**Environmental Education** Ian Robottom, 1987 Produced for unit ECT317 offered by the School of Education in Deakin University's Open Campus Program      **Environmental Problem Solving** Martha C. Monroe, Lisa V. Bardwell, Margaret T. Tudor, 1994 This monograph is a resource for educators who wish to explore environmental problem solving It consists of five parts Chapter 1 presents a psychological perspective on problem solving and its implications for teaching problem solving skills in an interdisciplinary arena Chapter 2 presents four approaches to developing environmental problem solving abilities developed by several environmental education practitioners and researchers in North America and Australia The editors commentary ties these models to the themes raised in Chapter 1 Chapter 3 is a discussion of some of the common strands in the experiences of environmental education practitioners Members of the North American Association for Environmental Education contributed to this analysis which also parallels the themes raised in the first chapter Chapter 4 provides classroom activities that teachers could use to supplement their exploration of local environmental issues The Appendix contains descriptions of the programs used to compile Chapter 3 JRH      Environmental Education and Advocacy Edward A. Johnson, Michael J. Mappin, 2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers      *Environmental Education*, 2008-01-01 In *Environmental Education Identity Politics and Citizenship* the editors endeavor to present views of environmental educators that focus on issues of identity and subjectivity and how narrated lives relate to questions of learning education politics justice and citizenship What is distinctive about this collection is that it highlights the views of Latin American scholars alongside those of scholars from Spain Canada New Zealand Taiwan South Africa Australia and U S The result is a philosophically nuanced reading of the complexities of environmental education that begins to reshape the landscape in terms of ethics ontology epistemology and politics The collection bears the stamp of the location of its contributors and strongly reflects an activist qualitative and ethnographic orientation that emphasizes the ground for action the identity of environmental actors and the contribution that education in all its forms can make to sustainability and the cause of the environment At the same time contributors go beyond simple slogans and ideologies to question the accepted truths of this rapidly emerging field Cover picture Edgar Gonz lez Gaudiano Siem Reap

Cambodia December 2007      *Routledge International Companion to Education* Miriam Ben-Peretz, Sally Brown, Bob Moon, 2004-04-28 The Routledge International Companion to Education addresses the key issues underpinning the rethinking and restructuring of education at the beginning of the new millennium The volume contains over fifty major contributions exploring a wide range of issues including philosophy of education the economics and resourcing of education testing and assessment current issues and future prospects standards multiculturalism anti racism computers in classrooms mother tongue education civics and moral education Each chapter gives a contemporary account of developments in the field and looks to the future and the directions that new activity and inquiry are likely to take All the chapters are written from an international perspective      **Environmental Education in the 21st Century** Joy Palmer, 2002-09-11 Environmental education is a field characterised by a paradox Few would doubt the urgency and importance of learning to live in sustainable ways but environmental education holds nowhere near the priority position in formal schooling around the world that this would suggest This text sets out to find out why this is so It is divided into six parts Part 1 is a concise history of the development of environmental education from an international perspective Part 2 is an overview of the global agenda or subject knowledge of environmental education Part 3 introduces perspectives on theory and research in environmental education Part 4 moves on to practice and presents an integrated model for planning environmental education programmes Part 5 brings together invited contributors who talk about environmental education in their own countries from 15 countries including China South Africa Sri Lanka and the USA Part 6 returns to the core questions of how progress can be made and how we can maximise the potential of environmental education for the twenty first century      *Environment, Education and Society in the Asia-Pacific* John Fien, Helen Sykes, David Yencken, 2003-09-02 This important book explores the interaction of global environmental discourses and local traditions and practices in twelve countries in the Asia Pacific region Based upon two parallel groups of studies reviewing cultural influences in individual countries and the attitudes of young people across the region it has important implications for environmental policy and education      International Handbook of Research on Environmental Education Robert B. Stevenson, Michael Brody, Justin Dillon, Arjen E.J. Wals, 2013-05-02 The environment and contested notions of sustainability are increasingly topics of public interest political debate and legislation across the world Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment health development and education The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education EE field The purpose of this 51 chapter handbook is not only to illuminate the most important concepts findings and theories that have been developed by EE research but also to critically examine the historical progression of the field its current debates and controversies what is still missing from the EE research agenda and where that agenda might be headed Published for the American Educational Research Association AERA      Engaging Environmental Education , 2010-01-01 As more attention is devoted to the increasing and complex socio

ecological issues facing the planet new insights and new ways of thinking are being sought about the learning and agency of children and adults in relation to these environmental concerns The contributors to this book address the critically important dual challenge of making environmental education engaging while engaging individuals institutions and communities Rather than treating students and citizens as passive recipients of other people s knowledge the book highlights the importance of engaging learners as active agents in thinking about and constructing a more sustainable and equitable quality of life The case studies emphasize socio cultural approaches to environmental learning within and outside formal education in a diverse range of international contexts including Canada Denmark Korea the Netherlands South Africa Sweden the United Kingdom and the United States The authors not only illuminate the challenges and complexity of engaging youth and adults in meaningful learning as well as informed action on complex environmental issues but also document and offer important insights into promising ways in which these challenges might be addressed In addition to the many stimulating ideas and strategies for building the learning capacities of individuals and organizations for creating ecologically sustainable communities and societies further important questions are raised that educators policymakers and researchers might consider

**Environment Research Agenda** A. Winnett, 2002-12-13 This is the second volume of papers in the topical area of environmental management arising from work done by the International Centre for the Environment at the University of Bath. The papers address interdisciplinary environmental themes particularly from a business and management perspective.

The SAGE Handbook of Curriculum, Pedagogy and Assessment Dominic Wyse, Louise Hayward, Jessica Pandya, 2015-12-03 The research and debates surrounding curriculum pedagogy and assessment are ever growing and are of constant importance around the globe. With two volumes containing chapters from highly respected researchers whose work has been critical to understanding and building expertise in the field, The SAGE Handbook of Curriculum Pedagogy and Assessment focuses on examining how curriculum is treated and developed and its impact on pedagogy and assessment worldwide. The Handbook is organised into five thematic sections considering the epistemology and methodology of curriculum, Curriculum and pedagogy, Curriculum subjects, Areas of the curriculum, Assessment and the curriculum, The curriculum and educational policy. The SAGE Handbook of Curriculum Pedagogy and Assessment's breadth and rigour will make it essential reading for researchers and postgraduate students around the world.

**Sustainability in Energy and Buildings** Nacer M'Sirdi, Aziz Namaane, Robert J. Howlett, Lakhmi C Jain, 2012-01-15 Welcome to the proceedings of the Third International Conference on Sustainability in Energy and Buildings SEB 11 held in Marseilles in France, organised by the Laboratoire des Sciences de l'Information et des Systèmes LSIS in Marseille, France, in partnership with KES International. SEB 11 formed a welcome opportunity for researchers in subjects related to sustainability, renewable energy technology and applications in the built environment to mix with other scientists, industrialists and stakeholders in the field. The conference featured presentations on a range of renewable energy and sustainability-related topics. In addition, the conference explored two innovative themes: the application of intelligent sensing, control, optimisation and modelling techniques to sustainability and the technology of sustainable buildings. These two themes combine synergetically to address issues relating to The Intelligent Building. SEB 11 attracted a significant number of submissions from around the world. These were subjected to a two-stage blind peer review process. With the objective of producing a high quality conference, only the best 50 or so of these were selected for presentation at the conference and publication in the proceedings. It is hoped that you will find this volume an interesting, informative and useful resource for your research.
