## **Environmental Ethics Divergence And Convergence:**

Environmental Ethics Susan Jean Armstrong, Richard George Botzler, 1993      **Environmental Ethics: Divergence and Convergence** Susan J Armstrong, Richard G Botzler, 2003-08-28      **Rachel Carson** , Highwood N P presents a profile of American biologist and author Rachel Louise Carson 1907-1964 as part of the GirlSite resource. The resource also offers access to additional information      Teaching Environmental Ethics Clare Palmer, 2006-04-01. This collection explores a variety of questions both of a theoretical and practical nature raised by teaching environmental ethics. Questions considered move from asking whether teaching environmental ethics should include environmental advocacy to practical issues about texts, syllabi and teaching techniques      **Environmental Ethics** Robin Attfield, 2014-04-03. In this clear, concise, comprehensively revised and up-to-date introduction to environmental ethics, Robin Attfield guides the student through the key issues and debates in this field in ways that will also be of interest to a wide range of scholars and researchers. The book introduces environmental problems and environmental ethics and surveys theories of the sources of the problems. Attfield also puts forward his own original contribution to the debates, advocating biocentric consequentialism among theories of normative ethics and defending objectivism in meta-ethics. The possibilities of ethical consumerism and investment are discussed, and the nature and basis of responsibilities for future generations in such areas as sustainable development are given detailed consideration. Attfield adopts an inclusive cosmopolitan perspective in discussions of global ethics and citizenship and illustrates his argument with a discussion of global warming, mitigation, adaptation and global justice. The revised edition features a new chapter on climate change, new treatments of animal issues, ecofeminism, environmental aesthetics, invasion biology and virtue ethics, and new applications of the precautionary principle to fisheries, genetic engineering and synthetic biology. The glossary and bibliography have been updated to assist understanding of these themes. The text uses a range of devices to aid understanding, such as summaries of key issues and guides to further reading and relevant websites. It has been written particularly with a view to the needs of students taking courses in environmental ethics and will be of interest to students and scholars of philosophy, ethics, geography, religion and environmental studies.      *An Integrated Approach to Environmental Management* Dibyendu Sarkar, Rupali Datta, Avinandan Mukherjee, Robyn Hannigan, 2015-11-02. Covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management. Provides an up-to-date survey of the field from the perspective of different disciplines. Covers the topic of environmental management from multiple perspectives, namely natural sciences, engineering, business, social sciences and methods and tools perspectives. Combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains. Explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process. Chapter contents are appropriately demonstrated with numerous

pictures charts graphs and tables and accompanied by a detailed reference list for further readings

**Ethical Water Stewardship** Ingrid Leman Stefanovic,Zafar Adeel,2020-10-20 This interdisciplinary book brings philosophers and non philosophers to the table to address questions of water ethics specifically in terms of how moral questions inform decision making around water security at local national and international scales Water security which pertains to the experience of assured access to clean water is a broad concept that intersects human rights politics economics law legislation public health trade agriculture and energy Decisions made at each of these intersection points have ramifications for human well being especially for the populations that are marginalized in a societal and political sense In this book the ethical dimensions of decision making at those intersection points are explored and real world examples are used to tease out some key insights It charts how ethical consideration can help shape a future in which everyone will be water secure

*Eco-Phenomenology* Charles S. Brown,Ted Toadvine,2012-02-01 This groundbreaking collection explores the intersection of phenomenology with environmental philosophy It examines the relevance of Husserl Heidegger Merleau Ponty and Levinas for thinking through the philosophical dilemmas raised by environmental issues and then proposes new phenomenological approaches to the natural world The contributors demonstrate phenomenology s need to engage in an ecological self evaluation and to root out anthropomorphic assumptions embedded in its own methodology Calling for a reexamination of beliefs central to the Western philosophical tradition this book shifts previously marginalized environmental concerns to the forefront and blazes a trail for a new collaboration between phenomenologists and ecologically minded theorists

**Ecological Economics** Gareth Edwards-Jones,Ben Davies,Salman S. Hussain,2009-04-01 Ecological economics is an exciting interdisciplinary field of study that combines insights from the natural sciences economics philosophy and other fields to develop innovative approaches to environmental problems It draws on a wide range of analytical perspectives some radical others more conventional to build a more complete understanding of human ecosystem interactions Current research in the field includes work on nature conservation land use planning pollution control natural resource management and environmental impact assessment evaluation Ecological Economics provides a comprehensive introduction to the core themes presented in a clearly structured style with chapters tailored specifically to readers without any economic or philosophical training There is an emphasis throughout on the complementary roles of economics ethics and ecology in environmental decision making processes The book reviews the evolution of important ideas in the field explores the fundamental philosophies underlying different approaches to environmental problems explains in detail the specific tools and techniques used in these approaches and gives numerous examples of how they can be applied Special importance is attached to understanding both the advantages and limitations of different analyses in order to provide a balanced and coherent view of how these different approaches interrelate and how their roles vary in different contexts Written by three authors specializing in ecology economics and philosophy this textbook provides an excellent introduction to the field of ecological economics for students in the natural

sciences and other environmental disciplines It will also be of interest to a wide range of professionals and researchers involved in environmental management and policy and thers including economists seeking to broaden their knowledge of new methodologies and approaches Further reading suggestions and extensive references are provided for those interested in pursuing particular themes beyond the introductory level The first introductory ecological economics text written specifically for natural scientists Assumes no prior knowledge of economics or philosophy Emphasises the complementary roles of ecology economics and ethics in environmental decision making processes An emphasis on clarity and accessibility throughout

**Growing Mind and Soul** James Patton Jones,2005-03-10 An entertaining collection of essays and educational papers which illustrate by example the author s recommended model of education a blending of mental emotional and spiritual teachings Topics discussed include Family Morality Ethics Racism Native Americans and Religion each as specific examples of a process of learning drawn from the author s own experiences as a student

**Economic Behaviour As If Others Too Had Interests** Chegedua Tangonyire,Kyaligonza Achal,Lawrence,2012-09-17 In the instinct to survive those who are able to dominate the competition go about their activities as if others humans and non humans did not matter or did not have interests Selfishness becomes more prevalent as a people move from elementary economic systems to modern economic systems The major reason why economic systems collapse is human selfishness Despite all the achievements in science and technology there are still poor people in the world and environmental cataclysms have become daily occurrences This is because the would be agents of development such as Multinational Corporations and states are largely motivated by selfishness Unfortunately poor

economies pursue development using borrowed models formulated for selfish reasons Needless to say the solution to current economic and environmental challenges does not lie in abstract economic jargons or more advanced technological machinery but in taming the evil of human selfishness This book makes a strong case for a vaccine against the virus of selfishness namely education for altruistic egoism      *Speciesism in Biology and Culture* Brian Swartz,Brent D. Mishler,2022-12-16 This open access book explores a wide ranging discussion about the sociopolitical cultural and scientific ramifications of speciesism and world views that derive from it In this light it integrates subjects across the natural sciences social sciences and humanities The 21st century western world is anthropocentric to an extreme we adopt unreasonably self centered and self serving ideas and lifestyles Americans consume more energy resources per person than most other nations on Earth and have little concept of how human ecology and population biology interface with global sustainability We draw upon religion popular culture politics and technology to justify our views and actions yet remain self centered because our considerations rarely extend beyond our immediate interests Stepping upward on the hierarchy from racism speciesism likewise refers to the view that unique natural kinds species exist and are an important structural element of biodiversity This ideology manifests in the cultural idea that humans are distinct from and intrinsically superior to other forms of life It further carries a plurality of implications for how we perceive ourselves in relation to nature how we view Judeo Christian religions and their tenets how we respond to scientific data about social problems such as climate change and how willing we are to change our actions in the face of evidence      Spirit of the Environment David E Cooper,Joy A Palmer,2004-06-02 Spirit of the Environment brings spiritual and religious concerns to environmental issues Providing a much needed alternative to exploring human beings relationship to the natural world through the restrictive lenses of science ecology or even morality this book offers a fresh perspective to the field Spirit of the Enironment addresses the environmental attitudes of the major religions the relationship between art and nature the Gaia hypothesis the non instrumental values which have inspired environmental concern Contributors range from a variety of disciplines including philosophy comparative religion education and social anthropology providing students with an intriguing survey on the role that spirituality and religion play in nature This is a vital collection for those eager to examine the relationship between the spiritual and the environment      Human Rights and the Environment Linda Hajjar Leib,2011 The book examines the genesis and development of environmental rights or the Right to Environment in international law and discusses their philosophical theoretical and legal underpinnings in the context of sustainable development and the notion of solidarity rights      *Greening the College Curriculum* Jonathan Collett,Stephen Karakashian,2013-04-10 Greening the College Curriculum provides the tools college and university faculty need to meet personal and institutional goals for integrating environmental issues into the curriculum Leading educators from a wide range of fields including anthropology biology economics geography history literature journalism philosophy political science and religion describe their experience introducing environmental issues into their teaching The book

provides a rationale for including material on the environment in the teaching of the basic concepts of each discipline  
guidelines for constructing a unit or a full course at the introductory level that makes use of environmental subjects sample  
plans for upper level courses a compendium of annotated resources both print and nonprint Contributors to the volume  
include David Orr David G Campbell Lisa Naughton Emily Young John Opie Holmes Rolston III Michael E Kraft Steven  
Rockefeller and others

**Environmental Consciousness, Nature and the Philosophy of Education** Michael  
Bonnett, 2020-12-30 This book explores alternative ways of understanding our environmental situation by challenging the  
Western view of nature as purely a resource for humans Environmental Consciousness Nature and the Philosophy of  
Education asserts that we need to retrieve a thinking that expresses a different relationship with nature one that celebrates  
nature's otherness and is attuned to its intrinsic integrity agency normativity and worth Through such receptivity to nature's  
address we can develop a sense of our own being in nature that provides a positive orientation towards the problems we now  
face Michael Bonnett argues that this reframing and rethinking of our place in nature has fundamental implications for  
education as a whole questioning the idea of human stewardship of nature and developing the idea of moral education in a  
world of alterity and non-rational agents Drawing on and revising work published by the author over the last 15 years this  
book will be essential reading for students and scholars of environmental studies environmental education and the  
philosophy of education

**Environmental Problem-Solving: Balancing Science and Politics Using Consensus  
Building Tools** Lawrence Susskind, Bruno Verdin, Jessica Gordon, Yasmin Zaerpoor, 2020-10-31 Environmental Problem  
Solving presents short excerpts from carefully selected readings expert commentaries on those readings assignments and the  
best MIT student responses to the assignments and exam questions with excellent student response The book presents four  
main models of environmental policy making competing theories of environmental ethics tools for environmental assessment  
and environmental decision making and techniques for public engagement and group decision making The book covers the  
material presented in the semester long course required of all students enrolled in MIT's Environmental Policy and Planning  
Specialization
