Environment And Philosophy:

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity's place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues

Environment and Philosophy Emily Brady, with Jane Howarth, Vernon Pratt, 2005-07-26 *Environment and Philosophy* provides an accessible introduction to the radical challenges that environmentalism poses to concepts that have become almost second nature in the modern world These include the ideas of science and objectivity the conventional placement of the human being within the environment the individualism of conventional Modern thought Written in an accessible way for those without a background in philosophy this text examines ways of thinking about ourselves nature and our relationship with nature It offers an introduction to the phenomenological perspective on environmental issues and also to the questions of what natural beauty is

Environmental Philosophy Christopher Belshaw, 2001-10-01 Beginning with an overview of current concerns Belshaw locates our attitudes toward the environment within their cultural and historical milieu He then examines the various positions in detail ranging from the moderate view that we ought to consider not only ourselves but also other animals to the seemingly more extravagant contention that non sentient life rocks deserts B indeed all of the processes of nature B should be considered intrinsically valuable In later chapters Belshaw explores the importance of an aesthetic response to the environment opening the way for a human centred position that is both more generous and more flexible than those often advanced elsewhere In contrast to many of its competitors *Environmental Philosophy* challenges accepted dichotomies B man nature instrumental intrinsic green non green B and advocates conciliation rather than confrontation Although the arguments are rigorous the writing is clear and non technical making *Environmental Philosophy* an excellent survey for those engaging with these issues for the first time as well as offering much to challenge the more advanced student

Thinking Like a Mall Steven Vogel, 2015-05 A provocative argument that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the built environment Environmentalism in theory and practice is concerned with protecting nature But if we have now reached the end of nature

as Bill McKibben and other environmental thinkers have declared what is there left to protect In Thinking like a Mall Steven Vogel argues that environmental thinking would be better off if it dropped the concept of nature altogether and spoke instead of the environment that is the world that actually surrounds us which is always a built world the only one that we inhabit We need to think not so much like a mountain as Aldo Leopold urged as like a mall Shopping malls too are part of the environment and deserve as much serious consideration from environmental thinkers as do mountains Vogel argues provocatively that environmental philosophy in its ethics should no longer draw a distinction between the natural and the artificial and in its politics should abandon the idea that something beyond human practices such as nature can serve as a standard determining what those practices ought to be The appeal to nature distinct from the built environment he contends may be not merely unhelpful to environmental thinking but in itself harmful to that thinking The question for environmental philosophy is not how can we save nature but rather what environment should we inhabit and what practices should we engage in to help build it

Elemental Philosophy David Macauley, 2010-09-29 Bachelard called them the hormones of the imagination Hegel observed that through the four elements we have the elevation of sensuous ideas into thought Earth air fire and water are explored as both philosophical ideas and environmental issues associated with their classical and perennial conceptions David Macauley embarks upon a wide ranging discussion of their initial appearance in ancient Greek thought as mythic forces or scientific principles to their recent reemergence within contemporary continental philosophy as a means for understanding landscape and language poetry and place the body and the body politic In so doing he shows the importance of elemental thinking for comprehending and responding to ecological problems In tracing changing views of the four elements through the history of ideas Macauley generates a new vocabulary

for and a fresh vision of the environment while engaging the elemental world directly with reflections on their various manifestations *Environmental Philosophy and Environmental Activism* Don E. Marietta, Lester Embree, 1995-09-06 This collection of new essays by eleven distinguished environmental philosophers addresses two main questions first whether environmental philosophy and ethics should be seen as a form of applied philosophy or as something else perhaps best called practical philosophy and second how environmental philosophy is practiced in human life especially in the lives of academics

World Not Made for Us Keith R. Peterson, 2020-09-01 In *A World Not Made for Us* Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity *Environmental Pragmatism* Eric Katz, Andrew Light, 2013-04-15

Environmental pragmatism is a new strategy in environmental thought It argues that theoretical debates are hindering the ability of the environmental movement to forge agreement on basic policy imperatives This new direction in environmental thought moves beyond theory advocating a serious inquiry into the merits of moral pluralism Environmental pragmatism as a coherent philosophical position connects the methodology of classical American pragmatic thought to the explanation solution and discussion of real issues This concise well focused collection is the first comprehensive presentation of environmental pragmatism as a new philosophical approach to environmental thought and policy **Beyond the Land**
