defence into any stage of a non discrimination analysis The author establishes to what extent formal substantive and subjective approaches may be applied in a non discrimination analysis providing the reasons for the approaches taken A two step comparability procedure is applied to selected cases of potential tax discrimination demonstrating how policy arguments can be addressed under Article 24 of the OECD Model Drawing on over a half century of case law in both areas of practice this comprehensive study of the non discrimination rules under WTO law and international tax law will be invaluable in systematically solving cases of tax discrimination under Article 24 of the OECD Model and putting forward arguments at any stage of a WTO analysis Policymakers will benefit from the author s clear explanation of how national law should comply with international obligations Also taxpayers advisers will proceed confidently in claims of tax treaty discrimination and academics will discover an incomparable overview and analysis of anti discrimination rules in international trade law and double taxation conventions *Coherence and Divergence in Services Trade Law* Rhea Tamara Hoffmann,Markus

Krajewski,2020-07-23 This book addresses topical questions concerning the legal framework of trade in services and assesses how these issues are dealt with in GATS and in selected preferential trade agreements In addition the chapters discuss whether the differences and similarities if any are evidence of greater coherence or greater divergence The book combines the individual analyses to provide a more comprehensive picture of the current law on services trade liberalisation A quarter of a century after the conclusion of the General Agreement on Trade and Services GATS international law on trade in services is still in a state of flux on the one hand countries increasingly conclude bilateral and regional trade agreements with sections on trade in services that aim at a further liberalisation of services trade On the other the GATS structure remains the dominant model and serves as the basis for many preferential trade agreements In addition new aspects such as electronic commerce data protection and taxation are now emerging while issues that had already manifested in the mid 1990s such as financial services regulation labour mobility and telecommunications continue to be problematic Usually the debates focus on the question of whether preferential trade agreements serve as a stepping stone or stumbling block for trade liberalisation at the multilateral level However it can be assumed that rules on trade in services in preferential trade agreements will coexist with the global GATS regime for the foreseeable future This raises the question of whether we are currently witnessing a drive towards greater coherence or more divergence in agreements on trade in services *Global Warming and the World Trading System* Gary Clyde Hufbauer,Steve Charnovitz,Jisun Kim,2009-05-15 In 2006 a team led by the English economist Sir Nicholas Stern issued a striking report that analyzed the economic dimensions of global climate change and called for immediate collective action to reduce greenhouse gas GHG emissions This seminal report poses the critical question of how much emissions should be reduced within specific timeframes To answer the challenge of finding a best practices approach *Global Warming and the World Trading System* looks at the economic aspects of GHG emissions and seeks a policy method to reduce them without adversely affecting global trade The book begins with a survey of relevant data

such as emissions reports per sector and evaluates current US climate policy options focusing on the intricacies of specific Congressional bills In this vein this study examines whether the competitiveness provisions now under consideration are compatible with the rules of the World Trade Organization WTO and explores the pragmatic opportunities the WTO should capitalize on in order to accomplish two goals simultaneously ensure policy space for countries to limit national GHG emissions without sacrificing the competitive position of their own industries and preserve an open trading system relatively free of discrimination and opportunistic protectionist measures Should governments use trade measures to encourage other countries to cooperate in the adoption of environmental policies The authors anticipate the potential negative environmental and economic outcomes as well as the disputes over violation of GATT articles This book addresses how to avoid serious setbacks in an effort to reduce emissions without compromising the status of both domestic and international carbon intensive industries Most importantly the book considers what can be done by environmental organizations to head off conflict with the WTO

**Emissions Trading and WTO Law** Felicity Deane, 2015-02-27 Emissions Trading and WTO Law examines the global trade issues that arise as a result of the introduction of emissions trading frameworks The book focusses specifically on the rules of the WTO as a tool to demonstrate where the boundaries exist for a

*Environmental Taxation Law* John Snape, Jeremy de Souza, 2016-05-06 The theoretical arguments for environmental taxes and other types of economic instruments for environmental protection have been discussed extensively in the literature Rather less well discussed has been the extremely complex form that such instruments have in fact taken in practice Environmental Taxation Law Policy Contexts and Practice examines the legal implications of introducing environmental taxes and other economic instruments into the regulatory framework of UK law In doing so it analyzes and explains the difficulties of grafting environmental taxes onto the complexities of existing regulatory structures not all of which of course were originally devised with environmental considerations in mind Although the focus of the book is the UK's pioneering implementation of a web of distinct yet interrelated policy measures it locates the UK's taxes and instruments not simply in their broader context of market and environmental regulation but also in the contexts of European and international law
