Environmental Compliance Made Easy Andre R. Cooper,1998 Companies must comply with

thousands of pages of federal environmental regulations. Such a task often proves quite challenging even for the most experienced environmental professionals. However, *Environmental Compliance Made Easy* offers everything you need in a simple, easy-to-follow format. Rather than explaining environmental regulations in chapter and verse fashion, Cooper provided 299 pages of checklists for compliance with EPA, DOT, and OSHA policies, standards, and regulations. Organized alphabetically by media and topic, each checklist begins with a brief description of the checklist's objectives, followed by the required actions and corresponding standards. Author Andre Cooper Sr. covers the full range of environmental compliance issues, including Air Quality, Emissions, Hazardous Solid and Chemical Waste, Storage Tank Hazard Evaluations, Spill Response, and more. Cooper also provides an index and three appendices that include a Glossary of Terms, Lists of Toxic, Flammable, and Explosive Substances, and a List of Hazardous Substances and Reportable Quantities.

Guide to Information Sources in Engineering Charles Lord, 2000-08-15. The only source that focuses exclusively on engineering and technology, this important guide maps the dynamic and changing field of information sources published for engineers in recent years. Lord highlights basic perspectives, access tools, and English language resources, directories, encyclopedias, yearbooks, dictionaries, databases, indexes, libraries, buyer's guides, Internet resources, and more. Substantial emphasis is placed on digital resources. The author also discusses how engineers and scientists use information, the culture and generation of scientific information, different types of engineering information, and the tools and resources you need to locate and access that material. Other sections describe regulations, standards, and specifications, government resources, professional and trade associations, and education and career resources. Engineers, scientists, librarians, and other information professionals working with engineering and technology information will welcome this research.
