## **Environmental Ethics Concepts Policy And Theory:**

**Environmental Ethics** Joseph R. DesJardins,1999 Publisher Description      **Environmental Ethics, Ecological Theology, and Natural Selection** Lisa Sideris,2003-07-16 In the last few decades religious and secular thinkers have tackled the world s escalating environmental crisis by attempting to develop an ecological ethic that is both scientifically accurate and free of human centered preconceptions This groundbreaking study shows that many of these environmental ethicists continue to model their positions on romantic pre Darwinian concepts that disregard the predatory and cruelly competitive realities of the natural world Examining the work of such influential thinkers as James Gustafson Sallie McFague Rosemary Radford Ruether John Cobb Peter Singer and Holmes Rolston Sideris proposes a more realistic ethic that combines evolutionary theory with theological insight advocates a minimally interventionist stance toward nature and values the processes over the products of the natural world      **Nature Ethics** Marti Kheel,2008 In *Nature Ethics An Ecofeminist Perspective* Marti Kheel explores the underlying worldview of nature ethics offering an alternative ecofeminist approach Seeking to heal the divisions between the seemingly disparate movements and philosophies of feminism animal advocacy environmental ethics and holistic health Kheel proposes an ecofeminist philosophy that underscores the importance of empathy and care for individual beings as well as larger wholes      ,      *Handbook of Global Environmental Politics* Peter Dauvergne,2012-01-01 The second edition of this Handbook contains more than 30 new and original articles as well six essential updates by leading scholars of global environmental politics This landmark book maps the latest theoretical and empirical research in this energetic and growing field Captured here are the pioneering and lively debates over concerns for the health of the planet and how they might best be addressed The introduction explores the intellectual trends and evolving parameters in the field of global environmental politics It makes a case for an expansive definition of the field one that embraces an interdisciplinary literature on the connections between global politics and environmental change The remaining chapters are divided into four broad themes states and cooperation global governance the political economy of governance and knowledge and ethics with each section covering key emerging issues In depth explorations are given to topics such as climate change multinational corporations international agreements and UN organizations regulations and business standards trade and international finance multilevel and transnational governance and ecological citizenship *Handbook of Global Environmental Politics Second Edition* is a comprehensive review of the field and offers cutting edge ideas for further research As such scholars students and policymakers will find themselves looking to it for many years to come

*Eco-Phenomenology* Charles S. Brown,Ted Toadvine,2012-02-01 This groundbreaking collection explores the intersection of phenomenology with environmental philosophy It examines the relevance of Husserl Heidegger Merleau Ponty and Levinas for thinking through the philosophical dilemmas raised by environmental issues and then proposes new phenomenological approaches to the natural world The contributors demonstrate phenomenology s need to engage in an ecological self

evaluation and to root out anthropomorphic assumptions embedded in its own methodology. Calling for a reexamination of beliefs central to the Western philosophical tradition, this book shifts previously marginalized environmental concerns to the forefront and blazes a trail for a new collaboration between phenomenologists and ecologically minded theorists.

**Environmental Hermeneutics in the Anthropocene** David Utsler, Forrest Clingerman, Brian Treanor, 2025-10-15

*Environmental Hermeneutics in the Anthropocene* is a diverse collection of essays that approach contemporary environmental problems with the tools and perspectives provided by the tradition of philosophical hermeneutics advanced by philosophers such as Martin Heidegger, Hans Georg Gadamer, and Paul Ricoeur. Engaging both established and new voices, this book presents a significant contribution to the field by expanding the scope of philosophical hermeneutics to environmental issues. It addresses a broad scope of environmental topics such as the Anthropocene, climate change, degrowth, environmental justice, the limits of language in understanding nature, and environmental aesthetics in environmental practice. Together, the chapters show the crisis of regional and global environmental problems to be in part a crisis of interpretation. The ways that human beings understand their relationship to environments shape and determine how to act and live within places. Yet the values and ideals that different people have about their lived environments often come into conflict. Thus, hermeneutics plays an important role in environmental discourse; it helps adjudicate these conflicting understandings. This collection of essays demonstrates the unique way that environmental hermeneutics can be employed to understand environments in this age of the Anthropocene. It will appeal to researchers and upper-level students in environmental humanities, environmental studies, ethics, and philosophy.

**Ethics, Design and Planning of the Built Environment**

Claudia Basta, Stefano Moroni, 2013-06-24. The book proposes a set of original contributions in research areas shared by planning theory, architectural research, design, and ethical inquiry. The contributors gathered in 2010 at the Ethics of the Built Environment seminar organized by the editors at Delft University of Technology. Both prominent and emerging scholars presented their researches in the areas of aesthetics, technological risks, planning theory, and architecture. The scope of the seminar was highlighting shared lines of ethical inquiry among the themes discussed in order to identify perspectives of innovative interdisciplinary research. After the seminar, all seminar participants have elaborated their proposed contributions. Some of the most prominent international authors in the field were subsequently invited to join in with this inquiry. Claudia Basta teaches Network Infrastructures and Mobility at Wageningen University. Between 2009 and 2011, she worked as Coordinator of the 3TU Centre of Excellence for Ethics and Technology of Delft University, where she completed her post doc research on the shared areas of investigation between risk theories, planning theories, and ethical inquiry. Her main research interests concern the matter of assessing and governing technological risks in relation to sustainable land use planning. She wrote a number of journal articles and contributions to collective books on these themes. Stefano Moroni teaches Land use ethics and the law at Milan Politecnico. His main research interests concern planning theory and ethics. He is the author of a

Newton,2008-04-15 Business Ethics and the Natural Environment examines the present status of relations between corporate enterprise and the natural environment in the world today Discusses such questions as What obligations does a corporation have toward the environment To respect entities unprotected by law To care about future generations Argues that environmentally friendly business practices yield dividends exceeding expectations and that the competitive firm of the 21st century will follow green standards Provides a background in ethics a survey of business ethics an account of environmental philosophy an overview of environmental legal issues and an account of the problems associated with globalization **Ethics and Environmental Policy** Frederick Ferré,Peter Hartel,1994 In this collection of essays leading environmentalists and philosophers explore the relationship between environmental ethics and policy both in theory and practice The first section of the book focuses on four approaches to change in ethical theory ecological science feminist metaphysics Chinese philosophy and holistic postmodern technology In subsequent sections the contributors emphasize the need for nontraditional solutions and attempt to expand awareness of the most pressing practical problems Among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property This volume is based on essays presented in 1992 at the Second International Conference on Ethics and Environmental Policy The conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment **American Environmental History** Carolyn Merchant,2007-10-31 By studying the many ways diverse peoples have changed shaped and conserved the natural world over time environmental historians provide insight into humanity s unique relationship with nature and more importantly are better able to understand the origins of our current environmental crisis Beginning with the precolonial land use practice of Native Americans and concluding with our twenty first century concerns over our global ecological crisis American Environmental History addresses contentious issues such as the preservation of the wilderness the expulsion of native peoples from national parks and population growth and considers the formative forces of gender race and class Entries address a range of topics from the impact of rice cultivation slavery and the growth of the automobile suburb to the effects of the Russian sea otter trade Columbia River salmon fisheries the environmental justice movement and globalization This illustrated reference is an essential companion for students interested in the ongoing transformation of the American landscape and the conflicts over its resources and conservation It makes rich use of the tools and resources climatic and geological data court records archaeological digs and the writings of naturalists that environmental historians rely on to conduct their research The volume also includes a compendium of

significant people concepts events agencies and legislation and an extensive bibliography of critical films books and Web sites

**The Measurement of Environmental and Resource Values** A. Myrick Freeman III, 2010-09-30 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company

*Ethics and Environmental Policy* Frederick Ferré, Peter Hartel, 1994 In this collection of essays leading environmentalists and philosophers explore the relationship between environmental ethics and policy both in theory and practice The first section of the book focuses on four approaches to change in ethical theory ecological science feminist metaphysics Chinese philosophy and holistic postmodern technology In subsequent sections the contributors emphasize the need for nontraditional solutions and attempt to expand awareness of the most pressing practical problems Among the topics discussed are the possibilities of real international cooperation the inequitable but economically intractable issue of global gasses the political and ethical challenges of city planning and the growing evidence of fundamental inappropriateness in treating land as legal private property This volume is based on essays presented in 1992 at the Second International Conference on Ethics and Environmental Policy The conference was held in response to the increasing need for a new ethics that would counter the traditional human centered dominantly individualistic approach of the industrial world toward the environment

*Everyday Aesthetics* Yuriko Saito, 2008-01-03 Everyday aesthetic experiences and concerns occupy a large part of our aesthetic life However because of their prevalence and mundane nature we tend not to pay much attention to them let alone examine their significance Western aesthetic theories of the past few centuries also neglect everyday aesthetics because of their almost exclusive emphasis on art In a ground breaking new study Yuriko Saito provides a detailed investigation into our everyday aesthetic experiences and reveals how our everyday aesthetic tastes and judgments can exert a powerful influence on the state of the world and our quality of life By analysing a wide range of examples from our aesthetic interactions with nature the environment everyday objects and Japanese culture Saito illustrates the complex nature of seemingly simple and innocuous aesthetic responses She discusses the inadequacy of art centered aesthetics the aesthetic appreciation of the distinctive characters of objects or phenomena responses to various manifestations of transience and the aesthetic expression of moral values and she examines the moral political existential and environmental implications of these and other issues

*Interpreting Nature* Brian Treanor, Martin Drenthen, David Utsler, 2013-11-11 Modern environmentalism has come to realize that many of its key concerns wilderness and nature among them are contested territory viewed differently by different people Understanding nature requires science and ecology to be sure but it also requires a sensitivity to history culture and narrative Thus understanding nature is a fundamentally hermeneutic task

*Pagan Ethics* Michael York, 2015-08-05 This book is the first comprehensive examination of the ethical parameters of paganism when considered as a world religion alongside Christianity Islam Judaism Hinduism and Buddhism The issues of evil value and idolatry from a pagan perspective are analyzed as part of the Western ethical tradition from the Sophists and Platonic schools through the philosophers Spinoza Hume Kant and Nietzsche to such

contemporary thinkers as Grayling Mackie MacIntyre Habermas Levinas Santayana etc From a more practical viewpoint a delineation of applied pagan ethics is then presented in connection with current moral issues such as same sex union recreational drugs environmental awareness abortion and terrorism Finally overviews of sectarian pagan ethics Shinto Santeria Heathenism Druidry Romuva Slavic Kemeticism Classical and Wicca provide both the general and pagan reader with an understanding of the provocative range and differentiation of pagan ethical thought The book approaches the Western ethical tradition as an historical development and a continuing dialogue The novelty of this approach lies in its consideration of paganism as a legitimate voice of religious spirituality rather than a satanic aberration or ridiculous childish behavior The book is aimed at both the contemporary Western pagan and anyone with an interest in the moral dilemmas of our times and the desire to engage in the global ethical discussion Among the more important features of the book are its presentation of a re evaluation of idolatry the notion of the virtue value the richness of the pagan tradition and the expansion of Western ethics beyond its Christian heritage

*Environmental Ethics* Joseph R. DesJardins, 2000 The text serves as an introduction to ethical theory as it applies to environmental issues and as a casebook on contemporary problems of science industry and individual decision making It provides a readable yet philosophically careful survey of the field of environmental ethics It is comprehensive covering topics from the relevance of Aristotle's ethics for environmental issues to Deep Ecology and Ecofeminism

*Technology and the Contested Meanings of Sustainability* Aidan Davison, 2001-05-16 Argues that sustainability requires more than economic and technological efficiency

*The New Imperial Order* Makere Stewart-Harawira, 2013-07-18 This important book discusses the political economy of world order and the basic ideological and ontological grounds upon which the emergent global order is based Starting from a Maori perspective it examines the development of international law and the world order of nation states In engaging with these issues across macro and micro levels the international arena the national state and forms of regionalism are identified as sites for the reshaping of the global politico economic order and the emergence of Empire Overarching these problematics is the emergence of a new form of global domination in which the connecting roles of militarism and the economy and the increase in technologies of surveillance and control have acquired overt significance
