Environment Security And U N Reform:

Environment, Security and UN Reform M. Imber, 1994-08-04 This book presents a study of international relations theory and the role of the United Nations in international environmental negotiations The book links discussion of three issues the persistence of third world debt the environmental abuse of the global commons and the financial and institutional crises within the UN system It includes a summary of both the achievements and limitations of the 1992 Rio Summit UNCED and concludes with far reaching proposals for the restructuring of UN activities

The Meaning of Environmental Security Jon Barnett, 2001 This book is a comprehensive critical discussion of the new idea of environmental security Jon Barnett looks at links between environmental degradation and national security But the meaning of the concept is ambiguous and an examination of its various interpretations and applications reveals much about the state of global environmental politics Barnett argues that environmental security is ultimately driven more by the power of security makers than by the need to address environmental problems By systematically uncovering the deficiencies of existing discourses he develops an alternative critical Green approach with practical implications

Environment, Security, and UN Reform Mark Imber, 1994-01-01 *Reforming International Environmental Governance* W. Bradnee Chambers, Jessica F. Green, 2005 The World Summit on Sustainable Development in Johannesburg in 2002 underscored the need to reform the current institutional framework for environmental governance Chambers and Green both affiliated with the United Nations University Institute of Advanced Studies in Japan gather contributors to take up the question left unanswered at Johannesburg

United Nations Reform and the New Collective Security Peter G. Danchin, Horst Fischer, 2010-01-28 In 2004 the Report of the Secretary General's High Level Panel on Threats Challenges and Change emphasised the linkages between economic development security and human rights and the imperative in the twenty first century of collective action and cooperation between States In a world deeply divided by differences of power wealth culture and ideology central questions today in international law and organisation are whether reaffirmation of the concept of collective security and a workable consensus on the means of its realisation are possible In addressing these questions this book considers the three key documents in the recent UN reform process the

High Level Panel report the Secretary General's In Larger Freedom report and the 2005 World Summit Outcome document. The chapters examine the responsibilities, commitments, strategies and institutions necessary for collective security to function both in practice and as a normative ideal in international law and relations between state and non-state actors alike.

Environmental Change and Security Project Report, 2002 **Human and Environmental Security** Felix Dodds, Tim Pippard, 2013-06-17. Security has tended to be seen as based on military force yet this illusion is crumbling literally and figuratively before our eyes in the conflict zones of Iraq, Afghanistan and Africa. It is now clear that real human security, defined by the Commission on Human Security as protecting vital freedoms, can only be achieved if the full range of issues that underpin human security, including environmental integrity, are addressed. This ground-breaking book, authored by prominent international decision makers, tackles the global human security problem across the range of core issues including terrorism, nuclear proliferation, access to water, food security, loss of biodiversity and climate change. The authors identify the causes of insecurity, articulate the linkages between the different elements of human security and outline an agenda for engaging stakeholders from across the globe in building the foundations of genuine and lasting human security for all nations and all people. This is powerful, necessary, focused reading in these times of peril, global conflict, mass inequity and rampant environmental degradation.

Reforming the United Nations: New Initiatives and Past Efforts Joachim Müller, This three-volume set describes and brings together 50 key reform proposals originating inside and outside the United Nations. The documentation contained in this publication touches upon all aspects of the United Nations and covers the full spectrum of proposals and initiatives. It is hoped that the information provided will assist those involved in current efforts in reassessing and reshaping the Organization and will serve as a useful reference set for policy makers, researchers and the interested public.

Lee-Anne Broadhead, 2002 Broadhead political science University College of Cape Breton Nova Scotia writes from a deepening concern that the very way environmental issues are thought about and the negotiations that result from their common framing are themselves leading to the further deterioration of the natural environment The author owes her brand of critique to the Frankfurt School especially in terms of its analysis of the Enlightenment notion of nature scientifically knowable and technologically domitable Showing how Enlightenment thought informs international relations Broadhead targets green diplomacy the way that national and international financial bodies counter environmental critique how globalization is sold as inevitable irresistible and beneficial and how international agreements on ozone depletion and climate change fail their stated aims So as not to

end in dialectic negation Broadhead offers positive alternatives to green diplomacy Annotation copyrighted by Book News Inc Portland OR **Ibss: Political Science: 1994** British Library of Political and Economic Science at the London School of Economics,1995-12-08 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences
