Environmental Debate

Rosina Ehmman

Environmental Debate:

The Environmental Debate Peninah Neimark, Peter Rhoades Mott, 1999 This unique collection of primary documents examines the evolution of concern about environmental degradation pollution and resource conservation in America from the colonial period to the end of the twentieth century The historical introductions to each part and to each document provide a context for analyzing each document and will aid readers to better understand the various stands taken in debates over how why and if our environment needs to be protected Students and others interested in environmental problems are encouraged to consider all sides of these complex issues before drawing their own conclusions The documents are taken from the writings of naturalists including botanists and ornithologists conservationists ranging from forest managers to game hunters to grassroots activists scientists philosophers and theologians lawyers and judges politicians and industrialists sociologists and economists artists designers architects and poets and novelists as well as from government reports federal state and local legislation and court cases They include a wide variety of attitudes about environmental issues ranging from the apocalyptic view that we must immediately diminish our impact on the environment to the belief that we can use whatever resources we want for the advancement of human well being because human ingenuity can resolve whatever problems ensue The book with its broad array of perspectives will be a welcome resource for students wishing to explore controversial environmental issues from as many different angles as possible

Reclaiming the Environmental Debate Richard Hofrichter, 2000 Reflecting a diversity of voices and critical perspectives the essays in this book range from critiques of traditional thinking and practices to strategies for shifting public consciousness to create healthy communities Eco-facts and Eco-fiction William H. Baarschers, 2013-04-15 Ozone friendly recyclable zero waste elimination of toxic chemicals such environmental ideals are believed to offer solutions to the environmental crisis Where do these ideals come from Is the environmental debate communicating the right problems Eco Facts and Eco Fiction examines serious errors in perceptions about human and environmental health Drawing on a wealth of everyday examples of local and global concerns the author explains basic concepts and observations relating to the environment Removing fear of science and technology and eliminating wrong perceptions lead to a more informed understanding of the environment as a science a philosophy and a lifestyle By revealing the flaws in today's environmental vocabulary this book stresses the urgent need for a common language in the environmental debate Such a common language encourages the effective communication between environmental science and environmental decision making that is essential for finding solutions to environmental problems

Environmental Debates in Albania Deniz Çupi, 2023-09-30 This book investigates the role played by classical and digital media and social networks in shaping debates on the environment Providing a unique window of observation on environmental debates the book explores the media theatre from the post communist perspective of Albania The work navigates the creation and development of environmental debate in Albania using evidence based case studies investigating

the role of actors involved who are closely related to the media such as in business or politics Environmental Debates in Albania offers an original insight on environmental debate which is closely tied to and influenced by the place and culture within which it originates Rich literature exists on global environmental issues protests policy and the rhetoric around climate change this book supplies another piece to the puzzle through its focus on the under researched area of environmental debate in post communist and Eastern European countries

from as many different angles as possible Rationality and the Environment Bo Eling,2012 Environmental assessment and management involve the production of scientific knowledge and its use in decision making processes The result is that within these essentially rational political assessment frameworks experts are creating and applying scientific knowledge for decision and management purposes that actually have strong ethical and aesthetic dimensions Yet these rational political frameworks lack the tools to provide guidance on ethical and aesthetic issues that affect the wider public This revolutionary work argues that ethical and aesthetic dimensions can only be brought into environmental politics and policies by citizens actively taking a stand on the specific matters in question The author draws on Habermas trisection of rationality as cognitive instrumental moral practical and aesthetic expressive to suggest that truly effective environmental policy needs to activate all three approaches and not favour only the rational To achieve this objective the author argues that public participation in environmental policy and assessment is necessary to counteract the dictatorship of technical and economic instrumentality in environmental policy the failure to take ethical and aesthetic rationalities into account and more importantly how such policy is applied on the ground to shape our natural and material world *Worst Things First* Adam M. Finkel,Dominic

Golding,2014-04-04 For any government agency the distribution of available resources among problems or programs is crucially important Agencies however typically lack a self conscious process for examining priorities much less an explicit method for defining what priorities should be *Worst Things First* illustrates the controversy that ensues when previously implicit administrative processes are made explicit and subjected to critical examination It reveals surprising limitations to quantitative risk assessment as an instrument for precise tuning of policy judgments The book also demonstrates the strength of political and social forces opposing the exclusive use of risk assessment in setting environmental priorities

Bonhoeffer's Christocentric Theology and Fundamental Debates in Environmental Ethics Steven C. van den Heuvel,2017-05-04 There is widespread understanding of the close connection between religion and the ecological crisis and that in order to amend this crisis theological resources are needed This monograph seeks to contribute to this endeavor by engaging the theology of Dietrich Bonhoeffer His theology is particularly suitable in this context due to its open ended nature and to the prophetic and radical nature of the questions he was prepared to ask that is why there are many other attempts to contextualize Bonhoeffer s theology in areas that he himself has not directly written about In this monograph Steven van den Heuvel first of all addresses the question of how to translate Bonhoeffer s theology in a methodologically sound way He settles on a modified form of the general method of correlation Then secondly van den Heuvel sets out to describe five major concepts in Bonhoeffer s work bringing these into critical interplay with discussions in environmental ethics and eco theology In making the correlations he thoroughly describes each concept situating it in the historic and intellectual background of Bonhoeffer s time He then transposes these concepts to contemporary environmental ethics describing what contribution Bonhoeffer s theology can make Environmental Conflict Jeffrey J. Pompe,James R. Rinehart,2012-02-01 This

straightforward translation of environmental economics discusses issues and concerns that have long lasting and often substantial effects The authors bridge the gap between the natural and social sciences by examining how economic decisions interact with the environment In addition they explain why economics plays an important role in clarifying environmental issues and formulating solutions Environmental Conflict analyzes policy choices and provides a basic methodology for understanding a broad range of environmental topics These include the tragedy of the commons the importance of incentives and markets the role of government property rights benefit cost analysis natural resource use pollution control economic growth international trade global warming and biodiversity loss

Issues for Debate in Environmental Management

CQ Researcher,2010 Issues for Debate in Environmental Management is a contemporary collection of articles covering core issues within the broad topic of environmental management The book is intended to supplement core courses in the Business and Management curriculum titled Environmental Management Sustainability and Business and Society among other similarly titled courses The book begins with a feature article titled The New Environmentalism Can New Business Policies Save the Environment and progresses through 16 articles of topics generally covered in environmental management courses including global warming the green economy clean energy sources water sources and other opportunities for business and management exploration

Environment Betrayed Edward C. Krug,2012-05-30 In this collection of articles an environmental scientist traces a journey through the wilderness of environmental politics In his travels Dr Edward Krug developed a unique perspective on vital areas of the environmental issues making him critical of both sides of the environmental debate Environment Betrayed delves into numerous environmental issues and into environmentalism itself presenting both Dr Krug s opinions and the well documented opinions of others who were active participants in the environmental arena Dr Krug has worked as an environmental scientist since the early eighties and much of the research and information included here originated in the eighties and nineties Despite this gap of time defenders of modern Western civilization don t seem to recognize the nature of the environmental war let alone many of its details By raising issues environmentalists also define the battlefield that is the context of thought Krug cites credible sources on both sides of the debate with varying perspectives on where things stand in this conflict Only by gaining a clear understanding of what s at stake can we truly grasp the numerous environmental issues swirling around us and what they will mean for our future

The Environmental Debate Peninah Neimark,Peter Rhoades Mott,2017 This book examines the evolution of concern about environmental degradation pollution climate change and resource conservation in America from the Colonial period the present It includes current documents published from 2010 to 2017 that discuss current thoughts on climate change environmental reform toxic chemicals sustainable energy gas drilling oil pipelines energy demand clean energy land management marine life and more

by step guide In 12 exciting projects with simple steps and detailed instructions budding fashionistas create their own stylish accessories to give as gifts or add a touch of personal flair to any ensemble Following the successful Art Smart series Craft Smart presents a fresh fun approach to four creative skills knitting jewelry making papercrafting and crafting with recycled objects Each book contains 12 original projects to make using a range of readily available materials There are projects for boys and girls carefully chosen to appeal to readers of all abilities A special techniques and materials section encourages young crafters to try out their own ideas while learning valuable practical skills

Central Debates in British Politics

John Benyon,David Denver,Justin Fisher,2014-09-25 Central Debates in British Politics focuses on British politics in a changing social economic and institutional context The book explores issues and debates using a variety of approaches and techniques It is written and edited by a team of leading experts who analyse key issues in a highly structured and thematic manner

The Environment And Marxism-leninism Joan Debardeleben,2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself

The environmental turn in postwar Sweden

David Larsson Heidenblad,2021-09-07 The Stockholm Conference of 1972 drew the world s attention to the global environmental crisis but for people in Sweden the threat was nothing new Anyone who read the papers or watched the television news was already familiar with the issues Five years early in the summer of 1967 the situation was very different So what happened in between This book explores the environmental turn that took place in Sweden in the late 1960s This radical change the realisation that human beings were in the process of destroying their own environment had major and far reaching consequences What was it that opened people s eyes to the crisis When did it happen Who set the ball rolling These are some of the questions the book addresses shedding new light on the history of environmentalism

Environment, Media and Communication Anders Hansen,2018-09-21 Media and communication processes are central to how we come to know about and make sense of our environment and to the ways in which environmental concerns are generated elaborated manipulated and contested The second edition of Environment

Media and Communication builds on the first edition's framework for analysing and understanding media and communication roles in the politics of the environment. It draws on the significant and continuing growth and advances in the field of environmental communication research to show the increasing diversification and complexity of environmental communication. The book highlights the persistent urgency of analysing and understanding how communication about the environment is being influenced and manipulated with implications for how and indeed whether environmental challenges are being addressed and dealt with. Since the first edition changes in media organisations, news media and environmental journalism have continued apace but perhaps more significantly the media technologies and the media and communications landscape have evolved profoundly with the continued rise of digital and social media. Such changes have gone hand in hand with and often facilitated enabled and enhanced shifting balances of power in the politics of the environment. There is thus a greater need than ever to analyse and understand the roles of mediated public communication about the environment and to ask critical questions about who what benefits and who what is adversely affected by such processes. This book will be of interest to students in media communication studies, geography, environmental studies, political science and sociology as well as to environmental professionals and activists.

Towards an Environment Research Agenda A. Winnett, 2002-12-13

This is the second volume of papers in the topical area of environmental management arising from work done by the International Centre for the Environment at the University of Bath. The papers address inter-disciplinary environmental themes particularly from a business and management perspective.

Agri-environmental Policy in the European Union Henry Buller, Geoff Wilson, Andrea Holl, 2017-11-01

This title was first published in 2000. This volume provides a detailed examination of agri-environmental policy within ten European states. Individual chapters consider the agricultural and environmental policy contexts within each state and examine the range and significance of agri-environmental policy proposed in addition to their spatial and territorial impact, their policy making implications and their consequences for the structures, institutions and actors of national farming policy both across and within national borders. Drawing from ten national profiles and the data sets provided, the book provides a comparative analysis of implementation trends, filling a gap in the literature on this topic. Taking European legislation as its starting point, the comparative section of the book examines how Member States have responded to EU imperatives in their budgetary commitments, in their implementation strategies and in the policy outputs that result. The study identifies similarities across European nations in the territorial and agricultural focus of agri-environmental policy and draws attention to the alternative.

Trade and Environment Duncan Brack, 2013-12-16

Can trade liberalization and environmental protection be pursued together or do the two objectives inevitably conflict? The rapid evolution of international regimes and institutions is increasingly bringing such conflicts to the fore. A consensus both on the extent of the clash and on how it can be resolved does not yet exist. This volume includes the proceedings from the RIIA's April 1997 conference on trade and the environment which brought together prominent

contributors from all sides of the debate including industry governments academics NGOs and intergovernmental institutions such as the World Trade Organization UNEP UNCTAD and the OECD They examine the background to the issue the impacts of trade related environmental measures the relationship between environmental policy competitiveness and investment industry and developing country concerns and the evolution of dispute settlement procedures in the EU and the WTO The concluding chapter features a wide ranging discussion on the future of the debate and of the WTO s Committee on Trade and Environment
