Making Development More Sustainable Mohan Munasinghe, 2007 China's Economic Footprint In South And Southeast Asia: A Futuristic Perspective - Case Studies Of Pakistan, Sri Lanka, Myanmar And Thailand Reena Marwah, Sanika Sulochani Ramanayake, 2021-09-17 The labyrinthine BRI projects aimed at realizing win win benefits have created new challenges for the host countries Economic aspirations must be shielded and protected by security umbrellas thus making these countries partners of the China dominated security architecture Nowhere is this more evident than in the countries of Sri Lanka and Pakistan Despite Southeast Asian nations being viewed as within the ambit of China s historical sphere of influence Myanmar and Thailand provide experiences different from their neighbours This book analyzes China as an economic juggernaut undergirded by global ambitions expanding its economic footprint across South and Southeast Asia through trade technological supremacy and territorial acquisitions The authors also navigate China s policies at home and abroad providing a futuristic perspective on China s path to victory The book provides answers to compelling questions as Challenges and Changes at the Dawn of the New Millennium 2000-2001 , 2001 *Annual Report for ...* Asian Development Bank, 1967 **Environmental Finance Financing Water and Environment Infrastructure The Case of Eastern Europe, the Caucasus and Central Asia** OECD, 2006-02-13 This report explains the environmental challenges faced in Eastern Europe the Caucasus and Central Asia and assesses the financial tools and resources available to tackle them Journal of Economic Literature , 2001 *Strengthening the Economic Analysis of Natural Resource Management Projects* Keith Ward, 2003 A review of a range of natural resources projects prepared during the 1990s by the Asian Development Bank ADB suggests that existing practices of economic analysis tend to capture only some of the impacts that such projects typically have Historically project analysis at ADB and elsewhere has tended to concentrate on identifying a monetized benefit in excess of 12 percent economic internal rate of return EIRR from direct resource use impacts and simply identifying and describing nonquantifiable impacts With the adoption of the ADB Environment Policy and the growing recognition that it is very often the poorest who suffer most from natural resource depletion and degradation a case is made that more analytic rigor in capturing as many as possible of the resource impacts of such projects is desirable This report therefore suggests some specific techniques to strengthen the economic analysis of natural resources projects including improving the application of the benefits transfer method defining the spatial boundaries of project economic analysis establishing an appropriate accounting stance for the project establishing the project s counterfactual i e without project situation and including the health impacts of such projects The use of appropriate discount rates for sensitivity analysis and for investment decision making are discussed and guidance is given on presenting the results of a project analysis and summarizing the poverty reduction impact of natural resource management projects *The Routledge Handbook of Environmental Economics in Asia* Shunsuke Managi, 2015-02-11 Problems of climate change biodiversity and air pollution are

clearly growing globally but more particularly in Asia because of its economic importance and richness in nature The increasing interest in environmental and resource economics applied in regions of Asia will make this book an outstanding resource to the existing literature particularly in the fields of environmental and resource economics and the integration of applied content in traditional and agricultural development At present there is no single handbook or text on the state of current knowledge in environmental economics in Asia or one which offers a comprehensive guide to students and academics on the subjects of environmental economics research This book will help to fill the gap in the existing literature

Sustainable Energy in Developing Countries Peter Meier, Mohan Munasinghe, 2005 Using a multidisciplinary approach that draws on their in depth experience in the fields of energy environment and economics the authors develop a comprehensive analytical framework They apply their methodology to four detailed studies of Sri Lanka s energy sector illustrating how to address key energy and environmental policy issues found in many developing countries today Supplementary case examples are presented which also draw on many other countries in Asia and Africa The main energy related areas discussed include electric power new and renewable energy sources transport and oil based fuels and greenhouse gas emissions The methodological tools of energy and environmental economics provide a rational basis for identifying policy priorities evaluating them and developing more sustainable energy options The results of the studies are presented in an integrated manner and contribute to the practical resolution of many important public policy issues How to deal with risk and uncertainty and how to identify robust policy options are major themes that run throughout the volume Energy and environmental economists and graduate students interested in an introduction to the analytical methods used in recent World Bank projects on renewable energy and sustainable development will find this book of great value as will decision makers and policy analysts in developing countries **American Book Publishing Record**, 2001 Labor Market Distortions, Rural-Urban Inequality, and the Opening of the People's Republic of China Economy Thomas Hertel, 2008-05 Evaluates the impact of some key factor market reforms on rural urban inequality income distribution using a household disaggregated recursive dynamic computable general equilibrium model of the People s Republic of China It also explores how these factor market reforms interact with product market reforms currently under way as part of the country s World Trade Org WTO accession process The simulation results show that reforms in the rural land rental market hukou system as well as increasing off farm labor mobility would reduce the urban rural income ratio dramatically Furthermore the combination of WTO accession factor market reforms improves both efficiency equality significantly Charts tables graphs
