Project Appraisal and Valuation of the Environment P. Abelson, 1996-06-12 The book is a pioneering attempt to see exactly what difference economic valuation of environmental effects would have made to six actual on going development projects if it had been done at the time of appraisal It combines theoretical rigour with applied economic skills presented with robust common sense James Winpenny Overseas Development Institute This book is a practical and readable guide to valuing the environment and the implications for public investment and policy useful for students as well as professional economists policy makers engineers environmental and social planners It describes how the environment can be valued and how these valuation concepts can be applied to investment decisions The book provides first a general introduction to the key issues and concepts considering the nature and magnitude of environmental problems the cost benefit method of evaluation and detailed methods for valuing the environment It then analyses in detail six case studies based on actual or proposed major investment projects by the UK Overseas Development Administration or the World Bank These include water quality in China the supply of electricity in Bangladesh slum improvements in India mass transit in Nigeria forest conservation in Kenya and soil quality in Bolivia Thus the book is expected to be of special interest to professionals and students in developing countries although much of the material has general application in developed as well as in developing countries

The Mekong: A

Socio-legal Approach to River Basin Development Ben Boer, Philip Hirsch, Fleur Johns, Ben Saul, Natalia

Scurrah, 2015-12-22 An international river basin is an ecological system an economic thoroughfare a geographical area a font of life and livelihoods a geopolitical network and often a cultural icon It is also a socio legal phenomenon This book is the first detailed study of an international river basin from a socio legal perspective The Mekong River Basin which sustains approximately 70 million people across Cambodia China Laos Myanmar Thailand and Vietnam provides a prime example of the socio legal complexities of governing a transboundary river and its tributaries The book applies its socio legal analysis to bring a fresh approach to understanding conflicts surrounding water governance in the Mekong River Basin The authors describe the wide range of uses being made of legal doctrine and legal argument in ongoing disputes surrounding hydropower development in the Basin putting to rest lingering caricatures of a single ASEAN way of navigating conflict They call into question some of the common assumptions concerning the relationship between law and development The book also sheds light on important questions concerning the global hybridization or crossover of public and private power and its ramifications for water governance With current debates and looming conflicts over water governance globally and over shared rivers in particular these issues could not be more pressing Economic Analysis of Environmental Impacts John Dixon, Louise Scura, Richard Carpenter, Paul Sherman, 2013-11-05 This revised and updated guide to the environmental economics of development projects demonstrates how the environmental impacts of projects can be translated into monetary values The theoretical bases are examined and the techniques themselves given detailed exposition supported by extensive case studies illustrating a wide range of applications The text should become a useful complement to all standard forms of project analysis The World Bank in a Changing World Ibrahim F.I.
