgate,2010-01-01 Acclaim for the first edition The scope of the volume is vast and overall the Handbook amounts to an almost encyclopaedic reference text for scholars of environmental questions across the social sciences be they in sociology geography political science or wherever Neil Ward Environmental Politics Each author writes with a distinctive style yet the work flows well because the editors selected recognized scholars with outstanding credentials Academic libraries especially those serving a strong social science community will find this work a worthwhile addition Professors of sociology and environmental studies could use the essays for additional readings and reviews Marjorie H Jones American Reference Books This International Handbook is an important addition to the growing concern and publication in the field of environmental sociology Certainly any serious scholar in the field should find this edited reference work of interest John J Hartman International Social Science Review This thoroughly revised Handbook provides an assessment of the scope and content of environmental sociology and sets out the intellectual and practical challenges posed by the urgent need for policy and action to address accelerating environmental change More than a decade has passed since the first edition of the Handbook was published to considerable acclaim and environmental sociology has since become firmly established as a critical social science discipline This second edition is a major interdisciplinary reference work comprising more than 25 original essays authored by leading scholars many of whom are intimately involved in national regional or global environmental policy processes It marks some of the changes and

continuities in the field of environmental sociology and highlights today's substantive concerns and theoretical debates. The Handbook is divided into three parts covering concepts and theories, critical issues and international perspectives, each with an introduction outlining the content of the constituent chapters and cross referencing some of the more significant themes that link them together. Authoritative and comprehensive, this Handbook will prove to be essential reading for academics, researchers and students across the social sciences who are interested in the environment. It will also be enthusiastically received by sustainable development policy makers and practitioners.

Environmental Problems in East-Central Europe
Frank Carter, David Turnock, 2002-09-26
In this new edition, the progress made in the last decade to solve the environmental problems described in the first edition is assessed. The attempts to bring environmental legislation into line with West European norms is also described. *Environmental Problems of East Central Europe* looks at air and water pollution, modern farming, water supplies, waste management and landscape protection. These topics are placed within economic, social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs. European Union assistance, civil society and the work of environmental NGOs are also discussed. All of these matters are considered within the context of the wider geographical area and then by each individual country, including the previously communist states lying to the west of the Soviet Union, now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities, and a review of the former Soviet Union with particular reference to the Baltic States. *Environmental Problems in East Central Europe* provides a wealth of up-to-date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country. The environment is being taken seriously by them all, such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular. The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe. Although there is enormous waste and inefficiency in energy use, people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the basis of a fair share of the earth's resources.

Intellectual Production in Socialist Europe 1956-1968, 2025-10-02
Between the Thaw and the Prague Spring, Socialist Europe experienced a brief yet intense period of intellectual ferment. *Intellectual Production in Socialist Europe 1956-1968* explores the shifting landscape of literature, philosophy, literary theory and political thought in the wake of Stalinism and on the cusp of postmodernism. Bridging cultural analysis and intellectual history, this volume offers fresh insights into a period that shaped Socialist Europe for decades.

EU Enlargement and the Environment
JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31
This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union, assessing and challenging prevailing views about the outcomes and processes of this historic development. Looking at four central themes: capacity changes and limitations, the EU's mixed messages and conflicting priorities, non-state actor roles and developments, and the exchange of ideas and information, the

volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics The Routledge Handbook of East European Politics Adam Fagan,Petr Kopecký,2017-08-15 The Routledge Handbook of East European Politics is an authoritative overview that will help a wide readership develop an understanding of the region in all its political economic and social complexity Including Central Europe the Baltic republics South Eastern Europe and the Western Balkans as well as all the countries of the former Soviet Union it is unrivalled in breadth and depth affording a comprehensive overview of Eastern European politics provided by leading experts in the fields of comparative politics international relations and public administration Through a series of cutting edge articles it seeks to explain and understand patterns of Eastern European politics today The Routledge Handbook of East European Politics will be a key reference point both for advanced level students developing knowledge about the subject researchers producing new material in the area and those interested and working in the fields of East European Politics Russian Politics EU Politics and more broadly in European Politics Comparative Politics Democratization Studies and International Relations **Handbook of Anti-Environmentalism** Tindall, David,Stoddart, Mark C. J.,Dunlap, Riley E.,2022-03-22 This thought provoking Handbook provides a theoretical overview of the wide variety of anti environmentalisms and offers an integrative research agenda for future research on the topic Probing the ways in which groups have organized to oppose environmental movements and pro environmental policies in recent decades it examines those involved in these countermovements and studies their motivations and support systems This Handbook explores core topics in the field including contestation over climate change wind power mining forestry food sovereignty oil and gas pipelines and population issues **Historical Dictionary of the Czech State** Rick Fawn,Jiri Hochman,2010 Czechoslovakia has been at the center of some of the most difficult and tragic episodes of modern European history its sacrifice to Nazi Germany at Munich the Communist Coup of 1948 and the military crushing of the Prague Spring It has also enacted momentous change almost magically as in the peaceful overthrow of communism in 1989 and then the negotiated end to the country in 1992 Czechoslovak history has consequently produced enduring political metaphors for our times such as the Velvet Revolution and Velvet Divorce The second edition of the Historical Dictionary of the Czech State has been thoroughly updated and greatly expanded Featuring a chronology introductory essay appendix bibliography and hundreds of cross referenced dictionary entries this detailed authoritative reference provides understandings of the Czechs as a people the territory they inhabit their social cultural political and economic developments throughout history and interactions with their neighbors and the wider world Environment and Citizenship Benito Cao,2015-03-05 The increasing awareness of the human impact on the environment is having a profound effect on the concept and content of citizenship one of the fundamental institutions that structures human relations In what is the first introduction of its kind this book provides an

accessible stimulating and multidimensional overview of the many ways in which concern for the environment driven primarily by the preoccupation with sustainability is reshaping our understanding of citizenship Environment and Citizenship is structured into three parts Part I introduces the reader to the concept and theories of citizenship and explores the impact that environmental concerns is having on contemporary formulations of citizenship both traditional e g national liberal and republican and emerging e g cosmopolitan ecological and ecofeminist Part II explores the practical manifestations of environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century

Social Movements in Post-Communist Europe and Russia Kerstin Jacobsson, Steven Saxonberg, 2015-12-22 This volume provides a much needed update on the state of civil society in post communist Europe and Russia more than two decades after the fall of the communist regimes The chapters offer new perspectives on social movement strategies in post communist Central Eastern Europe and Russia The chapters illustrate how social movements develop particular repertoires of action and contention which are better suited for their specific local contexts in the post communist setting In Russia and Poland the most popular and effective choices are using domestic and transnational legal opportunities judicial activism and litigation that complement the traditional lobbying and mass mobilization Human rights framing has become important in Hungary and the Czech Republic The chapters analyse various types of rights based activism that operate in otherwise prohibitive social and political environments thereby raising highly contentious issues such as animal rights environment and sustainability human rights women s rights and gay rights activism The contributions richly illustrate the often surprising and multiple ways in which transnational discourses and norm pressure are received translated or resisted in the local contexts Finally the volume provides a novel reconceptualisation and offers new understandings of the relationships between the state and civil society in the post communist context This book is based on a special issue of East European Politics

Energy Transitions in Central and Eastern Europe Tomas Maltby, Matúš Mišík, 2024-04-04 Examines Central and Eastern European energy transitions and climate and energy policy as the EU aims for decarbonisation by 2050

Democracy in Western and Post-communist Countries Tadeusz Buksiński, 2009 The authors of this book scholars from Austria Czech Republic Hungary

Ukraine Kirghizia and Poland seek to answer the question in what way the West European and postcommunist countries respond to the challenges posed to them by democratization in Central and Eastern Europe and European constitutional politics and policymaking New democracies necessarily pose a challenge to non democratic states because they liberated themselves from the totalitarian regime They pose a challenge for the old liberal democracies too because they try to compromise individual interests and freedoms with traditional prepolitical and political group identities But just the model of democracy can be followed in many non Western countries which aspire to establish a democratic order This book raises the questions that are particularly significant to the present day political practice in its European and global dimensions It is intended as a companion volume for all those who combine their academic research with wider interests in the promoting of democracy in the period of globalization and under the new pressures of European constitutional politics
