Environmental Risks Perception Evaluation And Management:

Environmental Risks, 2001 *Environmental Risks* Gisela Bohm, Gisela Böhm, Josef Nerb, 2001-11-22 Environmental risks are among the most serious challenges of today's societies. This volume focuses on the psychological, sociological and cultural aspects of environmental risks that have not been given adequate and integrated attention in the past.

Assessment and Management of Environmental Risks Igor Linkov, José Palma-Oliveira, 2012-12-06 Managing environmental contamination requires decision makers to weigh existing risks against the potential effects of implementing environmental policies considering both the benefits and disruptions that may result from different actions. The NATO Advanced Research Workshop in Lisbon was an important step in the development and application of cost-efficient methods of risk assessment especially within the constraints of a budget. The goal of the workshop was to evaluate the potential for risk assessment to serve as a unified and unifying technique in addressing a wide range of environmental problems. Papers presented in this book discuss issues ranging from specific and local studies (specific site, ecosystem, pollutant) to global decision and management frameworks (watersheds, regions, integration of multiple pollutants and stressors). They develop a range of approaches starting from specific methods to widely applied public policies. Figure 1. The papers show that the use of risk assessment can provide the scientific basis for environmentally sound and cost-efficient policies, strategies and solutions to our environmental challenges. The organization of the Proceedings reflects sessions and discussions during the workshop. The papers in the introductory Chapter summarize the positions of Drs. Glenn Suter (EPA) and Jim Wilson (Resources for the Future) regarding whether the use of often expensive risk assessments in developing countries can be justified given evolving regulatory institutions and limited resources.

Handbook of Environmental Risk Assessment and Management Peter P. Calow, 2009-07-08 At the heart of environmental protection is risk assessment: the likelihood of pollution from accidents, the likelihood of problems from normal and abnormal operation of industrial processes, the likely impacts associated with new synthetic chemicals and so on. Currently, risk assessment has been very much in the news: the risks from BSE and E. coli and the public perception of risks from nuclear waste etc. This new publication explains how scientific methodologies are used to assess risk from human activities and the resultant effects on people and the environment. Understanding such risks supplies crucial information to frame legislation, manage major habitats, businesses and industries and create development programmes. Unique in combining the science of risk assessment with the development of management strategies. Covers science and social science, politics, economics, psychology aspects. Very timely risk assessment lies at the heart of decision-making in various topical environmental questions: BSE, Bhopal, nuclear waste.

The Cognitive Psychology of Climate Change Patrik Sörqvist, John E. Marsh, 2019-09-19 Climate change is one of society s great challenges The scientific community agrees that human activity is to a large degree responsible for these changes and efforts to promote more sustainable behaviors and lifestyles often backfire People travel for longer distances when driving a vehicle that uses a sustainable energy source they purchase organic food as a means to be environmentally friendly without necessarily reducing other means of consumption and those who deliberately change their behavior to be more environmentally friendly in one area often start behaving environmentally irresponsibly in another Environmentally harmful behavior and decision making often have their roots in cognitive biases and cognitive inabilities to properly understand climate change issues to understand the effects of one s own behavior on the environment and other means by which thinking and reasoning about climate change issues are biased

Renaud, Karen Sudmeier-Rieux, Marisol Estrella, 2013 The uptake of ecosystem based approaches for disaster risk reduction DRR is slow however despite some success stories There are multiple reasons for this reluctance ecosystem management is rarely considered as part of the portfolio of DRR solutions because the environmental and disaster management communities typically work independently from each other its contribution to DRR is highly undervalued compared to engineered solutions and therefore not given appropriate budget allocations and there are poor interactions between policymakers and researchers leading to unclear and sometimes contradictory scientific information on the role of ecosystems for DRR The aim of this book is to provide an overview of knowledge and practice in this multidisciplinary field of ecosystems management and DRR The contributors professionals from the science and disaster management communities around the world represent state of the art knowledge practices and perspectives on the topic
