Environmental Funds in Economies in Transition Organisation for Economic Co-operation and Development Staff,1997-04-02 **Sourcebook on Environmental Funds in Economies in Transition** Patrick Francis,Jürg Klarer,Nelly Petkova,1999 **OECD Studies on Water Facilitating the Reform of Economic Instruments for Water Management in Georgia** OECD,2018-03-15 This study assesses the use of economic instruments for water resources management in Georgia and considers options for reform following the 2014 signature of an Association Agreement with the EU committing to alignment with the EU s Water Framework Directive **Instruments of Change** Theodore Panayotou,2013-11-05 Instruments of Change examines the use of incentive systems and improved institutional arrangements to protect the environment and conserve natural resources as a means towards sustainable development *Transnational Politics of the Environment* Liliana B. Andonova,2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In *Transnational Politics of the Environment* Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards *Transnational Politics of the Environment* challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics **OECD Environmental Performance Reviews: Denmark 2019** OECD,2019-11-14 This is the third Environmental Performance Review of Denmark It evaluates progress towards sustainable development and green growth with special features on waste materials management and the circular economy and chemicals management **Environmental Financing in Economies in Transition** Jim McNicholas,2001 *Towards a National Circular Economy Strategy for Hungary* OECD,2023-04-28 The growing demand for raw materials in the Hungarian

economy projected up to 2050 is expected to exert significant additional pressure on the environment putting the country at risk of missing important environmental goals and opportunities to strengthen the competitiveness and resilience of its economy. Despite the notable progress in decoupling environmental pressures from economic activities over the past 20 years, several challenges remain.

Environmental Assessment in Developing and Transitional Countries Norman Lee, Clive George, 2013-06-10 Since the 1980s and especially since the Rio Earth Summit in 1992, there has been a substantial extension in the adoption and use of Environmental Assessment (EA) procedures in developing countries and countries in transition, low and middle income countries. However, few existing texts in environmental assessment or development studies have reflected this trend sufficiently until this publication. Divided into two main parts: EA Principles, Processes and Practice; Country and Institutional Studies of EA Procedures and Practice, this book explains the essentials of environmental impact assessment in the context of developing countries and assesses its importance to both developed and developing countries.

Public Economics and the Environment in an Imperfect World Lans Bovenberg, Sijbren Cnossen, 2012-12-06 Growing populations and economies have increased the public's awareness that the world's environmental resources are finite. The issues of global warming and the depletion of the ozone layer have given universal significance to what were once local and regional pollution problems. What is evident from *Public Economics and the Environment in an Imperfect World* is that Coasian negotiations fail to internalize the costs of environmental degradation, often calling for public intervention through the market mechanism. In its consideration of such issues, the book includes contributions on assessment problems, institutional aspects, the need for coordination and efficiency, and distribution issues.

The Role of Green and Transition Finance in Achieving Carbon Neutrality and Sustainable Energy Suk Hyun, Farzad Taghizadeh-Hesary, Inhyung Lee, Bing Xu, 2025-03-07 The Role of Green and Transition Finance in Achieving Carbon Neutrality and Sustainable Energy offers a thorough yet accessible exploration of a vital, often overlooked aspect of the energy transition. Authored by leading experts, this book is organized into three sections: fundamentals of green and transition finance, their role in achieving carbon neutrality and ESG goals, and the policies that drive the energy transition. Readers will gain insights into financial instruments and mechanisms influencing global financial markets and the energy sector, focusing on ESG factors. This book covers strategies that support sustainable green and net-zero innovations and includes diverse tools, case studies, and global perspectives to help readers design policies, model outcomes, and track progress. From foundational theory to complex country-level case studies, this book is an essential guide for students, policymakers, and researchers in energy and financial markets. Written in clear, policy-oriented language, it suits readers from diverse backgrounds. Includes global, regional, and country-level case studies, breaking down complex scenarios for practical learning. Presents empirical work, examples, and study questions to support independent implementation. Guides the reader from fundamental financial instruments to the complex context of energy markets and their potential for accelerating the energy transition.

The COVID 19 pandemic undeniably wreaked havoc on global trade profoundly affecting people's lives and having a significant impact on economic growth worldwide. Many people regard COVID 19 as the fury of nature. However, even during the context and now aftermath of the pandemic, there are still ongoing critical problems facing the world that have not cooled down, one of which is climate change. The recent unusual and extreme weather conditions have thrust climate change into the media limelight and to the forefront of the public agenda. Nowadays, climate change receives special attention from many organizations, countries, and governments worldwide because of its profound influence on the global economy and people's lives. Natural disasters and prolonged drought can destroy infrastructure, threaten crops, food production, as well as human life and lead to mass migration. The effects of climate change are evident everywhere globally and appear to be more severe than ever before.

Handbook of Environmental and Green Finance contains conceptual, empirical, and policy papers that provide an insightful and timely read for researchers, investors, and policymakers interested in sustainable finance, development finance, and alternative finance to combat climate change. Throughout this book, readers are offered a global analysis of the current state of the sustainable finance sector and provided with potential solutions to address obstacles in this field.
