### **The Oxford Handbook of Stress, Health, and Coping**

Susan Folkman, 2011. Few publications have changed the landscape of contemporary psychology more than Richard Lazarus and Susan Folkman's landmark work *Stress Appraisal and Coping*. Its publication in 1984 set the course for years of research on the dynamic processes of psychological stress and coping in human beings. Now more than a quarter century later, *The Oxford Handbook of Stress, Health, and Coping* pushes the field even further with a comprehensive overview of the newest and best work in this dynamic subject. Edited by Susan Folkman and comprising chapters by the field's leading scientists, this new volume details the expanded knowledge base that has emerged from extensive research on stress and coping processes over the last several decades. Featuring 22 topic-based chapters, including two by Folkman, this volume offers unprecedented coverage of the two primary research topics related to stress and coping: mitigating stress-related harms and sustaining well-being in the face of stress. Both topics are addressed within their relevant contexts, including chronic illness, calamity, bereavement, and social hardship. *The Oxford Handbook of Stress, Health, and Coping* is an essential reference work for students, practitioners, and researchers across the fields of health psychology, medicine, and palliative care.

**Futures in the Built Environment to 2050** Tim Dixon, John Connaughton, Stuart Green, 2018-01-09. Brings together leading thinking on issues of new professional practice and on the future of a sustainable built environment. This book focuses on both construction and development issues and examines how we can transition to a sustainable future by the year 2050, bringing together leading research and practice at building, neighbourhood, and city levels. It deftly analyses how emerging socio-economic, technological, and environmental trends will influence the built environment of the future. The book covers a broad spectrum of interests across the scales of buildings, communities, and cities, including how professional practice will need to adapt to these trends. The broader context is provided by an analysis of emergent business models and the changing requirements for expert advice from clients. *Sustainable Futures in the Built Environment to 2050: A Foresight Approach to Construction and Development* features chapters covering data and trends, including historical data and UK and international case studies, policies and practice related to the field, current state of scientific understanding, key challenges, key technological advances, including disruptive and systemic technological innovations, change issues, and critical uncertainties and future visions. It provides a strong conceptual framework based on a Foresight approach. Discussion of the key data and trends that underpin each chapter. Coverage of both construction and property development. Specially commissioned chapters by academics and practitioners. A synthesis of the main findings in the book and key insights for the future to 2050. *Sustainable Futures in the Built Environment to 2050: A Foresight Approach to Construction and Development* is an important book for postgraduate students and researchers, construction, real estate, and property development specialists.
