Environmental Anthropology:

Environmental Anthropology Patricia K. Townsend, 2017-11-10 Environmental anthropologists organize the realities of interdependent lands plants animals and human beings advocate for the neediest among them and provide guidance for conservation efforts But can anthropologists studies of small scale systems contribute to policies that address profoundly interconnected global problems Townsend explores this question in her concise introduction to environmental anthropology While maintaining the structure and clarity of previous editions the third edition has been thoroughly revised to include new research Newly added are a chapter on the environmental impact of war and recommended readings and films Townsend begins with a historical overview of the field illustrating how earlier ideas and approaches help to understand how today s populations adapt to their physical and biological environments She then transitions to a closer look at global environmental issues including such topics as rapid expansion of the world economic system and inequality loss of biodiversity and its implications for human health and injustices of climate change resource extraction and toxic waste disposal The final chapters caution that meaningful change requires social movements and policy changes in addition to individual actions

Environmental Anthropology Michael Bollig, Franz Krause, 2023-09-04 Wie interagieren Menschen mit ihren Umwelten Wie beeinflussen sie den Verlust und Erhalt der biologischen Vielfalt den Klimawandel die Umweltverschmutzung und den Umweltschutz Das Buch f hrt Studierende in die Forschung und Praxis der Umweltanthropologie ein stellt aktuelle Schl sselkonzepte Anwendungsbereiche und Debatten vor und beleuchtet zentrale sozial kologische Themen Environmental Anthropology Michael R. Dove, Carol Carpenter, 2008 Environmental Anthropology A Reader is a collection of historically significant readings dating from early in the twentieth century up to the present on the cross cultural study of relations between people and their environment Provides the historical perspective that is typically missing from recent work in environmental anthropology Includes an extensive intellectual history and commentary by the volume s editors Offers a unique perspective on current interest in cross cultural environmental relations Divided into five thematic sections 1 the nature culture divide 2 relationship between environment and social organization 3 methodological debates and innovations 4 politics and practice and 5 epistemological issues of environmental anthropology Organized into a series of paired papers which speak to each other designed to encourage readers to make connections that they might not customarily make

Environmentalism and Cultural Theory Kay Milton, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company **Environmental Anthropology Today** Helen Kopnina, Eleanor Shoreman-Ouimet, 2011-08-05 This collection offers a wide ranging consideration of the field which illustrates how environmental anthropology can increase our understanding and help find solutions to environmental problems *Routledge Handbook of Environmental Anthropology* Helen Kopnina, Eleanor Shoreman-Ouimet, 2016-08-12 Environmental Anthropology studies historic and present human environment interactions This volume illustrates the ways in which today s environmental anthropologists are constructing

new paradigms for understanding the multiplicity of players pressures and ecologies in every environment and the value of cultural knowledge of landscapes This Handbook provides a comprehensive survey of contemporary topics in environmental anthropology and thorough discussions on the current state and prospective future of the field in seven key sections As the contributions to this Handbook demonstrate the subfield of environmental anthropology is responding to cultural adaptations and responses to environmental changes in multiple and complex ways As a discipline concerned primarily with human environment interaction environmental anthropologists recognize that we are now working within a pressure cooker of rapid environmental damage that is forcing behavioural and often cultural changes around the world As we see in the breadth of topics presented in this volume these environmental challenges have inspired renewed foci on traditional topics such as food procurement ethnobiology and spiritual ecology and a broad new range of subjects such as resilience nonhuman rights architectural anthropology industrialism and education This volume enables scholars and students quick access to both established and trending environmental anthropological explorations into theory methodology and practice

Power in Conservation Carol Carpenter, 2020-05-11 This book examines theories and ethnographies related to the anthropology of power in conservation Conservation thought and practice is power laden conservation thought is powerfully shaped by the history of ideas of nature and its relation to people and conservation interventions govern and affect peoples and ecologies This book argues that being able to think deeply particularly about power improves conservation policy making and practice Political ecology is by far the most well known and well published approach to thinking about power in conservation This book analyzes the relatively neglected but robust anthropology of conservation literature on politics and power outside political ecology especially literature rooted in Foucault It is intended to make four of Foucault's concepts of power accessible concepts that are most used in the anthropology of conservation the power of discourses discipline and governmentality subject formation and neoliberal governmentality The important ethnographic literature that these concepts have stimulated is also examined Together theory and ethnography underpin our emerging understanding of a new Anthropocene shaped world This book will be of great interest to students and scholars of conservation environmental anthropology and political ecology as well as conservation practitioners and policy makers

Environmental Anthropology
Engaging Ecotopia Joshua Lockyer, James R. Veteto, 2013-04-01 In order to move global society towards a sustainable ecotopia solutions must be engaged in specific places and communities and the authors here argue for re orienting environmental anthropology from a problem oriented towards a solutions focused endeavor Using case studies from around the world the contributors scholar activists and activist practitioners examine the interrelationships between three prominent environmental social movements bioregionalism a worldview and political ecology that grounds environmental action and experience permaculture a design science for putting the bioregional vision into action and ecovillages the ever dynamic settings for creating sustainable local cultures

Environmental Anthropology Helen Kopnina, Eleanor

Shoreman-Ouimet,2013-07-18 This volume presents new theoretical approaches methodologies subject pools and topics in the field of environmental anthropology Environmental anthropologists are increasingly focusing on self reflection not just on themselves and their impacts on environmental research but also on the reflexive qualities of their subjects and the extent to which these individuals are questioning their own environmental behavior Here contributors confront the very notion of natural resources in granting non human species their subjectivity and arguing for deeper understanding of nature and wilderness beyond the label of ecosystem services By engaging in interdisciplinary efforts these anthropologists present new ways for their colleagues subjects peers and communities to understand the causes of and alternatives to environmental destruction This book demonstrates that environmental anthropology has moved beyond the construction of rural small group theory entering into a mode of solution based methodologies and interdisciplinary theories for understanding human environmental interactions It is focused on post rural existence health and environmental risk assessment on the realm of alternative actions and emphasizes the necessary steps towards preventing environmental crisis **Environmental**

Anthropology Patricia K. Townsend,2008-06-25 Environmental anthropologists organize the realities of interdependent lands plants animals and human beings advocate for the neediest among them and provide understandings that preserve what is needed for the survival of a diverse world Can the things that anthropologists have learned in their studies of small scale systems have any relevance for developing policies to address global problems Townsend explores this dilemma in her captivating concise exploration of environmental anthropology and its place among the disciplines subfields Maintaining the structure and clarity of the previous edition the second edition has been revised throughout to include new research expanded discussions of climate change and a chapter devoted to spiritual ecology In the historical overview of the field Townsend shows how ideas and approaches developed earlier are relevant to understanding how todays local populations adapt to their physical and biological environments She next presents a closer look at global environmental issuesrapid expansion of the world economic system disease and poverty the loss of biodiversity and its implications for human healthto demonstrate the effects of interactions between local and global communities As a capstone she gives thoughtful consideration to how as professionals and as individuals we can move toward personal engagement with environmental problems

Environmental Anthropology Today Helen Kopnina,Eleanor Shoreman-Ouimet,2011-08-05 Today we face some of the greatest environmental challenges in global history Understanding the damage being done and the varied ethics and efforts contributing to its repair is of vital importance This volume poses the question What can increasing the emphasis on the environment in environmental anthropology along with the science of its problems and the theoretical and methodological tools of anthropological practice do to aid conservation efforts policy initiatives and our overall understanding of how to survive as citizens of the planet Environmental Anthropology Today combines a range of new ethnographic work with chapters exploring key theoretical and methodological issues and draws on disciplines such as

sociology and environmental science as well as anthropology to illuminate those issues The case studies include work on North America Europe India Africa Asia and South America offering the reader a stimulating and thoughtful survey of the work currently being conducted in the field

People and Nature Emilio F. Moran, 2009-02-04 This book provides a lively and thoughtful introduction to ecological anthropology by examining the evolving relations between human communities and nature Written by a noted anthropologist geographer and environmental scientist Reviews the evolution of human interactions with the natural world drawing from anthropology and geography Explores those aspects of human ecological relations that seem to account for the greater connectedness of certain societies to their physical environment Offers a vision for improved relations between humans and nature

The Environment in Anthropology, Second Edition Nora Haenn, Richard Wilk, Allison Harnish, 2016-04-26 Presents ecology and current environmental studies from an anthropological point of view *The Environment in Anthropology* presents ecology and current environmental studies from an anthropological point of view From the classics to the most current scholarship this text connects the theory and practice in environment and anthropology providing readers with a strong intellectual foundation as well as offering practical tools for solving environmental problems Haenn Wilk and Harnish pose the most urgent questions of environmental protection How are environmental problems mediated by cultural values What are the environmental effects of urbanization When do environmentalists' goals and actions conflict with those of indigenous peoples How can we assess the impact of environmentally correct businesses They also cover the fundamental topics of population growth large scale development

biodiversity conservation sustainable environmental management indigenous groups consumption and globalization This revised edition addresses new topics such as water toxic waste neoliberalism environmental history environmental activism and REDD Reducing Emissions from Deforestation and Forest Degradation and it situates anthropology in the multi disciplinary field of environmental research It also offers readers a guide for developing their own plan for environmental action This volume offers an introduction to the breadth of ecological and environmental anthropology as well as to its historical trends and current developments Balancing landmark essays with cutting edge scholarship bridging theory and practice and offering suggestions for further reading and new directions for research The Environment in Anthropology continues to provide the ideal introduction to a burgeoning field *Sustaining Natures* Sarah R. Osterhoudt, K.

Sivaramakrishnan, 2023-06-20 Environmental anthropology is at its best when firmly grounded in respectful and systematic ethnographic research and writing that spotlights uncommon perspectives on widely recognized issues confronting the world Intentionally crafted for undergraduate course use in anthropology geography and environmental studies Sustaining Natures showcases the best contemporary writing on nature and sustainability With concise introductions and sample discussion questions the editors guide readers through some of the field's most pressing themes and debates including farming alternative energy extractive industries environmental justice multispecies relationships and urban ecology This timely reader foregrounds diverse voices views and experiences of nature from US corporate boardrooms to urban waste disposal sites in China and moves environmental anthropology in new theoretical methodological and applied terrains *The Anthropology of Climate Change* Michael R. Dove, 2013-12-24 This timely anthology brings together for the first time the most important ancient medieval Enlightenment and modern scholarship for a complete anthropological evaluation of the relationship between culture and climate change Brings together for the first time the most important classical works and contemporary scholarship for a complete historical anthropological evaluation of the relationship between culture and climate change Covers the historic and prehistoric records of human impact from and response to prior periods of climate change including the impact and response to climate change at the local level Discusses the impact on global debates about climate change from North South post colonial histories and the social dimensions of the science of climate change Includes coverage of topics such as environmental determinism climatic events as social catalysts climatic disasters and societal collapse and ethno meteorology An ideal text for courses in climate change human cultural ecology environmental anthropology and archaeology disaster studies environmental sciences science and technology studies history of science and conservation and development studies **A Companion to the Anthropology of Environmental Health** Merrill Singer, 2016-04-27 A Companion to the Anthropology of Environmental Health presents a collection of readings that utilize a medical anthropological approach to explore the interface of humans and the environment in the shaping of health and illness around the world Features the latest ethnographic research from around the world related to the multiple impacts of

the environment on health and of societies on their environments Includes contributions from international medical anthropologists conservationists environmental experts public health professionals health clinicians and other social scientists Analyzes the conditions of cultural and social transformation that accompany environmental and ecological impacts in all areas of the world Offers critical perspectives on theoretical and methodological advancements in the anthropology of environmental health along with future directions in the field

Climate, Capitalism and Communities Astrid B. Stensrud, Thomas Hylland Eriksen, 2019-07-20 Until now the growing body of work on environmental anthropology has largely ignored the unavoidable impact of global capitalism on the environment and the extent to which capital itself is a key driver of climate change Climate Capitalism and Communities focuses explicitly on that nexus examining the injustices and inequalities as well as the activist responses that have arisen as a result and the contradictions between the imperatives of exponential economic growth and those of environmental sustainability and society as a whole Bringing an innovative ethnographic toolkit to bear on a crisis that is at once global and highly localised the authors shift attention away from the consequences of climate change to a focus on the social relations and power structures that continue to prevent effective action

The Environment in Anthropology Nora Haenn, Richard Wilk, 2006 Presenting ecology and current environmental studies from an anthropological point of view this book gives readers a strong intellectual foundation as well as offering practical tools for solving environmental problems

The Logic of Environmentalism Vassos Argyrou, 2005 Although modernity's understanding of nature and culture has now been superseded by that of environmentalism the power to define the meaning of both and hence the meaning of the world itself remains in the same Western hands This bold argument is at the center of this provocative book that challenges the widespread assumption that environmentalism reflects a radical departure from modernity Our perception of nature may have changed the author maintains but environmentalism remains a thoroughly modernist project It reproduces the cultural logic of modernity a logic that finds meaning in unity and therefore strives to efface difference and to reconfirm the position of the West as the source of all legitimate signification
