Environment And Cultural Behavior Ecological Studies In Cultural Anthropology:

Environment and cultural behavior Andrew Peter Vayda, 1982 **Environment and Cultural Behavior** American Museum of Natural History, 1969 This anthology deals with human ecology the relationship between man and his environment In it the editor brings together the most exciting new studies by anthropologists to have been written in the past few years some of which appear here for the first time From second millennium agriculture to twentieth century air pollution this volume includes a unique variety of studies of man and the world around him Back cover **Environmental and Cultural Behavior : Ecological Studies in Cultural Anthropology** , 1969 *Environment and Culture* Irwin Altman, Joachim F. Wohlwill, 1980-04-30 Following upon the first two volumes in this series which dealt with a broad spectrum of topics in the environment and behavior field ranging from theoretical to applied and including disciplinary interdisciplinary and professionally oriented approaches we have chosen to devote subsequent volumes to more specifically defined topics Thus Volume Three dealt with Children and the Environment seen from the combined perspective of researchers in environmental and developmental psychology The present volume has a similarly topical coverage dealing with the complex set of relationships between culture and the physical environment It is broad and necessarily eclectic with respect to content theory methodology and epistemological stance and the contributors to it represent a wide variety of fields and disciplines including psychology geography anthropology economics and environmental design We were fortunate to enlist the collaboration of Amos Rapoport in the organization and editing of this volume as he brings to this task a particularly pertinent perspective that combines anthropology and architecture Volume Five of the series presently in preparation will cover the subject of behavioral science aspects of transportation Irwin Altman Joachim F Wohlwill ix Contents Introduction 1 CHAPTER 1 CROSS CULTURAL ASPECTS OF ENVIRONMENTAL DESIGN AMOS RAPOPORT Introduction 7 Culture 9 Environmental Design 10 The Relationship of Culture and Environmental Design 15 The Variability of Culture Environment Relations 19 Culture Specific Environments 26 Designing for Culture 30 Implications for the Future 39 References 42 CHAPTER 2 CROSS CULTURAL RESEARCH METHODS STRATEGIES PROBLEMS APPLICATIONS RICHARD W Strategies for Survival Michael A. Jochim, 2013-09-11 *Strategies for Survival* Cultural Behavior in an Ecological Context focuses on the ecological relationships between cultural behavior and its environmental context The proliferation of ecological studies within anthropology suggests the increasing emphasis given to the systemic context of behavior The aim of this book is to develop a framework for examining these relationships and for comparing diverse ecological studies within a coherent conceptual structure It seeks to include any aspect of behavior to investigate the links between ideological and material factors to broaden the view of relevant factors and possible assumptions and to relate the processes of decision making to their specific context in a manner allowing cross cultural comparisons In the process certain popular forms of ecological explanation will be examined In addition specific behavioral examples will be investigated in an

attempt to explain patterns of similarities and differences This book is addressed to all individuals interested in human environmental interactions including professional anthropologists and general students of human behavior *World Military History Bibliography* Barton Hacker, 2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1 general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical Cultures of Energy Sarah Strauss, Stephanie Rupp, Thomas Love, 2013 This path breaking volume explores cultures of energy the underlying but under appreciated dimensions of both crisis and innovation in resource use around the globe Theoretical chapters situate pressing energy issues in larger conceptual frames and ethnographic case studies reveal energy as it is imagined used and contested in a variety of cultural contexts Contributors address issues including the connection between resource flows and social relationships in energy systems cultural transformation and notions of progress and collapse the blurring of technology and magic social tensions that accompany energy contraction and sociocultural changes required in affluent societies to reduce dependence on fossil fuels Each of five thematic sections concludes with an integrative and provocative conversation among the authors The volume is an ideal tool for teaching unique contemporary and comparative perspectives on social theories of science and technology in undergraduate and graduate courses **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1969 First multi year cumulation covers six years 1965 70 The Oxford Handbook of Public Heritage Theory and Practice Angela M. Labrador, Neil Asher Silberman, 2018-07-11 The field of cultural heritage is no longer solely dependent on the expertise of art and architectural historians archaeologists conservators curators and site and museum administrators It has dramatically expanded across disciplinary boundaries and social contexts with even the basic definition of what constitutes cultural heritage being widened far beyond the traditional categories of architecture artifacts archives and art Heritage now includes vernacular architecture intangible cultural practices knowledge and language performances and rituals as well as cultural landscapes Heritage has also become increasingly entangled with the broader social political and economic contexts in which heritage is created managed transmitted protected or even destroyed Heritage protection now encompasses a growing set of methodological approaches whose objectives are not necessarily focused upon the maintenance of material fabric which has traditionally been cultural heritage s primary concern The Oxford Handbook of Public Heritage Theory and Practice charts some of the major sites of convergence between the humanities and the social

sciences where new disciplinary perspectives are being brought to bear on heritage. These convergences have the potential to provide the interdisciplinary expertise needed not only to critique but also to achieve the intertwined intellectual, political, and socioeconomic goals of cultural heritage in the twenty-first century. This volume highlights the potential contributions of development studies, political science, anthropology, management studies, human geography, ecology, psychology, sociology, cognitive studies, and education to heritage studies.

Structure and Cognition in Art Dorothy K. Washburn, 1983-07-21
The essays in this 1983 volume present an innovative and unified approach to the archaeological analysis and interpretation of art and design.

Arctic Adaptations Igor Krupnik, 2014-05-20
The common view of indigenous Arctic cultures even among scholarly observers has long been one of communities continually in ecological harmony with their natural environment. In *Arctic Adaptations*, Igor Krupnik dismisses the textbook notion of traditional societies as static. Using information from years of field research, interviews with native Siberians, and archaeological site visits, Krupnik demonstrates that these societies are characterized not by stability but by dynamism and significant evolutionary breaks. Their apparent state of ecological harmony is in fact a conscious survival strategy resulting from a prolonged and therefore successful process of human adaptation in one of the most extreme inhabited environments in the world. As their physical and cultural environment has changed, fluctuating reindeer and caribou herds, unpredictable weather patterns, introduction of firearms, and better seacraft, Arctic communities have adapted by developing distinctive subsistence practices, social structures, and ethics regarding utilization of natural resources. Krupnik's pioneering work represents a dynamic marriage of ethnography and ecology and makes accessible to Western scholars crucial findings and archival data previously unavailable because of political and language barriers.

The Mattassee Lake Sites, 1982 *Parmana* Anna Curtenius Roosevelt, 2014-05-10
Parmana: Prehistoric Maize and Manioc Subsistence along the Amazon and Orinoco argues for a reinterpretation of prehistoric subsistence in the Greater Amazonian region of South America. Based on the preliminary results of an archaeological fieldwork in Parmana of the Orinoco basin, Venezuela, the book re-evaluates some of the assumptions made by anthropologists about human adaptation and the development of aboriginal culture in Amazonia. Comprised of six chapters, this volume begins with a review of the theories of five scholars of aboriginal Amazonia in terms of logic and documentation: Julian Steward, Betty Meggers, Robert Carneiro, Donald Lathrap, and Daniel Gross. The next chapter presents an alternative theory, the hypothesis of technological change, and explains its theoretical framework. The demographic theory of cultural evolution is discussed, and its basis in general evolutionary theory is explained. Subsequent chapters focus on the empirical evidence for the hypothesis in studies of tropical resources, with emphasis on the productivity of tropical lowland soils and Amazonian faunal resources, as well as the roles of maize and manioc in prehistoric Amazonian subsistence, the physical and biological characteristics of the Parmana region as an environment for prehistoric human adaptation, and the history of subsistence and population growth in prehistoric Parmana. The final chapter suggests possible directions for future research.

on the development of aboriginal culture in Amazonia The book is illustrated with numerous maps tables and photographs most of them never published before This monograph should be of interest to archaeologists and anthropologists

The Savannah River Chiefdoms David G. Anderson,1994-11-30 This volume explores political change in chiefdoms specifically how complex chiefdoms emerge and collapse and how this process called cycling can be examined using archaeological ethnohistoric paleoclimatic paleosubsistence and physical anthropological data The focus for the research is the prehistoric and initial contact era Mississippian chiefdoms of the Southeastern United States specifically the societies occupying the Savannah River basin from ca A D 1000 to 1600 This regional focus and the multidisciplinary nature of the investigation provide a solid introduction to the Southeastern Mississippian archaeological record and the study of cultural evolution in general

Time Resources, Society and Ecology Tommy Carlstein,2019-09-18 Originally published in 1982 Time Resources Society and Ecology examines and seeks to examine the time dimension in terms of the ecology technology social organization and spatial structure of the human habitat Approaches to time resources sociological time budget studies anthropological activity analysis and economic analysis of money allocation have been limited by their sectoral scope or their failure to relate effectively to the processes of social interaction technological change and environmental structure In this book the book s articulation of time resources is developed in a general theoretical framework of action and interaction in time and space The book examines constraints and possibilities facing preindustrial societies and throws light on the impact of technology on modern societies Basic models of time allocation are presented and finally a cross cultural comparison is made of the mobilization of time resources in preindustrial societies Geographers social anthropologists and human ecologists should find this work directly relevant to their interest in understanding the interactions between man and environment

Energy and the Wealth of Nations Charles A. S. Hall, Kent A. Klitgaard, 2011-10-27 For the past 150 years economics has been treated as a social science in which economies are modeled as a circular flow of income between producers and consumers In this perpetual motion of interactions between firms that produce and households that consume little or no accounting is given of the flow of energy and materials from the environment and back again In the standard economic model energy and matter are completely recycled in these transactions and economic activity is seemingly exempt from the Second Law of Thermodynamics As we enter the second half of the age of oil and as energy supplies and the environmental impacts of energy production and consumption become major issues on the world stage this exemption appears illusory at best In *Energy and the Wealth of Nations* concepts such as energy return on investment EROI provide powerful insights into the real balance sheets that drive our petroleum economy Hall and Klitgaard explore the relation between energy and the wealth explosion of the 20th century the failure of markets to recognize or efficiently allocate diminishing resources the economic consequences of peak oil the EROI for finding and exploiting new oil fields and whether alternative energy technologies such as wind and solar power meet the minimum EROI requirements needed to run our society as we know it This book is an essential read for all scientists and economists who have recognized the urgent need for a more scientific unified approach to economics in an energy constrained world and serves as an ideal teaching text for the growing number of courses such as the authors own on the role of energy in society
