Environmental Politics In Poland:

Environmental Politics in Poland Barbara E. Hicks, 1996 Michael Bernhard Pennsylvania State University **Change and Continuity in Poland's Environmental Policy** Andersson, 2013-03-14 *Capacity Building in National Environmental Policy* Helmut Weidner, Martin Jänicke, 2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building see Appendix The OECD defines environmental capacity building as a society's ability to identify and solve environmental problems While various institutions including UNEP FAO World Bank and OECD have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries we have extended the concepts to industrialized countries as well The first collection edited by Martin Jänicke Helge Joergens both Free University Berlin and Helmut Weidner Social Science Research Center Berlin was published in 1997 under the title *National Environmental Policies A Comparative Study of Capacity Building* Berlin etc Springer Verlag It included 13 studies of countries As in the first volume chapter I presents the conceptual framework underlying the national case studies It is a slightly shorter version of the corresponding chapter in volume I The design of all case studies in the two volumes is largely congruent with this conceptual framework Although the various sections of the studies do not always have identical titles and subtitles the central elements of the capacity building approach have been applied in all cases *Climate Policy in Denmark, Germany, Estonia and Poland* Franziska Ehnert, 2019 By opening a new dialogue between scholars of public policy and those of public administration *Climate Policy in Denmark Germany Estonia and Poland* offers a timely contribution to climate policy analysis This innovative book explores how and why policies are changed or continued by employing in depth studies from a diverse range of EU countries Analytical and accessible this explorative book will be of value to scholars and students of climate policy public policy and public administration as well as practitioners and policy makers *Environmental Politics in Poland* Barbara E. Hicks, 1992

OECD Rural Policy Reviews: Poland 2018 OECD, 2018-03-28 Poland has seen impressive growth in recent years and yet regional disparities in economic and social outcomes remain large by OECD standards The overall living conditions in rural communities generally remain below those of urban communities and rural households face higher poverty rates [Change and Continuity in Poland's Environmental Policy](#) Magnus Andersson, 2011-09-29 This book takes a long term view of environmental policy in Poland which thus serves as an example to increase our understanding of environmental policy making in general in the former Eastern bloc countries The perspective adopted also includes the pre transition period since the transformation process cannot be understood without reference to the preceding period The book investigates the driving forces underlying policy changes both prior to and after the transition and identifies elements both of change and continuity topics that have hitherto been neglected in the literature A change of political system in Poland did not lead to a major change in the thrust of environmental policy the policy makers adopted a cautious approach to new instruments and

institutions during the transition period What did change with the transition was the implementation aspect the effectiveness of environmental policy increased dramatically after the abolition of socialism The rule of law meant that the state administration and the polluters were subordinated to the legal system thus increasing the power to environmental policy Readership Researchers and students interested in the environment and the countries in transition

Climate Change Law and Policy Cinnamon Piñon Carlarne, 2010 Existing climate change governance regimes in the US and the EU contain complex mixtures of regulatory market voluntary and research based strategies The EU has adopted an approach to climate change that is based on mandatory greenhouse gas emission reductions it is grounded in hard law measures and accompanied by soft law measures at the regional and Member State level In contrast until recently the US federal government has carefully avoided mandatory emission reduction obligations and focused instead on employing a variety of soft measures to encourage rather than mandate greenhouse gas emission reductions in an economically sound market driven manner These macro level differences are critical yet they mask equally important transatlantic policy convergences The US and the EU are pivotal players in the development of the international climate change regime How these two entities structure climate change laws and policies profoundly influences the shape and success of climate change laws and policies at multiple levels of governance This book suggests that the overall structures and processes of climate change law and policy making in the US and the EU are intricately linked to international policy making and thus the long term success of global efforts to address climate change Accordingly the book analyses the content and process of climate change law and policy making in the US and the EU to reveal policy convergences and divergences and to examine how these convergences and divergences impact the ability of the global community to structure a sustainable effective and equitable long term climate strategy

Historical Dictionary of Poland George Sanford, 2003 Poland has had an exceptionally turbulent thousand year history marked by extremes of national greatness and decline including partition and foreign occupation Currently undergoing another dramatic transformation Poland has been building a democratic and market system since the fall of communism The largest and most important nation in Eastern Europe outside the ex Soviet Union is now returning to the European mainstream from which she was for long periods isolated politically and economically although not culturally Although Poland has been widely popularized in journalistic clichés in recent years because of Solidarity the Polish Pope and the like there is still much to be learned about the particular individuals and specific factors which have shaped her history in the past and which are molding her present development The dictionary strikes a judicious balance in covering past and contemporary figures as well as Poland s richly textured political social and cultural dimensions The Dictionary has

more than four hundred entries and a most comprehensive and up to date bibliography It provides a stimulating and knowledgeable introduction for students scholars and librarians as well as a helpful overview guide for tourists and for those involved in teaching business politics journalism and public service

Implementing Environmental Policies in Central and Eastern Europe Tomasz Żylicz,1993 Journal of Environmental Law and Litigation ,1998 **Climate and Energy Politics in Poland** Aleksandra Lis,2020-03-13 Climate and Energy Politics in Poland Debating Carbon Dioxide and Shale Gas presents a new object oriented perspective on the challenge faced by Poland the largest post socialist EU member state from Central and Eastern Europe CEE to produce knowledge about its energy system in the context of climate change Drawing on data from five different research projects and two hundred interviews Lis reflects on how EU accession forced Poland to mobilize their resources and produce expertise on carbon dioxide and shale gas in order to actively participate in the debates around EU climate change ambitions and goals A significant lack of capacity and expert institutions made it difficult for Poland to quickly assess the impacts of EU legislation or to propose new solutions for itself and it is precisely this struggle for knowledge production that will be examined during the course of the book This book will be of great interest to students and scholars of energy and resource politics climate change EU environmental policy and CEE studies more broadly
