*Environment, Participation, Cultural Structures* Barbara Radice, 1976      *Decadent Aesthetics and the Acrobat in French Fin de siècle* Jennifer Forrest, 2019-08-28 In his discussion of clowns in nineteenth century French painting from Jean-Léon Gérôme's 1857 *La Sortie du bal masqué* to Georges Rouault art historian Francis Haskell wondered why they are so sad The myth of the sad clown as an allegory for the unappreciated artist found echoes in the work of literary counterparts like Charles Baudelaire and his *Vieux saltimbanque* who seeks in vain a responsive public For some the attraction of the acrobatic clown for the creative imagination may have been his ability to embody the plight of the artist these artistes generally led an ambulatory and uncertain existence Other artists and writers however particularly the Decadents perceived in the circus acrobat including the acrobatic clown a conceptual and performative tool for liberating their points of view from the prison house of aesthetic convention If authors protagonists were themselves sometimes failures their aesthetic innovations often produced exhilarating artistic triumphs Among the works examined in this study are the circus posters of Jules Chéret Thomas Couture's *Pierrot* and *Harlequin* paintings Honor Daumier's *saltimbanque* paintings Edgar Degas's *Miss Lala au Cirque Fernando* Edouard Manet's *Un bar aux Folies Bergères* the pantomimes of the Hanlon Lees troupe and novels short stories and poems by Théodore de Banville Edmond de Goncourt J.K. Huysmans Gustave Kahn Jules Laforgue Catulle Mendès Octave Mirbeau Jean Richepin Edouard Rod and Marcel Schwob      Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic *A Critical History of Modern Architecture* is certain to influence any future debate on the evolution of modern architecture *Studies in Tectonic Culture* is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German

and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press      **Food Safety Culture** Frank Yiannas, 2008-12-10 Food safety awareness is at an all time high new and emerging threats to the food supply are being recognized and consumers are eating more and more meals prepared outside of the home Accordingly retail and foodservice establishments as well as food producers at all levels of the food production chain have a growing responsibility to ensure that proper food safety and sanitation practices are followed thereby safeguarding the health of their guests and customers Achieving food safety success in this changing environment requires going beyond traditional training testing and inspectional approaches to managing risks It requires a better understanding of organizational culture and the human dimensions of food safety To improve the food safety performance of a retail or foodservice establishment an organization with thousands of employees or a local community you must change the way people do things You must change their behavior In fact simply put food safety equals behavior When viewed from these lenses one of the most common contributing causes of food borne disease is unsafe behavior such as improper hand washing cross contamination or undercooking food Thus to improve food safety we need to better integrate food science with behavioral science and use a systems based approach to managing food safety risk The importance of organizational culture human behavior and systems thinking is well documented in the occupational safety and health fields However significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety      **Merleau-Ponty and Environmental Philosophy** Suzanne L. Cataldi, William S. Hamrick, 2007-04-24 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau Ponty to environmental issues and builds a coherent philosophical ecology based on his thought The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau Ponty s work his concept of the bond between humanity and nature and his novel philosophies of perception embodiment and wild Being Eco phenomenologies of living places such as Central Park in New York City Midwestern farmlands and communal household dwellings of Pacific Northwest Coast people are closely examined The contributors also explore Merleau Ponty s philosophy for environmental ethics and develop notions such as vital values somatic empathy and interspecies sociality      Green Chemistry for Greener

**A Cultural History of Comedy in the Early Modern Age** Andrew McConnell Stott, 2021-12-30 Drawing together scholars with a wide range of expertise across the early modern period this volume explores the rich field of early modern comedy in all its variety It argues that early modern comedy was shaped by a series of cultural transformations that included the emergence of the entertainment industry the rise of the professional comedian

extended commentaries on the nature of comedy and laughter and the development of printed jestbooks. It was the prime site from which to satirize a rapidly changing world and explore the formation of new social relations around questions of gender, authority, identity and commerce amongst others. Yet even as it reacted to the novel and the new comedy also served as a receptacle for the celebration of older social rituals such as May games and seasonal festivities. The result was a complex and contested mix of texts, performances and concepts providing a deep tradition that abides to this day. Each chapter takes a different theme as its focus: form, theory, praxis, identities, the body, politics and power, laughter and ethics. These eight different approaches to early modern comedy add up to an extensive synoptic coverage of the subject. **Cyber Security**

**Culture** Peter Trim, David Upton, 2016-05-13. Focusing on countermeasures against orchestrated cyber attacks, *Cyber Security Culture* is research based and reinforced with insights from experts who do not normally release information into the public arena. It will enable managers of organizations across different industrial sectors and government agencies to better understand how organizational learning and training can be utilized to develop a culture that ultimately protects an organization from attacks. Peter Trim and David Upton believe that the speed and complexity of cyber attacks demand a different approach to security management including scenario based planning and training to supplement security policies and technical protection systems. The authors provide in depth understanding of how organizational learning can produce cultural change, addressing the behaviour of individuals as well as machines. They provide information to help managers form policy to prevent cyber intrusions, to put robust security systems and procedures in place and to arrange appropriate training interventions such as table top exercises. Guidance embracing current and future threats and addressing issues such as social engineering is included. Although the work is embedded in a theoretical framework, non technical staff will find the book of practical use because it renders highly technical subjects accessible and links firmly with areas beyond ICT such as human resource management in relation to bridging the education training divide and allowing organizational learning to be embraced. This book will interest Government officials, policy advisors, law enforcement officers and senior managers within companies as well as academics and students in a range of disciplines including management and computer science.

*Looking West?* Hilary Pilkington, 2002. Russian youth culture has been a subject of great interest to researchers since 1991 but most studies to date have failed to consider the global context. *Looking West* engages theories of cultural globalization to chart how post Soviet Russia's opening up to the West has been reflected in the cultural practices of its young people. Visitors to Russia's cities often interpret the presence of designer clothes shops, Internet cafés and a vibrant club scene as evidence of the Westernization of Russian youth. As *Looking West* shows, however, the younger generation has adopted a pick and mix strategy with regard to Western cultural commodities that reflects a receptiveness to the global alongside a precious guarding of the local. The authors show us how young people perceive Russia to be positioned in current global flows of cultural exchange, what their sense of Russia's place in the new global order is and how they manage to live
