Environment And The City Sharing Singapore's Experience And Future Challenges:

Environment and the City Giok Ling Ooi, 1995 *Scaling Urban Environmental Challenges* Peter J Marcotullio, Gordon McGranahan, 2012-06-25 Think globally act locally emphasizes the importance of scale in dealing with environmental challenges but not how to factor it in This major new book focuses on the spatial dimensions of urban environmental burdens showing how important it is to take these into account when pursuing environmental justice and good governance whether in the context of the sanitary risks of slum living the pollution of uncontrolled industrialization and motorization or the enormous ecological footprints of affluent urban lifestyles Written by leading experts in the fields of urban development and environmental planning the book reviews the urban environmental shifts that have shaped today's challenges and examines conditions and problems in the urban centres of low middle and high income countries Case studies address such economically diverse cities as Accra New Delhi Mexico City and Manchester while thematic chapters explore issues including water sanitation and transportation The book concludes by exploring and analysing different scales of governance The editors argue that we should not rely solely on local governance to address local burdens like poor sanitation nor depend only on global governance for global challenges such as greenhouse gas emissions but that scale is crucial in both understanding the problems and devising successful responses Published with UNU IAS and IIED *Sustainability And Cities: Concept And Assessment* Giok Ling Ooi, 2005-08-15 This important book addresses issues of development and its environmental sustainability for the fastest growing areas in Asia its cities Recognizing sustainability with respect to the environment and its exploitation has yet to make its impact on development plans in Asia The problem is due to the lack of cross country studies which provide a fair understanding of the different levels of development as well as the wide variety of development strategies adopted by different countries The relatively ineffective implementation of environmental assessment has not done much to reduce the damage to or depletion of the natural resource base Sustainability and Cities Concept and Assessment aims to bridge this gap by taking a sober look at the translation of concepts of environmental sustainability into terms that are meaningful and applicable for cities particularly those in fast developing countries like China *The Singapore Water Story* Cecilia Tortajada, Yugal Joshi, Asit K. Biswas, 2013 Singapore's journey during the past 45 years is an outstanding example that in spite of multiple hardships pragmatic policies clear visions long term planning forward looking strategies and political will as well as a relentless urge to improve can result in strong foundations for sustainable development This book describes the journey of Singapore's development and the fundamental role that water has had in shaping it What makes this case so unique is that the quest for self sufficiency in terms of water availability in a fast changing urban context has been crucial to the way development policies and agendas have been planned throughout the years The authors analyse plans policies institutions laws and regulations water demand and water supply strategies water quality and water conservation considerations partnerships and importance of the media They assess overall how all these issues have evolved in response to

the dynamic needs of the city state The study of Singapore shows how a dynamic society can address development without losing its focus on the environment In the city state environmental concerns in general and water concerns in particular have played a major role in its transformation from a third world to a first world country How and why this transformation took place is the main focus of this authoritative book

Environmental Law in Singapore LYE Lin Heng, 2021-07-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Singapore A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Singapore Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy

Asian Migrants and Education Michael W. Charney, Brenda Yeoh, Tong Chee Kiong, 2013-04-17 The contributors to this volume explore the close relationship between education and the molding of modern immigrant societies through case studies of either Asian migrants or Asian immigrant societies This volume will be especially useful for researchers educators and students intent on understanding some of the critical challenges faced by a globalizing world

50 Years Of Urban Planning In Singapore Chye Kiang Heng, 2016-10-17 50 Years of Urban Planning in Singapore is an accessible and comprehensive volume on Singapore's planning approach to urbanization Organized into three parts the first section of the volume Paradigms Policies and Processes provides an overview of the ideologies and strategies underpinning urban planning in Singapore the second section The Built Environment as a Sum of Parts delves into the key land use sectors of Singapore's urban planning system and the third section Urban Complexities and Creative Solutions examines the challenges and considerations of planning for the Singapore of tomorrow The volume brings together the diverse perspectives of practitioners and academics in the professional and research fields of planning architecture urbanism and city making

Spatial Planning for a Sustainable Singapore Tai-Chee Wong, Belinda Yuen, Charles Goldblum, 2008-02-28 This book analyses and provides an insight to Singapore's planning system and practices associated with sustainable development It takes a reflective approach in reviewing the direction impact and significance of sustainable development in Singapore

planning and the future challenges facing the city state which is often looked upon by many developing countries as a model

Pollution Control in East Asia Michael T. Rock, 2010-09-30 Why do some economies seem to excel at effective pollution management while others miss the mark when responding to deteriorating urban environments These studies of pollution management in East Asia s newly industrialized economies NIEs include successful government responses in Singapore and Taiwan qualified results in China and Indonesia and much more limited success in Thailand and Malaysia In each example Michael Rock considers the starting point of the economy as it began its path toward industrialization in the post World War II period He discusses the relevant historical and political context the pressures placed on the political system from domestic and international sources and the influence of ongoing trends in East Asia for democratization and economic liberalization Rock s text makes it clear that each economy found unique innovative ways to link environmental protection to its own political and economic institutions Thus while public pressure from both home and abroad gave strong impetus to successful programs in Taiwan the development of policy in Singapore involved limited public review and a centralized government led process The result of Rock s scholarship is a book that provides important lessons without being reductionist The book offers insights to apply to pollution management in a diverse range of developing nations but avoids attempts for precise prescriptions or universally appealing normative answers A copublication of Resources for the Future and the Institute of Southeast Asian Studies ISEAS

Towards a "second Generation" in Environmental Laws in the Asian and Pacific Region Lin Heng Lye, Maria Socorro Z. Manguiat, 2003 Laws in the twentieth century were based on economic growth and development This new century calls for the reassessment of all laws from an environmental perspective in consideration of such looming environmental concerns as global warming degradation of biodiversity and pollution This book captures some provoking thoughts raised during a symposium on second generation environmental laws held in Japan in 2002 The wide range of articles will promote greater understanding of what has been achieved with the first generation of environmental laws what is needed for the second generation and how to bridge the two

Case Studies in Public Governance June Gwee, 2013-06-19 This book makes available original case studies on how institutions developed in Singapore Up until now these case studies have been used exclusively in Singapore to teach public governance and have been well received in the Singapore Civil Service College s milestone programmes With this publication more will be able to access this material Students researchers and policy makers can now use these case studies for pedagogy or to derive insights on Singapore s approach on governance Designed around the theme of building institutions the case studies also present facets of how institutions developed which are universal to management studies These case studies highlight a core aspect in the development of institutions namely how people and organisations change the culture of institutions how leaders influence their organisations and how policies define the systems that build institutions The book contains 5 case studies each profiling a unique sector and key institution in Singapore They present how public agencies and leaders helped to build Singapore

institutions over the last forty years Although there are more cases studies on management and strategy than public policy and administration there is growing interest in Asian case studies and more specifically case studies on Singapore public governance This collection of case studies on Singapore institutions provides the perspective from Singaporean case writers themselves on the role of government in Singapore s development

Asia-Pacific Legal Development Gerry Ferguson,2011-11-01 In this age of globalization many legal experts see evidence of swift global movement toward an eventual single world legal system Yet the trend to political and economic integration in some parts of the world is matched by the trend to disintegration in others where strong cultural and political resistance to external influences exists Asia Pacific Legal Development traces current and prospective developments in several legal systems of the Asia Pacific region to make sense of these trends and counter trends The contributing authors represent a wide variety of specialist expertise both public and private and together they encompass the three sectors that constitute a modern system of formal law the economic the behavioural and the civic Taking into account the opinions and perspectives of both indigenous and non indigenous experts on topics ranging from prostitution to constitutional law the book surveys how several ASEAN nations as well as Canada Australia and New Zealand are confronting social economic and legal change In the first three parts chapters are grouped along general sectoral lines to cover economic civic and behavioural themes while in the fourth cross sectoral contexts are addressed With the introduction and concluding chapter the editors provide an overall integrating framework as well as provocative insights into trends in legal development in the Asia Pacific region and on comparative legal research and writing in general Asia Pacific Legal Development is not only an exemplary model for cooperative and comparative legal research and scholarly pluralism but also a rich study of the increasingly relevant issue of convergence and divergence of legal systems with a unique Asian focus

The Global Family Planning Revolution Warren C. Robinson,John A. Ross,2007 The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade From the 1950s to the 1970s scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications Private educational and philanthropic organizations government and international organizations joined in the struggle to reduce fertility Three decades later this movement has seen changes beyond anyone s most optimistic dreams and global demographic stabilization is expected in this century The Global Family Planning Revolution preserves the remarkable record of this success Its editors and authors offer more than a historical record They discuss important lessons for current and future initiatives of the international community Some programs succeeded while others initially failed and the analyses provide valuable guidance for emerging health related policy objectives and responses to global challenges

A City in Blue and Green Peter G. Rowe,Limin Hee,2019-08-30 This open access book highlights Singapore s development into a city in which water and greenery along with associated environmental technical social and political aspects have been harnessed and cultivated into a liveable sustainable way of life It is also a

story about a unique and thoroughgoing approach to large scale and potentially transferable water sustainability within largely urbanized circumstances which can be achieved along with complementary roles of environmental conservation ecology public open space management and the greening of buildings together with infrastructural improvements

Governance, Politics and the Environment Maria Francesch-Huidobro, 2008-07-09 In the past two decades research on environmental issues in East and Southeast Asian countries has mainly focused on existing institutional mechanisms of environmental management the establishment of new environmental management structures the introduction of incentives to improve natural capital and foster environmental protection and the culture of environmental or green groups Virtually no rigorous research has been directed into the nature and significance of the existing relationship between government and civil society in individual country studies with specific reference to the environmental policy sector or into how this relationship may be evolving This book explores this connection in Singapore and what causes it to evolve through three case narratives Its rationale is to address this gap in the literature from a governance theory perspective that focuses on state adaptation to the external environment and new forms of coordination and collaboration between government and civil society to tackle new societal problems The application of the governance theory approach to specific case studies is itself a topic that deserves much greater study than what it has so far received

Human Settlement Development - Volume I Saskia Sassen, 2009-09-30 Human Settlement Development is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on Human Settlement Development deals in nine parts and four volumes with a myriad of issues of great relevance to our world such as Urban Sustainability and the Regional City System in the Asia Pacific Peri Urbanization Zones of Rural Urban Transition Urban Sustainability Theoretical Perspectives on Integrating Economic Development and the Environment Rural Sustainability Using Foreign Direct Investment to Improve Urban Environmental Infrastructure and Services The Case of Hanoi Vietnam The Long Road Towards Sustainable Cities The Dutch case Urban Dimensions of Sustainable Development Rural Development Participation and Diversity for Sustainability The Cities the State and the Markets In Search of Sustainability These four volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Corporate Social Responsibility in the Promotion of Social Development Manuel E. Contreras C., 2004 *Environmental Management Concepts and Practices for the Hospitality Industry* Ishmael Mensah, 2019-07-31 Environmental management is essential to the successful operation of the hospitality businesses This book simplifies the complex issue of environmental management for both students of hospitality and industry practitioners such as hotel managers and restaurateurs The study explains how global environmental problems affect the hospitality industry and vice versa It also outlines the processes that should be followed in environmental management and the specific environmental

management practices of hospitality businesses in the areas of waste management energy and water conservation The book provides practical illustrations review questions and lists of keywords and concepts in each chapter It provides a global perspective on the study of environmental management in the hospitality industry by drawing on success stories and previous research on the topic from across the globe *International Environmental Laws Controlling Transboundary Atmospheric Pollution in Southeast Asia - Rajawali Pers* Dr. Sukanda Husin, S.H., LL.M.,2023-07-07 The issue of global warming and global climate change as mainly caused by transboundary air pollutants has emerged since the middle of the 1970 s To some extent the impacts of global warming and global climate change are still considered uncertain by a great many nations However several environmental catastrophes have been proved highly related to the release of certain noxious emissions creating global warming and global climate change Global warming is presently one of the most threatening environmental issues facing the world Although the uncertainty of the issue is still high the United Nations Organization based on precautionary principle concluded the 1985 Vienna Convention for the Protection of the Ozone Layer hereinafter cited as the Ozone Convention the 1987 Montreal Protocol on Substances that Deplete the Ozone Layer and the United Nations Framework Convention on Climate Change in 1992 ASEAN has not done much to implement the Ozone Convention and the Climate Change Convention in the region ASEAN tended to pass soft laws rather than hard laws to deal with transboundary atmospheric pollution especially resulting from land and forest fires The book is therefore necessary to examine a specific regional environmental policies and laws dealing with global warming and climate change in Southeast Asia ASEAN the Association of Southeast Asian Nations as a fairly big regional cooperation with a great many environmental problems is chosen as examples on how a region implements international treaties coping with the issues of global warming and climate change and on what prospects a region might have in tackling the issues **Energy, Governance and Sustainability** Jordi Jaria i Manzano,Nathalie Chalifour,Louis J. Kotzé,2016-05-27 In summary the book provides an interesting mix of energy topics and perspectives that appears somewhat eclectic at first glance the book is a very useful and scholarly addition to the literature on energy governance and is recommended reading for all those who need to be better informed on the challenges and some of the solutions available at the current time David Grinlinton Journal of Energy Natural Resources Law This timely book makes an original and in depth contribution to the debate about how to transform our energy governance systems into ones that support a fair safe and sustainable society It combines perspectives from leading scholars to provide a global outlook on alternative approaches to energy governance and innovative experiences Taken as a whole it offers a unique overview of some of the innovative and novel ways in which law can support the shift to sustainable and equitable energy systems The first section lays the conceptual and theoretical foundations for alternative approaches to energy governance including its constitutional foundations the role of human rights and an environmentally just system that seeks universal access to energy for all The second section showcases concrete innovative experiences in

energy governance from around the globe including smart cities the role of the courts energy efficiency of buildings and the harnessing of energy from waste Finally the authors consider the social justice dimension discussing the exploitation of energy resources by multinational companies in developing countries and the importance of agricultural production distribution and consumption in energy transformation This unique overview of state of the art approaches to transformation of energy governance is vital reading for policy makers and both legal and non legal scholars concerned with energy law sustainability and justice and global governance Contributors K Bosselmann J Bowie N Chalifour E Daly T Daya Winterbottom C Derani A Guerry J Jaria I Manzano L Kotz E Le Gal L Lin Heng M Low J R May E C Okonkwo R L Ottinger C Pappalardo T Parejo Navajas M P Samonte Solis M K Scanlan J Wentz
