Kraft, Sheldon Kamieniecki, 2007 It is well known that American businesses make an effort to influence environmental policy by attempting to set the political agenda and to influence regulations and legislation This book examines what is not so well known the extent to which business succeeds in its policy interventions In *Business and Environmental Policy* a team of distinguished scholars systematically analyzes corporate influence at all stages of the policy process focusing on the factors that determine the success or failure of business lobbying in Congress state legislatures local governments federal and state agencies and the courts These experts consider whether business influence is effectively counterbalanced by the efforts of environmental groups public opinion and other forces The book also examines the use of the media to influence public opinion as in the battle over drilling in the Arctic National Wildlife Refuge and corporations efforts to sway elections by making campaign contributions Because the book goes well beyond the existing literature much of which is narrow descriptive and anecdotal to provide broad based empirical evidence of corporate influence on environmental policy it makes an original and important contribution and is appropriate for a variety of undergraduate and graduate courses

*The New Environmental Regulation* Daniel J. Fiorino, 2006 Winner 2007 Louis Brownlow Award presented by the National Academy of Public Administration NAPA and 2006 Best Book in Environmental Management and Policy American Society for Public Administration Environmental regulation in the United

States has succeeded to a certain extent in solving the problems it was designed to address air water and land are indisputably cleaner and in better condition than they would be without the environmental controls put in place since 1970 But Daniel Fiorino argues in *The New Environmental Regulation* that given recent environmental economic and social changes it is time for a new more effective model of environmental problem solving Fiorino provides a comprehensive but concise overview of U S environmental regulation its history its rationale and its application and offers recommendations for a more collaborative flexible and performance based alternative Traditional environmental regulation was based on the increasingly outdated assumption that environmental protection and business are irreversibly at odds The new environmental regulation Fiorino describes is based on performance rather than on a narrow definition of compliance and uses such policy instruments as market incentives and performance measurement It takes into consideration differences in the willingness and capabilities of different firms to meet their environmental obligations and it encourages innovation by allowing regulated industries especially the better performers more flexibility in how they achieve environmental goals Fiorino points to specific programs including the 33 50 Program innovative permitting and the use of covenants as environmental policy instruments in the Netherlands that have successfully pioneered these new strategies By bringing together such a wide range of research and real world examples Fiorino has created an invaluable resource for practitioners and scholars and an engaging text for environmental policy courses
