Les instruments économiques peuvent atteindre des objectifs environnementaux à moindres coûts et fournir des incitatifs à de plus amples améliorations. Les opportunités d'utiliser de tels instruments dans le secteur agricole où l'origine des problèmes de pollution peut être identifiée, comme dans le cas des opérations intensives d'élevage de bétail, sont limitées. Cependant, la plupart des problèmes environnementaux touchant l'agriculture impliquent plusieurs sources de pollution diffuses pour lesquelles les pratiques de réduction ne sont pas observables, ce qui rend difficile un contrôle efficace de la pollution en utilisant n'importe quel instrument. Plutôt que de compter sur l'atteinte des meilleures solutions en utilisant les instruments économiques, les façons les plus efficaces de s'occuper des problèmes de sources de pollution diffuses dans l'agriculture sont peut-être les développements technologiques et les initiatives des entreprises.

Economic instruments can achieve environmental goals at least cost and provide incentives for further improvements. There are limited opportunities for the use of such instruments in agriculture where the pollution problems can be traced as in the case of intensive livestock operations. However, most environmental problems in agriculture involve a large number of diffuse pollution sources whose abatement practices are unobservable rendering it difficult to achieve cost-effective pollution control with any single instrument. Rather than relying on first-best solutions through economic instruments, the most effective way of dealing with diffuse-source pollution problems in agriculture may be technological developments and business-led initiatives.

BACKGROUND

Integrating environmental and economic objectives is a necessary requirement to develop policies promoting sustainable development. Environ-

mental sustainability was made one of the four pillars in the 1989 reform of Canadian agriculture policy. More recently, Ralph Goodale, the former Canadian minister of agriculture, announced that "future [federal agricultural] programming must fos-

Environmental Policy in Search of New Instruments B. Dente,2013-03-09

Environmental policy is undergoing a dramatic transformation The problems connected with global change the need for preventative action and the growing importance of non source pollution call for new courses of action and new institutional arrangements In this situation it is fairly obvious that both the traditional command and control policy instruments and the more modern financial and economic instruments are increasingly under stress This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies In doing so it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors On the basis of a shared theoretical framework the book explores the potential of new policy instruments such as policy evaluation or mediation proposes alternative institutional arrangements for dealing with the issues classifies existing instruments and illuminates the process through which old and new tools can be set into operation

Handbook of Environmental Economics Karl-Goran Maler,Jeffrey R.

Vincent,2003-05-20 The Handbook of Environmental Economics focuses on the economics of environmental externalities and environmental public goods Volume I examines environmental degradation and policy responses from a microeconomic institutional standpoint Its perspective is dynamic including a consideration of the dynamics of natural systems and global with attention paid to issues in both rich and poor nations In addition to chapters on well established topics such as the theory and practice of pollution regulation it includes chapters on new areas of environmental economics research related to common property management regimes population and poverty mechanism design political economy of regulation experimental evaluations of policy instruments and technological change

Environmental Policy: From Regulation to

Economic Instruments, 2003 **Environmental Policy Between Regulation and Market** C. Jeanrenaud, 2013-03-07
 Environmental policies have traditionally relied on direct controls and on government investment to protect natural resources. Today the drawbacks and impediments to this approach are evident: heavy burdens borne by companies and the community, complex regulations, a danger of legislative inflation, difficulties in meeting the goals set to name a few. In response, the environmental authorities in many countries have begun to reassess the efficacy of their programs with the result that market incentives and voluntary agreements with companies or branches of industry have been added to the arsenal of traditional environmental protection measures. There are great expectations for new economic instruments which offer the twofold advantage of giving companies more freedom in the choice of means and of increasing the chances for meeting goals in a more cost effective way. The authors of this book analyse these instruments: green taxes, tradeable permits, covenants, joint implementation, internationally tradeable quotas from the point of view of cost effectiveness, their ability to achieve environmental goals and public and corporate acceptability. They endeavour to determine on the basis of experience to date whether these instruments are living up to the hopes placed in them.

Applying Economic Instruments to Environmental Policies in OECD and Dynamic Non-member Economies Organisation for Economic Co-operation and Development, 1994 **Environmental Regulation Through Financial Organisations: Comparative Perspectives on the Industrialised Nations** Benjamin Richardson, 2002-02-13
 This book takes a comparative perspective of practice in the European Union, North America, Japan and Australasia, arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector. This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed. Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector. In terms of specific reforms, the book focuses on the role of corporate environmental reporting, economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector. Beyond the focus on the financial services sector, the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance.

Use of Economic Instruments in Water Policy Manuel Lago, Jaroslav Mysiak, Carlos M. Gómez, Gonzalo Delacámara, Alexandros Maziotis, 2015-09-21
 This book assesses both the effectiveness and efficiency of implemented Economic Policy Instruments (EPIs) in order to achieve water policy goals and identifies the preconditions under which they outperform alternative e.g. regulatory policy instruments and/or can complement them as part of complex policy mixes. The development of a consolidated assessment framework helps clarify and where possible quantify the effectiveness of each EPI on the basis of different criteria. Outcome oriented

criteria describe how the EPIs perform They include intended and unintended economic and environmental outcomes and the distribution of benefits and costs among the affected parties These steps consider the application of cost effectiveness and cost benefits analysis e g to assess ex post performance of the EPI Process criteria describe the institutional conditions legislative political cultural etc affecting the formation and operation of the EPI studied particularly relevant for assessing the possible impacts of using economic instruments the transaction costs involved in implementing and enforcing the instruments and the process of implementation Case studies from Cyprus Denmark France Germany Hungary Italy the Netherlands Spain and the United Kingdom as well as from Australia Chile Israel and the USA are presented in this book A wide variety of EPIs are also covered including water pricing schemes tariffs environmental taxes environmental charges or fees subsidies on products and practices trading schemes tradable permits for abstraction and pollution and cooperation mechanisms

Water Pollution Control Richard Helmer,Ivanildo Hespanhol,2017-10-02 This is a handbook for policy makers and environmental managers in water authorities and engineering companies engaged in water quality programmes especially in developing countries It is also suitable for use as a textbook or as training material

National Environmental Policies Martin Jänicke,Helmut Weidner,2012-12-06 This book is a collection of systematically prepared case studies describing the environmental policy of thirteen countries in terms of capacity building Capacity for environmental policy and management as the concept is used in this volume has been defined broadly as a society's ability to devise and implement solutions to environmental issues as part of a wider effort to achieve sustainable development OECD Since the late 1960s capacity building in environmental policy and management can be observed across the world It may have made insufficient progress as yet from an environmentalist point of view but it has produced some remarkable results and not only in the industrialised world In the first chapter we present the conceptual framework that underlies the national case studies In the course of our research project the authors of the book met together twice to discuss this framework in the light of the national experiences and to harmonise their approaches In this way we have tried to offer more than a collection of individual and incoherent case studies focusing only on specific environmental problems institutions actors or instruments The idea behind this book is to give a systematic comparative overview of the fundamental conditions under which environmental policies is practised in selected countries
