The Oxford Handbook of Environmental and Natural Resources Law in India Philippe Cullet,Lovleen Bhullar,Sujith Koonan,2024-07-12 Environmental law is a broad discipline covering issues such as nature conservation the prevention or abatement of pollution and waste management It also encompasses concerns related to natural resources such as forests minerals and fisheries and the balance between their use and conservation India has been at the forefront of jurisprudential developments among countries with similar environmental geographical socio economic and cultural conditions Concurrently the country has been receptive to ideas and principles arising from other parts of the world or from international law The growth of environmental and natural resources law in India has been sustained in equal measure by growing environmental awareness and the increasingly dire nature of the problems associated with the environment and natural resources ranging from local issues to the global climate crisis At the same time the continuous push for development has not abated leading to recurrent pressure to weaken existing standards for environmental protection and the management and use of natural resources The Oxford Handbook of Environmental and Natural Resources Law in India offers the most comprehensive coverage of the diverse and complex discipline of environmental and natural resources law in India over the past fifty years With forty two contributions from law and non law scholars the Handbook presents diverse perspectives on several areas including biodiversity climate change water forests agriculture health resource extraction and industrial development By departing from the existing approach that examines natural resources law and environmental law separately

The Oxford Handbook of Environmental and Natural Resources Law in India offers a much needed integrated analysis of the development of domestic jurisprudence vis vis the environment and natural resources *Natural Resources Policy and Law* Lawrence J. MacDonnell, Sarah F. Bates, 1993 Lawrence J MacDonnell is director and Sarah F Bates is associate director of the Natural Resources Law Center at the University of Colorado School of Law Bates is co author with Marc Reisner of *Overtapped Oasis* **Environmental and Natural Resources Law** Eric Pearson (Professor), 2002 *Resource Careers* Robert Kutler, 1979 Over 20 separate articles offering insights into the nature of the practice career options recommended legal courses what to include on a resume are presented in this work **Nature's Trust** Mary Christina Wood, 2014 This book exposes the dysfunction of environmental law and offers a transformative approach based on the public trust doctrine An ancient and enduring principle the public trust doctrine empowers citizens to protect their inalienable property rights to crucial resources This book shows how a trust principle can apply from the local to global level to protect the planet

Research Handbook on International Law and Natural Resources Elisa Morgera, Kati Kulovesi, 2016-11-25 Research Handbook on International Law and Natural Resources provides a systematic and comprehensive analysis of the role of international law in regulating the exploration and exploitation of natural resources It illuminates interactions and tensions between international environmental law human rights law and international economic law It also discusses the relevance of soft law international dispute settlement as well as of various unilateral bilateral regional and transnational initiatives in the governance of natural resources While the Handbook is accessible to those approaching the subject for the first time it identifies pressing areas for further investigation that will be of interest to advanced researchers **Natural Resources and the Environment** Mark Kanazawa, 2021-05-18 Natural Resources and the Environment Economics Law Politics and Institutions provides a new approach to the study of environmental and natural resource economics It augments current contributions from the fields of public choice law and economics and the burgeoning field of what used to be called the New Institutional Economics to describe explain and interpret how these new developments have been applied to better understand the economics of natural resources and the environment This textbook takes a multi disciplinary approach which is essential for understanding complex environmental problems and examines the issue from not only an economic perspective but also taking into account law politics and institutions In doing so it provides students with a realistic understanding of how environmental policy is created and presents a comprehensive examination of real world environmental policy The book provides a comprehensive coverage of key issues including renewable energy climate change agriculture water resources land conservation and fisheries with each chapter accompanied by learning resources such as recommended further reading discussion questions and exercises This textbook is essential reading for students and scholars seeking to build an interdisciplinary understanding of natural resources and the environment *Emerging Environmental Law Issues* , 1991 **Environmental and Natural Resources Law** Eric Pearson (jurist.), 2002 *Globalisation and*

Natural Resources Law Elena Blanco, Jona Razzaque, 2011-01-01 This book is a very welcome addition to publications on globalisation and natural resources management. It adopts a very broad approach to this important subject; it includes the general issues such as trade and investment. It deals with very complex questions of permanent sovereignty over natural resources, the right to development, the role of indigenous peoples in resource management. This publication also provides the reader with general underlying principles and approaches to natural resources management such as sustainable use, the precautionary principle, the principle of common but differentiated responsibilities and the ecosystem approach, regulatory approach etc. The book is very analytical and gives a lot of food for thought for readers. Malgosia Fitzmaurice, Queen Mary University of London, UK. The book is the first of its kind to deal in depth with complex cross-cutting issues relating to globalization and natural resources. The authors demonstrate not only a broad range of knowledge but also provides deep insights into what will be needed to make the transition from economic globalization to sustainable globalization, including improved resource efficiency and sustainable development and inclusive and participatory governance. In particular, the authors consider specific approaches in such sectors as water resources, renewable energy and biological resources. The book has carefully documented and analyzed numerous international, regional and national legal frameworks as well as relevant theories and principles. It is a must for every law library as well as for policy makers, administrators, academics, non-governmental bodies and civil societies. We owe a great debt to the authors for their painstaking comprehensive research. Koh Kheng Lian, National University of Singapore. Globalization as a means of aptly capturing political, social, cultural and above all else economic phenomena has been well documented and the subject of a multitude of comment. What has perhaps been less well studied is its relationship with natural resource management. Thus this work by Merino Blanco and Razzaque is to be commended. Moreover, by focusing on globalization, an important truth is revealed. It is neither about the diminution of the role of the State nor the ascendancy of the multinational corporation but rather a more nuanced and complex interaction which we are only beginning to appreciate. This book is an important contribution to that debate. Duncan French, University of Sheffield, UK. While sustainable development requires State regulation of the exploitation of natural resources, globalisation as originally conceived pushed for free and unfettered markets, creating a fundamental tension between the two approaches. This book attempts to find a way towards their reconciliation with inspiring results. The book explores many themes, especially how globalisation may contribute to the solution of the problems it has caused by helping to empower non-state actors around the world so that the international decision-making processes become more inclusive, transparent and oriented towards sustainable development. Ximena Fuentes, Universidad Alonso Ibanez, Chile and ILA Co-Rapporteur on the Commission on Sustainable Development. This book examines the complex relationships between trade, human rights and the environment within natural resources law. It discusses key theories and challenges whilst exploring the concepts and approaches available to manage crucial natural resources in both developed and developing countries. Primarily aimed at

undergraduates and postgraduates it includes exercises questions and discussion topics for courses on globalisation and or natural resources law as well as an ample bibliography for those interested in further research The book will therefore serve as an invaluable reference tool for academics researchers and activists alike *Comparative Environmental and Natural Resources Law* Sandra Beth Zellmer,2013 With increasing globalization comparative law has become increasingly more relevant in recent years Climate change transboundary pollution biodiversity loss and the emerging field of environmental human rights make comparative environmental law especially compelling This coursebook provides a comparative look at environmental and natural resource laws governing water waste biological diversity wildlife and habitat and environmental assessment It focuses on the United States Canada England New Zealand and India The first four countries are chosen for comparative analysis because of their common cultural roots yet divergent environmental problems and strategies The first three countries the U S Canada and England have taken media specific and somewhat fragmented approaches to water waste and wildlife issues while New Zealand has made path breaking efforts to adopt a more holistic ecosystem based approach to pollution prevention and sustainable development The fifth nation India is a country deeply influenced by England but charting its own course as an emerging economic giant whose growth poses significant implications for biological diversity climate and the environment The book is suitable as a text for law classes and seminars as well as other types of graduate and undergraduate courses It includes case studies on specific environmental and resource management problems to enable students to take a hands on problem solving approach and to compare and contrast outcomes under the laws of various nations Reimagining Environmental and Natural Resources Law ,2021 In ELI s 50th anniversary year we undertook a project in partnership with the Environmental and Energy Law Program at George Washington University School of Law to review the state of environmental law and reimagine what law might need to look like in the years ahead if we are to achieve a more sustainable future Key to this endeavor were several meetings that we convened of natural resources legal scholars and leaders from the community of practitioners to discuss the critical issues that will define the next 50 years of environmental and natural resources law starting with convenings at the Wingspread Conference Center in Racine Wisconsin in March 2019 and at Airlie House Conference Center in Warrenton Virginia in November 2019 Page 2

Environmental and Natural Resources Law Oregon State Bar. Continuing Legal Education,2002 **Texas Practice** Jeff Civins, *The Evolution of Natural Resources Law and Policy* Lawrence J. MacDonnell,Sarah F. Bates,2010 Natural resources law is a dynamic field of practice with a rich history that reaches back several centuries The authors look at current challenges and offer ideas about the future while demonstrating that the federal government s role continues to be a complex one as markets and private actors become more visible participants in the current policy arena Part I provides foundational analyses of the law while the second part reviews thematic issues in the area **Environmental Law Codification in China** Xiaobo Zhao,Noeleen McNamara,Gu Gong,Kaijie Wu,2025-09-26 This book emerges from a series of

research seminars and projects conducted over seven years at prestigious Chinese law schools and environmental research institutes focusing on the formulation of an Environmental Code in China Contributors many of whom have participated in these seminars and published in leading Chinese law journals provide readers with an insightful and comprehensive guide to this significant endeavor The primary objective of this book is to analyze the multifaceted aspects of environmental law codification in China against its unique legal social and political backdrop and its far reaching impacts on environmental governance in the country It delves into the necessity and methodologies of developing an environmental code tailored to China s specific environmental challenges offering insider perspectives on procedural and substantive issues related to environmental law codification This includes reviewing the theoretical underpinnings such as the necessity and feasibility of codifying environmental laws as well as discussing the structure and coverage of the proposed Environmental Code Moreover the book explores the interplay between the proposed environmental code and existing national laws such as the Constitution Civil Code Criminal Code and the prospective Administrative Code of China It examines key issues such as environmental rights ecological and environmental liability and low carbon development within the context of the proposed Environmental Code With contributions from counselors and judges of Chinese environmental courts this book is positioned as an authoritative resource for environmental researchers and judges in this field

New Ground John R. Nolon, 2003 *New Ground* The Advent of Local Environmental Law presents a collection of papers examining local environmental law and its strategic role in shaping an appropriate response to a new generation of environmental and land use challenges Contributors are distinguished scholars and practitioners who have written casebooks and articles on land use and environmental law served in federal state and local administrations or national bar and planning association committees or prepared national treatises on the subject

Net Zero and Natural Resources Law, 2024-09-05 States corporations and other actors worldwide have committed to measures aimed at bringing down global emissions to net zero by the year 2060 or earlier While the need for a clean energy transition is clear incoherently designed transition programs can pose complex environmental social and governance risks including legal liability and protracted disputes At the same time the rush for minerals needed to manufacture clean energy technologies raises fundamental questions most crucially how to ensure the exploration and development of energy transition minerals in a manner that does not exacerbate resource conflicts resource nationalism human rights violations protectionism energy insecurity social exclusions and inequity especially in conflict affected and high risk regions By studying the legal and regulatory systems of Africa Asia Europe Australasia and North and South America through the themes of sovereignty security and solidarity *Net Zero and Natural Resources Law* provides an in depth discussion of tools and techniques for addressing the legal and contract risks relating to the clean energy transition This book offers a comprehensive and authoritative account of the nature scope and guiding principles of natural resources law and policy in a net zero era Consideration is given to the integrated resource governance roadmap that is needed to

improve coherence and coordination in the design financing and implementation of energy transition programs across the entire natural resource value chain
