Environmental Archaeology:

Environmental Archaeology Elizabeth Reitz, Myra Shackley, 2012-06-05 One of the most significant developments in archaeology in recent years is the emergence of its environmental branch the study of humans interactions with their natural surroundings over long periods and of organic remains instead of the artifacts and household items generally associated with sites With the current attention paid to human responsibility for environmental change this innovative field is recognized by scientists conservation and heritage managers and policymakers worldwide In this context comes Environmental Archaeology by Elizabeth Reitz and Myra Shackley updating the seminal 1981 text Environmental Archaeology by Myra Shackley Rigorously detailed yet concise and accessible this volume surveys the complex and technical field of environmental archaeology for researchers interested in the causes consequences and potential future impact of environmental change and archaeology Its coverage acknowledges the multiple disciplines involved in the field expanding the possibilities for using environmental data from archaeological sites in enriching related disciplines and improving communication among them Introductory chapters explain the processes involved in the formation of sites introduce research designs and field methods and walk the reader through biological classifications before focusing on the various levels of biotic and abiotic materials found at sites including Sediments and soils Viruses bacteria archaea protists and fungi Bryophytes and vascular plants Wood charcoal stems leaves and roots Spores pollen and other microbotanical remains Arthropods molluscs echinoderms and vertebrates Stable isotopes elements and biomolecules The updated Environmental Archaeology is a major addition to the resource library of archaeologists environmentalists historians researchers policymakers anyone involved in studying managing or preserving historical sites The updated Environmental Archaeology is a major addition to the resource library of archaeologists environmentalists historians researchers policymakers anyone involved in studying managing or preserving historical sites

Environmental Archaeology: Meaning and Purpose Umberto Albarella, 2013-04-17 Despite the fact that the human life of the past cannot be understood without taking into account its ecological relationships environmental studies are often marginalised in archaeology This is the first book that by discussing the meaning and purpose we give to the expression environmental archaeology investigates the reasons for such a problem This is achieved through the use of theoretical considerations and the aid of a number of case studies which by taking us from Anglo Saxon England to pre Columbian Venezuela and from Classical Greece to late Antique Egypt emphasise the potential of an integrated approach The book is written by archaeologists with different backgrounds and is addressed to all researchers who care about the past relationship between people and the rest of Nature Despite the complexity of some of the issues tackled the book is written in an accessible manner and should be of interest to all students who want to understand the essence of archaeology beyond the boundary of the individual sub disciplines

Environmental Archaeology Chris Turney, Matthew Canti, Nick Branch, Peter Clark, 2014-05-12 Environmental Archaeology Theoretical and Practical Approaches outlines and assesses the various methods used to reconstruct and explain the past interaction between people and their environment Emphasising the importance of a highly scientific approach to the subject the book combines geoarchaeological bioarchaeological archaeobotany and zooarchaeology and geochronological information and examines how these various aspects of archaeology may be used to enhance our knowledge and understanding of past human environments Drawing from both the practical experiences of the authors and cutting edge research Environmental Archaeology Theoretical and Practical Approaches is a valuable contribution to the subject It will be essential reading for students and professionals in archaeology geography and anthropology

Environmental Archaeology John G. Evans, Terence Patrick O'Connor, Terry O'Connor (Archaeologist), 1999 This book presents a comprehensive and concise survey of the scientific techniques which are used in archaeology to analyse ancient human environments and to give a fascinating insight into the context of the distant past

Case Studies in Environmental Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics

Environmental Archaeology in Transdanubia Csilla Zatykó, Imola Juhász, P. Sümegi, 2007 An Introduction to Environmental Archaeology John G. Evans, 1978

Environmental Archaeology Evangelia Pişkin, Arkadiusz Marciniak, Marta Bartkowiak, 2018-04-11 This book aims to thoroughly discuss new directions of thinking in the arena of environmental archaeology and test them by presenting new practical applications Recent theoretical and epistemological advancement in the field of archaeology calls for a re definition of the subdiscipline of environmental archaeology and its position within the practise of archaeology New technological and methodological discoveries in hard sciences and computer applications opened fresh ways for interdisciplinary collaborations thus introducing new branches and specialisations that need now to be accommodated and integrated within the previous status quo This edited volume will take the challenge and engage with contemporary international discussions about the role of the discipline within the general framework of

archaeology By drawing upon these debates the contributors to this volume will rethink what environmental archaeology is and what kind of input the investigation of this kind of materiality has to the reconstruction of human history and sociality
