The Handbook of Environmental Voluntary Agreements Edoardo

Croci,2005-06-03 Here is a practical reference which provides common methodologies implementation rules and evaluation criteria for researchers policy makers and business operators in the use of environmental voluntary agreements between regulators and polluters The book takes into account the variety of forms and application situations characterizing this environmental policy instrument illustrating methodologies implementation rules and evaluation criteria for researchers policy makers and business operators **Institutional Dynamics in Environmental Governance** Bas Arts,Pieter

Leroy,2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives *A New Agenda for Sustainability* Bo Elling,Erling Jelsøe,2016-03-23 Two

decades after the Brundtland Commission s Report Our Common Future adopted the concept of sustainable development this book provides a renewal of the concept exploring the potential for new practices and fields for those involved in sustainability activity The book addresses a number of themes concerning firstly the provision of a next generation perspective which was a central and still unresolved notion of the original Brundtland definition and secondly the provision of new milestones for policy and research that can expand the discussion on this second generation concept on sustainability The material dealt with in the book offers a wide variety of perspectives on sustainability and reflects the importance of interdisciplinary and transdisciplinary work in the field Suggesting targets for future analytical and political efforts in achieving global sustainability this book offers new analytical opportunities for holistic politics and research at a general and sector level

The Evolution of National Water Regimes in Europe Stefan Kuks,Ingrid Kissling-Näf,2013-06-05 All over the world countries struggle with water stress Problems vary from water scarcity and a degrading water quality to floods and a rising sea level due to climate change The European Union adopted a Water Framework Directive to improve the sustainability of water management in its member states Water management should be coordinated at the level of river basins as a whole Interests of various user groups should be better represented River basin visions should take into account the impact of all human activities on the status of the resource Water legislation needs streamlining and more focus on its implementation The European Union advocates regulating water prices by charging the costs of water services on the basis of full cost recovery and the polluter pays principle This book examines the development of water management in the Netherlands Belgium

France Spain Italy and Switzerland It is based on the European research project EUWARENESS The authors apply a theoretical framework for the analysis of institutional regimes water governance and property rights The evolution of national water resource regimes is described over a period of almost 200 years 1800 2000 The long term perspective enables the reader to see the conditions under which regime transformation and paradigm change are made possible The book also includes a critical analysis of policy making by the European Union and a comparative review and analysis of regime development in the six countries involved This book is followed by another volume published with Kluwer Academic Publishers on Integrated Governance and Water Basin Management edited by Hans Bressers and Stefan Kuks

Governance of Water-Related Conflicts in Agriculture F.M. Brouwer,I. Heinz,T. Zabel,2013-03-14 This book deals with voluntary approaches between farmers and water suppliers as an instrument to meet environmental standards impacted by agricultural activities more economically efficient and environmentally effective than by exclusive application of alternative instruments including command and control approaches The book is based largely on the results of the research project Co operative Agreements in Agriculture as an Instrument to Improve the Economic Efficiency and Economic Effectiveness of the European Water Policy which was supplemented for specific issues by key experts The research was partly funded by the European Commission under the Specific RTD Programme in the Field of Environment and Climate Contract No ENV4 CT98 0782 and partly by the Ministry of Agriculture Nature Management and Fisheries in the Netherlands the Environment Agency in England and Wales the UK Ministry of Agriculture Fisheries and Food and the Government of the German Bundesland North Rhine Westphalia Additional funds for preparing the book were obtained from the Ministry of Agriculture Nature Management and Fisheries in the Netherlands The financial and technical support received from the different organisations is gratefully acknowledged The editors appreciate very much the efforts the authors have made in preparing their contributions for the book and for the secretarial assistance provided by Mrs Tessa van Dongen from LEI who took responsibility for guiding the publication process and preparing the chapters of the book We also appreciate the support given by Mrs Henny Hoogervorst and Mrs Gloria Verhey Kluwer Academic Publishers

educators of higher education librarians researchers and academicians *Integrated Governance and Water Basin Management* Stefan Kuks,Hans Bressers,2012-11-03 This book examines water management integration in the Netherlands Belgium France Spain Italy and Switzerland based on the European research project EUWARENESS Coverage includes 12 country specific case studies examining theory on water governance institutional regimes and property rights resulting in a tool for monitoring the progress of integrated water management at the basin level in EU member states or other countries

Sustainable Development of Denmark in the World, 1970-2020 Bo Fritzboøger,2022-05-24 This book provides a holistic overview of the history of sustainable development in Denmark over the last fifty years covering a host of issues central to the Sustainable Development Goals SDGs ending poverty ensuring inclusive and equitable education reducing inequality making cities and settlements inclusive safe and resilient and fostering responsible production and consumption patterns to name a few It argues for a new framework of sustainability history one that is truly global in outlook As such it explores what truly global sustainable development would look like It considers how economic growth has been the driver for prosperity in the global north and considers whether sustainable development and continued economic growth are irreconcilable and what the future of sustainable development initiatives in Denmark might look like **Technology Policy**

Georg Aichholzer,Gerd Schienstock,2010-09-15 No detailed description available for Technology Policy *Decision Making for Complex Socio-Technical Systems* Thomas Flüeler,2006-03-08 Waste management can be considered as a mirror of society In its our fluctuating definition besides conserving a supply of valuable materials and resources it acts as a fascinating expression for our throw away mentality Waste is inevitable but it nevertheless provides an opportunity a need and an incentive for society to pursue a more careful management of it If this is successfully carried out society may well find it possible to manage itself in an overall more careful and universal way The management or governance of radioactive waste particularly is determined by a complex constellation of individuals social aggregates and institutions A wealth of interconnected parts forms a complex and volatile system that is highly technical and explosively political in nature The problems inherent in this system must be managed so as to reach a safe acceptable responsible feasible and sustainable solution It is a system with an objective long term dimension with a hazard potential of in part hundreds of thousands of years and it has a long term institutional dimension insofar as its implementation must last for decades The very notion of risk extends from the long life of radionuclides over the perception of dread to the decisional risk of whether when and how to implement an agreed upon solution *Sustainable Protein Production and Consumption: Pigs or Peas?* Harry Aiking,Joop de Boer,Johan Vereijken,2006-10-12 Sustainable Protein Production and Consumption Pigs or Peas is a book that presents and explores the PROFETAS programme for development of a more sustainable food system by studying the feasibility of substituting meat with plant based alternatives The emphasis is on improving the food system by reducing the use of energy land and freshwater at the same time limiting the impacts on health and animal welfare associated with intensive livestock

production It is clear that such a new perspective calls not only for advanced environmental and technological research but also for in depth societal research as the acceptance of new food systems is critically contingent on perceptions and attitudes of modern consumers In this unique multidisciplinary setting PROFETAS has opened up pathways for a major transition in protein food production and consumption not by just analyzing the food chain but rather by exploring the entire agricultural system including biomass for energy production and the use of increasingly scarce freshwater resources The study presented here is intended to benefit every stakeholder in the food chain from policymakers to consumers and it offers guiding principles for a transition towards an ecologically and socially sustainable food system from a multi level perspective

Agriculture and Climate Beyond 2015 Floor Brouwer, Bruce A. McCarl, 2006-02-20 Interactions between agriculture climate and patterns of land use are complex Major changes in agriculture and land use patterns are foreseen in the next couple of decades in response to shifts in climate greenhouse gas management initiatives population growth and other forces The book explores key interactions between changes in agriculture patterns of land use and efforts to reduce greenhouse emissions from agriculture The volume is based on inter disciplinary science and policy interactions exploring the way land use may aid in addressing or be affected by the onset of climate change and alterations in food demand Future forces shaping land use decisions are examined and its sensitivity to climate change is highlighted Patterns of land use and the agricultural role in climate change mitigation are explored Also policy and social responses to the new perspectives on future land use patterns are identified The perspective of the book is beyond the year 2015 *Coping with Water Deficiency* Phoebe Koundouri, 2007-11-28 Research results discussed in this book demonstrate that effective water management tools and decision making practices are needed to support interventions to increase availability and manage demand for scarce water supplies Furthermore the book bridges the gap between ideas and actions endorsed in the research oriented environmental debate and their translation into policymaking structures and programs in developed and developing countries

The Impact of Climate Change on Drylands A.J. Dietz, R. Ruben, A. Verhagen, 2006-04-11 Sahelian West Africa has recovered from the disastrous droughts of the 1970s and 1980s People have learned to adapt to risk and uncertainty in fragile dryland environments They as well as global change scientists are worried about the impact of climate change on these West African drylands What do the experiences of the last thirty years say about the preparedness for higher temperatures lower rainfall and even more variability Detailed studies on Dryland West Africa as a whole and on Burkina Faso Mali and Northern Ghana in particular show an advanced coping behaviour and increased adaptation but also major differences in vulnerability and coping potential Climate change preparedness programmes have only just started and require more robust support and more specific social targeting for a population which is rapidly growing even more rapidly urbanising and further integrating in a globalised economy This book is the first of its kind with a comprehensive analysis of climate change experiences in West African drylands with attention for pathways of change and the diversity of adaptation

options available This book is of interest to scientists studying global and climate change especially dealing with issues of adaptation Social scientists economists geographers and policy makers concerned with West Africa should also read this book *New Instruments for Environmental Policy in the EU* Jonathan Golub,1998-06-04 New Instruments for Environmental Policy in the EU provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union The conclusions draw attention to critical aspects of instrument design as well as the difficulty of accommodating national policy diversity without contravening EU and international tr **Journal of Economic Literature** ,2004 **What drives Environmental Innovations in the Nordic Pulp and Paper Industry?** ,2008
