Environment In Question Ethics And Global Issues:

Environment In Question David E. Cooper, Joy A. Palmer, 2005-08-04 First published in 1992 Routledge is an imprint of Taylor Francis an informa company The Environment in Question David E. Cooper, Joy Palmer, 1992 By addressing specific global problems and placing them within an ethical context The Environment in Question provides the reader with both a theoretical and practical understanding of environmental issues The contributors are internationally known figures drawn from the various disciplines which bear upon these issues such as geography psychology social policy and philosophy The contributions range from those tackling individual concrete issues such as nuclear waste and the threat to the rain forest to those addressing matters of policy principle and attitude such as our obligations to future generations and the nature of technological risk The Environment in Question is designed as a text for students of philosophy environmental science environmental education ecology and teacher education It can be used as an inter disciplinary self contained course book or in conjunction with relevant material In addition as the essays directly and controversially address current environmental debates in a non technical manner it is of great interest both to professionals in those areas and to readers who care about the planet s future The substantial cross section of concerns and approaches will enable all readers to develop the necessary level of understanding required to initiate and sustain debate on environmental issues Contributors Robert Allsion David E Cooper Barry S Gower F G T Holliday C A Hooker Mary Midgley Philip Neal Joy A Palmer Robert Prosser Holmes Rolston III Mark Sagoff Vandana Shiva Stephen Sterling Rosemary J Stevenson Jennifer Trusted Global Environmental Issues Frances Harris, 2012-01-30 Global Environmental Issues second edition builds on the popularity of the first edition viewing global environmental problems as complex issues with a network of causes influenced by a range of actors with differing priorities The book recognises that science underpins much of what happens in society and therefore it is important to be able to interpret the environmental and social consequences of scientific developments In addition to discussing the main biophysical causes the book illustrates how socio economic and political factors determine why and how people use land resources and technology and how this in turn affects natural resource management This edition includes new chapters on the politics of science International environmental regulation and treaties environmental issues in a globalised world and natural resource management Global Environmental Issues second edition is essential reading for upper level undergraduates and Masters students within departments of Environmental Science and Geography Includes case studies from around the world to provide a real life context for the issues tackled in each chapter Considers both the results of human actions and natural environmental change in order to provide balanced in depth debate Includes coverage of contemporary hot topics such as biodiversity globalization and sustainable development Chapters authored by experts in the field Includes new chapters on The politics of science International environmental regulation and treaties Environmental issues in a globalised world and Natural Resource Management Expanded sections include negotiating multilateral

environmental agreements GM crops biofuels and marine and freshwater resources **People and Environment** Gareth Jones, 2014-06-11 *People and Physical Environment A Global Approach* provides an introduction to the main areas of environmental concern for geographers environmental scientists and planners at the beginning of the twenty first century These include Pollution of the atmosphere and its impact on our climate The exploitation of the oceans Management and supply of fresh water Degradation of the land and Biodiversity and the need to maintain genetic diversity The book argues that our knowledge and understanding of the environment is now so great that we can predict with considerable accuracy where the skills of science and technology need to be focussed in order to prevent severe environmental damage from occurring Achieving successful management of the environment has become dependent upon active participation of a society prepared to pay for a high quality of life and the willingness of our elected politicians to legislate and enforce the very highest standards of environmental management This book will be essential reading for students of geography environmental studies science and land use planners and will also contribute valuable information for climatology biogeography hydrology land economy and forestry students *The SAGE Handbook of Tourism Studies* Tazim Jamal, Mike Robinson, 2009-06-18 The strongest overview I have encountered of the scope and the current state of research across all the fields involved in advancing our understanding of tourism For its range of topics depth of analyses and distinction of its contributors nothing is comparable Professor Dean MacCannell University of California Davis The breadth of vision and sweep of accounts is remarkable and range of topics laudable a rare combination of the authoritative the challenging and stimulating Professor Mike Crang Durham University Tourism studies developed as a sub branch of older disciplines in the social sciences such as anthropology sociology and economics and newer applied fields of study in hospitality management civil rights and transport studies This Handbook is a sign of the maturity of the field It provides an essential resource for teachers and students to determine the roots key issues and agenda of tourism studies exploring The evolution and position of tourism studies The relationship of tourism to culture The ecology and economics of tourism Special events and destination management Methodologies of study Tourism and transport Tourism and heritage Tourism and postcolonialism Global tourist business operations Ranging from local to global issues and from questions of management to the ethical dilemmas of tourism this is a comprehensive critically informed constructively organized overview of the field It draws together an inter disciplinary group of contributors who are among the most celebrated names in the field and will be quickly recognized as a landmark in the new and expanding field of tourism studies *The Philosophical Roots of the Ecological Crisis* Joshtrom Isaac Kureethadam, 2018-06-11 *The Philosophical Roots of the Ecological Crisis* Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural

world and the metaphysical dualism between humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences

Tourism Enterprise David Leslie, 2014-11-26 The environmental quality and popularity of any tourist destination is the outcome of sustained development shaped by the socio economic and physical dimensions of the local environment Protecting the living landscape requires recognizing promoting and developing the links between economic social and environmental objectives This book therefore examines the tourism business in terms of greening the local economy people and environment establishing the green agenda and investigating its application to the tourism sector

Environmental Ethics and Forestry Peter C. List, 2000 Since the mid 1970s American forestry has come under increasingly vigorous scrutiny This reader brings together a variety of thinking in environmental ethics and philosophy as it applies to forestry

International Justice and the Third World Robin Attfield, 2005-09-29 International Justice and the Third World vindicates belief in global or universal justice and explores both liberal and Marxist grounds for such belief It also investigates the presuppositions of belief in development and relates it to sustainability to environmentalism and to the obligation to cancel Third World debt

The Dilemma of Sustainability in the Age of Globalization Mohamed El-Kamel Bakari, 2017-09-05 The Dilemma of Sustainability in the Age of Globalization A Quest for a Paradigm of Development offers an exhaustive overview of the different political social economic and cultural circumstances that paved the way for the inception of sustainable development It particularly traces the evolution of this project in an unpropitious context of neo liberal capitalism and globalization By means of an in depth critical comparative analysis of the two phenomena of sustainable development and globalization this book highlights aspects of both their divergence and convergence on issues such as development man nature relationship and society This distinctive approach pinpoints the theoretical and factual aspects of clash and affinity between globalization and sustainability and spotlights some potential harmonization between the two on different levels On the whole this book covers a few gaps in the contemporary literature that heightened the need for analysis of the viability of implementing the project of sustainable development in a context of neoliberal capitalism Given the highly interdisciplinary nature of its topic a holistic approach is utilized throughout this book integrating historical literary economic political and scientific material The first part of this book is largely based on a critical comparative analysis of the two vying paradigms of development by means of a thorough juxtaposition of their theoretical and ideological underpinnings and backed up by lucid examples statistics and case studies In later sections this book provides an analysis and discussion of both the extrinsic and intrinsic obstacles to promoting sustainability in the current socio economic paradigm of development and closes by offering glimpses of hope for the future of humankind by underlining the potential of new initiatives to revive sustainable development in the 21st century

Planning for Tourism Nigel D Morpeth, Hongliang Yan, 2015-05-01 This text provides an innovative approach to the pedagogy of contemporary planning processes within different cultural contexts globally It adopts an innovative multi disciplinary social science approach and through the

inclusion of international case studies considers the extent to which intelligent design has enabled the needs of disabled residents and visitors to have universal access to social spaces and facilities In incorporating the consideration into the fabric of the book it will encourage the mainstreaming of universal design and accessible tourism as keystones of planning processes within the C21st

Nature, Value, Duty Christopher J. Preston, Wayne Ouderkirk, 2006-11-17 Gifford Lecturer and Templeton Prize winner Holmes Rolston III is widely known as the father of environmental ethics His writings range between natural philosophy and theology and include detailed presentations of an interlocking position that includes aesthetics value theory natural resource policy wilderness advocacy and sustainable development *Nature Value and Duty* Life on Earth with Holmes Rolston III is a collection of contemporary writings on the work of Holmes Rolston III The authors contributing to this volume are a mixture of senior scholars in environmental ethics and new voices in philosophy and in literature Together they provide an in depth evaluation of many of the topics discussed by Rolston They probe the strengths and weaknesses of his work and suggest valuable correctives Rolston himself in a detailed reply to each of his critics at the end of the volume reveals where some of these criticisms sting him the most and in the process provides one of the most detailed and articulate defenses of his position ever offered

Elements of African Bioethics in a Western Frame B. Tangwa, 2010-11-01 For millennia Africans have lived on the African continent in close contact with the diversities of nature floral faunal and human and in so doing they have developed cultures values attitudes and perspectives to the problems ethical and otherwise that have arisen from the existential pressures of their situation The problem however is that such values and perspectives do not necessarily form coherent ethical theories Theory making is a second order activity requiring a certain amount of leisure and comfort which the existential conditions of life on the African continent have not easily permitted in the retrospect able past The elements of African bioethics are to be found in its cultural values traditions customs and practices These are research able highlight able and usable by those who would The bioethical problems of our current global existential situation are such that all possible solutions no matter their provenance ought to be tried Western culture has far too loud a voice combined with deaf ears in contemporary ethical discourse But it should never be forgotten that other cultures have their own word to say and that alternative values ways of thinking and practices exist and attempt should always be made to bring these out and to highlight them if they could possibly contribute to the satisfactory solution of a global problem This book brings together various papers on bioethical issues and problems written at different times some previously published each of which attempts to bring out some African elements perspective or concern The African narrative style predominates through these essays but their framing conforms more or less to the Western paradigm for presenting academic issues

Interpreting Nature I. G. Simmons, 2013-01-11 Human society has constructed many varied notions of the environment Scientific information about the environment is often seen as the only worthwhile knowledge This ignores the complexities created by interaction between people and the environment Idealist thinking argues that everything we know is based on a

construct of our minds and that all is possible Can both be correct and true Interpreting Nature explores the position of humanity in the environment from the principle that the models we construct are imperfect and can only be provisional Having examined the way in which the natural sciences have interrogated nature the types of data produced and what they mean to us this looks at the environment within philosophy and ethics the social sciences and the arts and analyses their role in the formation of environmental cognition Environmental Sociology Cristiano Luis Lenzi,2022-07-06 Environmental Sociology Risk and Sustainability in Modernity examines the encounter between sociology and contemporary environmental issues It presents the proposal for an environmental sociology considering the dilemmas surrounding sustainable development ecological modernization and risk society In this book Cristiano Luis Lenzi critically examines these concepts aiming to show how controversial environmental sociology still is The book offers a nuanced interpretation of some of the issues and disputes that arise in the debate over these approaches in the sociological literature **How Nature Matters** Simon P. James,2022 How Nature Matters presents an original theory of nature s value based on part whole relations In so doing it solves the difficult problem of how we should conceptualize nature s cultural values The standard practice of framing them in terms of the provision of cultural ecosystem services is shown to be inadequate When natural things have cultural value they do not have it as service providers that is as means to valuable ends They have it as parts of valuable and meaningful wholes as parts of traditions narratives and cultural identities James develops his theory by investigating twelve real world cases concerning amongst other things the contentious practice of dugong hunting and the religious significance of the site where the Buddha is said to have become enlightened He also analyses some cutting edge policy related topics such as the debate surrounding the concept of relational value and takes a stand on various foundational issues in environmental philosophy including the question of whether anything on earth qualifies as natural This accessible engagingly written book will be essential reading for all those who wish to understand the moral and metaphysical dimensions of environmental issues **Christian Ethics and Contemporary Moral Problems** Michael C. Banner,1999-09-28 This book addresses such key ethical issues as euthanasia the environment biotechnology abortion the family sexual ethics and the distribution of health care resources Michael Banner argues that the task of Christian ethics is to understand the world and humankind in the light of the credal affirmations of the Christian faith and to explicate this understanding in its significance for human action through a critical engagement with the concerns claims and problems of other ethics He illustrates both the distinctiveness of Christian convictions in relation to the above issues and also the critical dialogue with practices based on other convictions which this sense of distinctiveness motivates but does not prevent The book s importance lies in its attempt to show the crucial difference which Christian belief makes to an understanding of these issues whilst at the same time demonstrating some of the weaknesses and confusions of certain popular approaches to them **Just Environments** David Cooper,Joy Palmer,2005-08-18 Can we do what we want with other species How do conflicting international interests affect

global issues What do we owe the next generation Just Environments investigates these questions and the ethics which lie at their core

Happiness Across Cultures Helaine Selin, Gareth Davey, 2012-02-29 Different cultures experience happiness differently Traditionally the West is considered materialistic and happiness is said to come from achievement and acquisition The East is said to be more people oriented where happiness is a result of deep personal interactions Thus poor people can be happier in the East than the West because they are not so concerned with possession and more with society This book considers happiness and quality of life in non Western countries and cultures Its coverage is diverse and spans the breadth of the non Western world revealing unique perspectives of happiness and life quality embedded in rich cultural traditions and histories

History of Environmental Economic Thought Erhun Kula, 1998 This volume presents the ideas of major figures in economics throughout history on key environmental issues such as population growth resource scarcity and environmental contamination Throughout the historical roots of current debates are explored with empirical case studies illustrating the link between theory and practice The final chapters look at current ideas on sustainability and ethical and spiritual dimensions of humanity s relationship with the environment Providing fascinating insight into the development of environmental economic thought this volume will be of great interest to students and researchers in the history of economic thought and environmental economics

Environment In Question Ethics And Global Issues Book Review: Unveiling the Power of Words

In a world driven by information and connectivity, the power of words has become more evident than ever. They have the capability to inspire, provoke, and ignite change. Such may be the essence of the book **Environment In Question Ethics And Global Issues**, a literary masterpiece that delves deep into the significance of words and their effect on our lives. Written by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we shall explore the book's key themes, examine its writing style, and analyze its overall impact on readers.
