Environmental Migrants:

Global Climate Change and Environmental Refugees Pardeep Singh, Bendangwapang Ao, Anamika Yadav, 2023-02-18 This book explores the possibilities of understanding the concept of climate refugees in order to ascribe to a consensual agreement that climate refugees are evident and this situation is a reality. A framework to study both empirically and theoretically is presented in a detailed manner so that it may become a resource for understanding the challenges of climate refugees. Through discussion and analysis the book presents potential answers to such questions as: Why has the international system been so short sighted and has not given importance to the problems of climate migrants and refugees? How to identify a climate refugee? How do you justify a climate refugee or a migrant? What are internally displaced people? Should we call them just refugees? The book covers the interdisciplinary nature of climate refugees and the perspectives of social science. The empirical findings provide an edge to holistically understanding climate refugees. This book discusses the concept of what really is a climate refugee and the necessary factors to make it an important part of the climate discourse. The legality of the term is missing in international parlance and the academic discourse should provide the necessary critique required for the evolution of the subject under study. Therefore the major objective of the book is to make the subject of climate migration known to all.

Legal Protection for environmental migrants: current challenges and Ways Forward Viviane Passos Gomes, Diana Viveiros, 2018-12-12 This book describes the worrying scenario that reflects the urgency and importance of dealing with the situation of environmental migrants especially considering that the environmental migration crisis is already greater than the migratory crisis due to war refugees. The first major problem in this environmental context is that there is no specific rule in international law to address this issue. In the face of this problem far from exhausting all possible solutions on the theme this book intended to plant a seed of reflection based on an analysis of the current legal and political context and outlining the possible paths to follow. New living conditions demand a paradigm shift in the human lifestyle changing thoughts and attitudes at the individual and group level as reflected in national and international policies. It begins with the notion of conscience and interdependence. It begins above all with the notion of empathy and solidarity understanding that tomorrow it may be one of us that needs this help that we are denying today.

Migration and Environmental Change in the West African Sahel Victoria van der Land, 2017-10-12 The West African Sahel is predicted to be heavily affected by climate change in the future Slow onset environmental changes such as increasing rainfall variability and rising temperature are presumed to worsen the livelihood conditions and to increase the out migration from the affected regions Based on qualitative and quantitative data from study areas in Mali and Senegal this book examines the relationship between population dynamics livelihoods and environment in the Sahel region focussing specifically on motives for migration Critiquing the assumption that environmental stress is the dominating migration driver the author demonstrates the important role of individual aspirations and social processes such as educational opportunities and the pull of urban lifestyles In doing so the book provides a more nuanced picture of the environment migration nexus arguing that slow onset environmental changes may actually be less important as drivers of migration in the Sahel than they are often depicted in the media and climate change literature This is a valuable resource for academics and students of environmental sociology migration and development studies

Rango,2023-12-22 This book focuses on how to improve the collection analysis and responsible use of data on global migration and international mobility While migration remains a topic of great policy interest for governments around the world there is a serious lack of reliable timely disaggregated and comparable data on it and often insufficient safeguards to protect migrants information Meanwhile vast amounts of data about the movement of people are being generated in real time due to new technologies but these have not yet been fully captured and utilized by migration policymakers who often do not have enough data to inform their policies and programmes The lack of migration data has been internationally recognized the Global Compact for Safe Orderly and Regular Migration urges all countries to improve data on migration to ensure that policies and programmes are evidence based but does not spell out how this could be done This book examines both the technical issues associated with improving data on migration and the wider political challenges of how countries manage the collection and use of migration data The first part of the book discusses how much we really know about international migration based on existing data and key concepts and approaches which are often used to measure migration The second part of the book examines what measures could be taken to improve migration data highlighting examples of good practice from around the world in recent years across a range of different policy areas such as health climate change and sustainable development more broadly Written by leading experts on international migration data this book is the perfect guide for students policymakers and practitioners looking to understand more about the existing evidence base on migration and what
