## **Environment And Democratic Transition Policy And Politics In Central And Eastern Europe:**

**Environment and Democratic Transition:** A. Vari, Pal Tamas, 2013-03-14 Recent democratization and the accompanied liberalization of the media in Central and Eastern Europe has brought the devastating environmental impacts of the intensive and careless industrialization of the last 40 years to the surface. Less is known however about the social political and institutional background of environmental risk management which led to the present situation as well as about recent changes. *Environment and Democratic Transition Policy and Politics in Central and Eastern Europe* provides an overview of the mechanism of policy making the role of the scientific community the environmental movements and the public in risk controversies in Central and Eastern Europe from the 1970s until 1991. The book brings together studies by leading social scientists from the East and the West who investigate the economic legal institutional behavioral social and political aspects of environmental policy. In addition to analyzing past histories most contributions focus also on challenges pitfalls and dilemmas that the region's policy makers and environmentalists must face during the period of transition and into the future.

**Environmental Problems in Eastern Europe** Francis W. Carter, David Turnock, 1996 Providing a comprehensive descriptive analysis of a wide range of Central and East European countries this updated paperback edition offers an invaluable study of pollution problems and effects on the quality of life. Revisions include new chapter on Slovakia demonstrating the implementation of a number of practical measures which have made a considerable impact on environmental problems that arose under communism and have been tackled during the transition new concluding chapter which provides an important overview of recent developments in Eastern Europe and discusses topical issues such as health hazards and methods of charging polluters for environmental damage. *Environmental Policy in the EU* Andrew Jordan, 2012-04-27 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts it includes in depth case studies of contemporary policy issues such as climate change genetically modified organisms and trans Atlantic relations as well as an assessment of how well the EU is responding to new challenges such as enlargement environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors.

**Environmental Transitions** Petr Pavlínek, John Pickles, 2002-09-26 *Environmental Transitions* is a detailed and comprehensive account of the environmental changes in Central and Eastern Europe both under state socialism and during the period of transition to capitalism. The change in politics in the late 1980s and early 1990s allowed an opportunity for a rapid environmental clean up in an area once considered one of the most environmentally devastated regions on earth. The book illustrates how transformations after 1989 have brought major environmental improvements as well as new environmental problems. It shows how environmental policy economic change

and popular support for environmental movements have specific and changing geographies associated with them. Environmental Transitions addresses a large number of topics including the historical geographical analysis of the environmental change health impacts of environmental degradation the role of environmental issues during the anti communist revolutions legislative reform and the effects of transition on environmental quality after 1989. Environmental Transitions contains detailed case studies from the region which illustrate the complexity of environmental issues and their intimate relationship with political and economic realities. It gives theoretically informed ideas for understanding environmental change in the context of the political economy of state socialism and post communist transformations drawing on a wide body of literature from West Central and Eastern Europe.

**The American Bibliography of Slavic and East European Studies** Pat Leonard, Rebecca Routh, 2020-02-27 This bibliography first published in 1957 provides citations to North American academic literature on Europe Central Europe the Balkans the Baltic States and the former Soviet Union. **Environmental Problems in East-Central Europe** Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed. The attempts to bring environmental legislation into line with West European norms is also described. Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection. These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs. European Union assistance civil society and the work of environmental NGOs are also discussed. All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States. Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country. The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular. The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe. Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the basis of fair share of the earth's resources.

**Energy Transitions in Central and Eastern Europe** Tomas Maltby, Matúš Mišík, 2024-04-04 This book examines the mutual interplay of climate and energy policies in eleven Central and Eastern European countries in the context of the EU's energy transition. Energy security has long been

Carmin,2014-06-11 Green activism played a critical role in the downfall of Soviet style communism in Eastern Europe at the end of the 1980s After the revolutions environmentalists were expected to exert influence within the new democracies and to form the bedrock of the new civil societies that were predicted to flourish across the region the prospect of EU membership provided activist networks with even greater optimism about their political opportunities Two decades later what has been the impact of political and economic liberalisation on environmental campaigners and policy advocates Has access to elites increased with democratisation and Europeanization To what extent does the realm of environmental politics within individual states and across the region continue to represent an optic on change and continuity Through country case studies and comparative analysis of national movements this edited volume addresses each of these questions and provides a different perspective of green politics in the region This book was previously published as a special issue of Environmental Politics

**Political Participation** Gabriella Citroni,Irene Spigno,Palmina Tanzarella,2022-01-27 This book provides a comparative analysis of how judgments from the European Court of Human Rights ECtHR and the Inter American Court of Human Rights IACtHR affect political participation and electoral justice at the national level Looking at specific countries the work analyses the legal impact the implementation of the ECtHR and the IACtHR judgments has with a specific focus on cases in which the regional court concerned uses the democratic argument that is an argument related to democracy and political rights The reasoning is that although democracy is a much wider concept judgments concerning violations of political rights and electoral justice provide reliable indicators to assess the status and sustainability of democracy in a State Moreover the

analysis of the violations of political rights and electoral justice allows an in depth comparison between the two regional human rights systems Mindful of the broader scope of the fall out generated by the non implementation of judgments including in socio economic terms the book includes a section exploring how judgments issued by the ECtHR and the IACtHR affect voters participation in the countries under their jurisdiction To this end an original dataset including the 47 Member States of the Council of Europe and the 20 countries which recognised the adjudicatory jurisdiction of the IACtHR is built Multidisciplinary in aim and scope of analysis the book will be an invaluable resource for researchers academics and policy makers working in the areas of constitutional law international human rights law and political economy

*Transnational Politics of the Environment* Liliana B. Andonova, 2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational Politics of the Environment* Liliana Andonova

examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards Transnational Politics of the Environment challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics
