

Ecological Imperialism

- ...were able to conquer a powerful empire of 10-12 million people in a few years.

Environment Under Fire Imperialism And The Ecological Crisis In Central America

Andrew Ross, Kristin Ross

Environment Under Fire Imperialism And The Ecological Crisis In Central America:

Environment Under Fire Daniel Faber,1993 **An Environmental History of Latin America** Shawn William Miller,2007-08-27 A narration of the mutually mortal historical contest between humans and nature in Latin America Covering a period that begins with Amerindian civilizations and concludes in the region s present urban agglomerations the work offers an original synthesis of the current scholarship on Latin America s environmental history and argues that tropical nature played a central role in shaping the region s historical development Human attitudes populations and appetites from Aztec cannibalism to more contemporary forms of conspicuous consumption figure prominently in the story However characters such as hookworms whales hurricanes bananas dirt butterflies guano and fungi make more than cameo appearances Recent scholarship has overturned many of our egocentric assumptions about humanity s role in history Seeing Latin America s environmental past from the perspective of many centuries illustrates that human civilizations ancient and modern have been simultaneously more powerful and more vulnerable than previously thought **Challenges and Change in Middle America** Katie Willis,Cathy McIlwaine,2014-09-25 A comprehensive introduction to the important economic social and political processes and development issues in this extremely popular region The Central American nations and those of the Caribbean including Guyana Surinam and French Guiana on the mainland share many historical processes as well as experiencing similar development problems today These include European colonialism structural adjustment small size reliance on primary production influence of the United States and moves towards democratisation While Mexico is obviously a much larger country in area economy and population terms it is included in this volume because of its close ties to the other countries in the region through processes such as trade and migration **Environmental Change and Security Project Report** ,1999 Environmental Sociology Leslie King,Deborah McCarthy Auriffeille,2013-07-29 Environmental Sociology encourages students to use the sociological imagination to explore a broad spectrum of issues facing the environment today The third edition of this reader includes an updated introduction and thirteen new pieces that examine how social dimensions particularly power and inequality interact with environmental issues **Coalitions Across Borders** Joe Bandy,Jackie Smith,2005 Coalitions Across Borders examines aspects of transnational movements that mobilise in protest against the inequities of the neo liberal international order **Justification, Evaluation and Critique in the Study of Organizations** Charlotte Cloutier,Jean-Pascal Gond,Bernard Leca,2017-05-31 This volume explores how mobilizing Boltanski and Th venot s economies of worth framework and its associated concepts of justification evaluation and critique help address questions regarding the premises and dynamics of coordinated action both within and across organizations and by so doing help advance our understanding **Anti-Americanism** Andrew Ross,Kristin Ross,2004-09-17 Ever since George Washington warned against foreign entanglements in his 1796 farewell speech the United States has wrestled with how to act toward other countries Consequently the history of anti Americanism is as long and varied as the history of the United

States In this multidisciplinary collection seventeen leading thinkers provide substance and depth to the recent outburst of fast talk on the topic of anti Americanism by analyzing its history and currency in five key global regions the Middle East Latin America Europe East Asia and the United States The commentary draws from social science as well as the humanities for an in depth study of anti American opinion and sentiment in different cultures The questions raised by these essays force us to explore the new ways America must interact with the world after 9 11 and the war against Iraq Contributors Greg Grandin Mary Louise Pratt Ana Maria Dopico George Yudice Timothy Mitchell Ella Shohat Mary Nolan Patrick Deer Vangelis Calotychos Harry Harootunian Hyun Ok Park Rebecca E Karl Moss Roberts Linda Gordon and John Kuo Wei Tchen

Capitalizing on Catastrophe Nandini Gunewardena, Mark Schuller, 2008-02-25 In Capitalizing on Catastrophe an international group of scholars and professionals critically examine how local communities around the world have prepared for and responded to recent cataclysms The book s principal focus is the increasing trend to rely on the private sector to deal with natural disasters and other forms of large scale devastation from hurricanes and tsunamis to civil wars and industrial accidents Called disaster capitalism by its critics the tendency to contract private interests to solve massive urgent public problems may be inevitable but is extremely problematic_ especially with respect to peoples who need help the most Can private relief groups give the highest priority to potential and actual victims of large disasters for example if that means devoting fewer resources to protecting tourism and other profitable industries The high profile contributors to this volume straightforwardly tackle such timely and difficult questions of great public concern *Sustainable Agriculture in Central America* R. Ruben, 1997-07-14 Agricultural development in Central America is based on extensive growth supported by macroeconomic policies that marginalize small peasants Deforestation erosion and resource depletion are particularly severe This book offers a comprehensive review of the perspectives for state policies and local action to enhance sustainable agriculture Macroeconomic conditions and institutional arrangements for the establishment of sustainable production systems in different eco regional settings hillsides humid tropics frontier areas are discussed as well as policy instruments to improve property rights management rules and financial mechanisms to enhance sustainable resource use **Tropical Rainforests** Susan E. Place, 2001-05 Presents an overview of the nature of rainforests and discusses the causes and consequences of deforestation in Latin America s rainforests as well as alternative approaches to development

Liberation Ecologies Richard Peet, Michael Watts, 2004-08-02 Liberation Ecologies elaborates a political economic explanation of environmental crisis drawing from the most recent advances in social theory **Environment, Inequality and Collective Action** Marcello Basili, Maurizio Franzini, Alessandro Vercelli, 2006 The Siena Summer School hosts lectures by distinguished scholars and offers a clear account of alternative research paths This latest addition to the series identifies and addresses key issues surrounding the inequality environment relationship **Encompassing Gender** Mary M. Lay, Janice J. Monk, Deborah Rosenfelt, 2002 From Beijing to Seattle women s movements within academe and in local global

communities are growing at an unprecedented rate raising pointed questions about paradigms of Western feminism development global trade and scholarship Despite this growing visibility the perspectives of far too many women especially from the Global South are still excluded from mainstream U S scholarship Presented with the task of preparing students for life in this new and rapidly shrinking world many scholars have found themselves overwhelmed by the need to cross disciplinary and geographic borders But some faculty are leading the way often in defiance of academic traditions and prejudices to a curriculum that reflects consequences of globalization Encompassing Gender is the long awaited anthology of more than 40 essays by 60 scholars many of them working in curriculum transformation groups that cut across the humanities the sciences and the social sciences all of them committed to an interdisciplinary approach to internationalizing the curriculum

Ecocriticism of the Global South Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2015-03-24 The vast majority of existing ecocritical studies even those which espouse the postcolonial ecocritical perspective operate within a first world sensibility speaking on behalf of subalternized human communities and degraded landscapes without actually eliciting the voices of the impacted communities Ecocriticism of the Global South seeks to allow scholars from or intimately familiar with underrepresented regions to write back to the world's centers of political and military and economic power expressing views of the intersections of nature and culture from the perspective of developing countries This approach highlights what activist and writer Vandana Shiva has described as the relationship between ecology and the politics of survival showing both commonalities and local idiosyncrasies by juxtaposing such countries as China and Northern Ireland New Zealand and Cameroon Much like Ecoambiguity Community and Development this new book is devoted to representing diverse and innovative ecocritical voices from throughout the world particularly from developing nations The two volumes complement each other by pointing out the need for further cultivation of the environmental humanities in regions of the world that are essentially the front line of the human struggle to invent sustainable and just civilizations on an imperiled planet

Environmental Justice and Soy Agribusiness Robert Hafner, 2018-04-17 Environmental justice research and activism predominantly focus on openly conflictive situations claims making is central However situations of injustice can still occur even if there is no overt conflict Environmental Justice and Soy Agribusiness fills this gap by applying an environmental justice incommensurabilities framework to reveal the mechanisms of why conflicts do not arise in particular situations even though they fall within classic environmental justice schemes Empirically the case study focus is on the remote soy frontier in Northwest Argentina particularly the town of Las Lajitas as the nucleus of soy production This represents an excellent example of the recent expansion of the soy agribusiness industry in Latin America First a classic environmental justice analysis is carried out Second and drawing on the epistemological works of Ludwik Fleck an alternative analytical framework is proposed visualising locals thought styles on change effects and potential conflict in relation to soy agribusiness Here visceral elements and the application of a jazz methodology are vital for a more holistic form of multisensory cognition Third

incommensurabilities among the classic and alternative approach are uncovered arguing for the importance of temporal and spatial contexts in environmental justice research **Encyclopedia of Consumption and Waste** Carl A. Zimring, William L. Rathje, 2012-02-29 These volumes convey what daily life is like in the Middle East Asia and Africa Entries will aid readers in understanding the importance of cultural sociology to appreciate the effects of cultural forces around the world **Life and Death Matters** Barbara Rose Johnston, 2016-06-03 The first edition of Life and Death Matters was a breakthrough text centralizing the experiences of those on the front lines of environmental crises and forging new paradigms for understanding how crises emerge and how different groups of actors respond to them This second edition fully updated with both expanded and new chapters once again provides a benchmark for the field and opens important pathways for further research Authors reassess the state of scholarship and grassroots activism in a new century when social and environmental systems are being reconceptualised within post 9 11 security and biosecurity frameworks when global warming and resource scarcity are not fears but realities when global power and politics are being realigned and when ecocide ethnocide and genocide are daily tragedies This bold new edition of Life and Death Matters will be a widely used textbook and essential reading for students scholars and policy makers Radical Ecology Carolyn Merchant, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **The Geopolitics Reader** Simon Dalby, Paul Routledge, Gearóid Ó Tuathail, 2003-08 The Geopolitics Reader offers an interdisciplinary sourcebook of the most important political geographical historical and sociological readings of geopolitics in the late twentieth century The Reader is divided into five parts which draw on the most illuminating examples of imperial Cold War contemporary geopolitics new environmental themes and multiple resistances to the practices of geopolitics The editors provide comprehensive introductions and critical comment at the beginning of each part and visual geopolitical texts in the form of political cartoons are integrated throughout Encouraging exploration of divergent viewpoints of global conflict and change this invaluable compendium includes readings by Martin Luther King Vaclav Havel and George Bush
