Environmental Resource Valuation Applications Of The Contingent Valuation Method In Italy:

Environmental Resource Valuation Richard C. Bishop, Donato Romano, 2012-12-06 Economic values are increasingly used in policy analysis and legal settings With the growing recognition that many of the things that benefit or harm people are outside the market system have come increasing efforts to develop nonmarket valuation techniques One such technique is the contingent valuation method CVM CVM seeks to value environmental and other nonmarket goods and services by asking individuals about their values using survey methods These procedures are different from the revealed preference methods that economists have historically employed to estimate economic values Why depart from well established revealed preference procedures and apply a stated preference method like CVM For nonmarket goods and services revealed preference methods have two shortcomings that those applying CVM hope to avoid First revealed preference methods involve econometric problems that have yet to be fully overcome The second shortcoming of revealed preference methods is that such methods when applied to environmental amenities are likely to be only partial measures of value Given the tremendous interest that exists in economic values and the limitations of revealed preference methods it is not surprising that interest in CVM has grown rapidly *Environmental Resource Valuation* reviews the application of CVM and compares American experiences in nonmarket evaluation with those in other countries *Contingent Valuation* R. Carson, 2012-01-01 This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation It includes entries on over 7 500 contingent valuation papers and studies from over 130 countries covering both the published and grey literatures This book provides an interpretive historical account of the development of contingent valuation the most commonly used approach to placing a value on goods not normally sold in the marketplace The major fields catalogued here include culture the environment and health application This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material For those wanting to conduct meta analyses the book will serve as an invaluable guide to source material In addition to the print edition we offer access for purchasers of the book to a website providing the contents of as a searchable Word document and in a variety of standard bibliographic database forms *Contingent Valuation* is an indispensable reference source for researchers scholars and policymakers concerned with survey approaches to the problem of environmental valuation ***The Economic Value of the Environment*** Magnus Hardarson, Pall Hardarson, 2001 ***Coastal Structures 2007 (In 2 Volumes) - Proceedings Of The 5th Coastal Structures International Conference, Cst07*** Alberto Lamberti, Leopoldo Franco, Giuseppe Roberto Tomasicchio, 2009-06-09 Coastal Structures are undergoing renewal and innovation to better serve the needs of our society from environmental co existence and habitat enhancement to risk management The CSt07 conference is the fifth in a series that highlight significant progress in the innovation design and

agriculture, food, ecology B. Torquati,A. Marchini,2023-08-07 This book offers a wide selection of contributions presented at the LV Conference of Italian society of agricultural economics SIDEA Studies Agricultural economists and sociologists reflect on the change processes that are affecting the agri food systems and take a small step towards an improved understanding of the complexity of green metamorphosis and the interplay between agriculture food and ecology The key message is that a green metamorphosis has been taking place increasingly involving more and more aspects and dimensions from environment to consumers preferences from social value to human health from profitability to governance issues Furthermore this book tries to shed a light on the complexity of the new agricultural paradigm which involves technology as well as traditions trying to understand the ongoing metamorphosis taking into account that nothing is created nothing is destroyed everything is transformed This volume intends to guide the new generations of agricultural economists who have the hard task of leading the green metamorphosis across the four main axes of sustainability economic socio cultural environmental and political **Environmental Design Guidelines for Low Crested Coastal Structures** Stephen J.

Hawkins, Hans Falk Burcharth, Barbara Zanuttigh, Alberto Lamberti, 2010-07-07 The effect of manmade activities is primarily local but can extend far away from the location of intervention This underlines the importance of establishing coastal zone management plans covering large stretches of coastlines In recent years interest in Low Crested Structures coastal defense structures with a low crest has been growing together with awareness of the sensitivity to environmental impacts produced by coastal defenses The relation between wave climate beach erosion beach defence means habitat changes and beach value which clearly exists based on EC research results suggests the necessity of an integrated approach when designing coastal protection schemes In accordance with this need the present design guidelines cover structure stability and construction problems hydro and morphodynamic effects environmental effects colonisation of the structure and water quality societal and economic impacts recreational benefits swimming safety beach quality Environmental Design Guidelines for Low Crested Coastal Structures is specifically dedicated to Low Crested Structures and provides methodological tools both for the engineering design of structures and for the prediction of performance and environmental impacts of such structures A briefing of current best practice for local and national planning authorities statutory agencies and other stakeholders in the coastal zone is also covered Presented in a generic way this book is appropriate throughout the European Union taking into account current European Commission policy and directives for the promotion of sustainable development and integrated coastal zone management Fills the gap between engineering and ecology in coastal defense planning Shows the reader how to perform an integrated design of coastal defense schemes Presents latest insights on hydro morphodynamics induced by structures Provides directly applicable tools for the design of low crested structures Highlights socio economic perspectives in coastal defense design Cost-Benefit Analysis and the Environment Recent Developments OECD, 2006-01-30 An in depth assessment of the most recent conceptual and methodological developments in cost benefit analysis and the environment

Risk and Medical Decision Making Louis Eeckhoudt, 2012-12-06 For people interested in risk management medical activity represents a stimulating field of study and thought On the one hand progress in medical knowledge and technology tends to reduce the risks to survival that individuals would face in the absence of appropriate diagnostic or therapeutic instruments On the other hand new medical technologies simultaneously create their own specific risks sometimes simply because their effects are less well known than those of established ones In a sense any medical progress simultaneously generates new risks while destroying old ones Moreover unlike many financial risks that can be either divided or transferred to others e g through diversification insurance or social security the personal aspects of medical risks are by essence indivisible and non transferable As a result they are in a sense more threatening than financial risks for risk averse patients These two facts explain and justify the growing interest in risk economics for the fields of medical decision making and health economics In *Risk and Medical Decision Making* part 1 is developed inside the expected utility E U model and analyses how comorbidity risks affect the well known test treatment thresholds Part 2 is devoted to a specific non E U model with the same

purpose how would one define a threshold in this context and how would one value a diagnostic test In each of these two parts both diagnostic and therapeutic risks are considered Measuring the Value of Culture Jeanette D.

Snowball,2007-10-25 Interest in and acknowledgement of the value of culture and cultural goods is increasing world wide So too is interest in valuing the arts so that efficient funding decisions can be made by government and private sponsors

Measuring the Value of Culture documents the use of methods used to put a price on cultural goods including theatre heritage cultural events like arts festivals museums archaeological sites and libraries The methods discussed include economic impact studies which use market data as well as non market valuation techniques like willingness to pay methods and the newer choice experiments In addition advances in more qualitative valuation methods are considered The book aims to give practitioners a practical guide to conducting such valuation studies while also providing potential funders with a means of evaluating the results The theoretical background of the various methods their potential problems and the kind of information they can provide is also discussed *Stochastic Dominance* Haim Levy,2013-03-09 This book is devoted to

investment decision making under uncertainty The book covers three basic approaches to this process a The stochastic dominance approach developed on the foundation of von Neumann and Morgenstern expected utility paradigm 2 b The mean variance approach developed by Markowitz on the foundation of von Neumann and Morgenstern s expected utility or simply on the assumption of a utility function based on mean and variance c The non expected utility approach focusing on prospect theory and its modified version cumulative prospect theory This theory is based on an experimental finding that subjects participating in laboratory experiments often violate expected utility maximization They tend to use subjective probability beliefs that differ systematically from the objective probabilities and to base their decisions on changes in wealth rather than on total wealth The above approaches are discussed and compared in this book We also discuss cases in which stochastic dominance rules coincide with the mean variance rule and cases in which contradictions between these two approaches may occur We then discuss the relationship between stochastic dominance rules and prospect theory and establish a new investment decision rule which combines the two and which we call prospect stochastic dominance Although all three approaches are discussed most of the book is devoted to the stochastic dominance paradigm *Cultural Tourism and Sustainable Local Development* Luigi Fusco Girard,Peter Nijkamp,2016-12-05 With the exponential rise in leisure mobility

tourism has increasingly become of great economic significance Cultural heritage such as museums churches historical landscapes urban parks and exhibitions attract many visitors and countries regions and cities which house such historic cultural amenities have seen increasingly large waves of tourists While an avalanche of tourists has a positive impact on the local economy such modern mass tourism also brings about negative externalities such as congestion decline in quality of life low access to cultural amenities and loss of local identity to the extent that the sustainability conditions of a locality might be endangered This tourism dilemma is particularly pronounced in cities with a rich cultural past such as Venice Naples and

Amsterdam Bringing together an interdisciplinary team of leading scholars from North America and Europe this book examines the interface of local cultural resources and modern mass tourism from a sustainability perspective It puts forward innovative methodologies and best case practice for future cultural conservation policies
