Environmentalism Critical Concepts In The Environment And Physical Geography:

Guide to Reprints ,2009 *Key Concepts in Geography* Nicholas Clifford,Sarah Holloway,Stephen P Rice,Gill Valentine,2008-12-12 This book clearly outlines key concepts that all geographers should readily be able to explain It does so in a highly accessible way It is likely to be a text that my students will return to throughout their degree Dr Karen Parkhill Bangor University The editors have done a fantastic job This second edition is really accessible to the student and provides the key literature in the key geographical terms of scale space time place and landscape Dr Elias Symeonakis Manchester Metropolitan University An excellent introductory text for accessible overviews of key concepts across human and physical geography Professor Patrick Devine Wright Exeter University Including ten new chapters on nature globalization development and risk and a new section on practicing geography this is a completely revised and updated edition of the best selling standard student resource *Key Concepts in Geography* explains the key terms space time place scale landscape that define the language of geography It is unique in the reference literature as it provides in one volume concepts from both human geography and physical geography Four introductory chapters on different intellectual traditions in geography situate and introduce the entries on the key concepts Each entry then comprises a short definition a summary of the principal arguments a substantive 5 000 word discussion the use of real life examples and annotated notes for further reading Written in an accessible way by established figures in the discipline the definitions provide thorough explanations of all the core concepts that undergraduates of geography must understand to complete their degree The Palgrave Handbook of Critical Physical Geography Rebecca Lave,Christine Biermann,Stuart N. Lane,2018-04-04 This handbook is recognition of the need to better integrate physical and human geography It combines a collection of work and research within the new field of Critical Physical Geography which gives critical attention to relations of social power with deep knowledge of a particular field of biophysical science Critical Physical Geography research accords careful attention to biophysical landscapes and the power relations that have increasingly come to shape them and to the politics of environmental science and the role of biophysical inquiry in promoting social and environmental justice The Palgrave Handbook of Critical Physical Geography lays out the scope and guiding principles of Critical Physical Geography research It presents a carefully selected set of empirical work demonstrating the range and intellectual strength of existing integrative work in geography research This handbook is the first of its kind to cover this emerging discipline and will be of significant interest to students and academics across the fields of geography the environment and sustainability **International Encyclopedia of Human Geography** ,2019-11-29 International Encyclopedia of Human Geography Second Edition Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender race nationality location and other factors in other words the things that make people and places different Questions of for example politics economics race relations and migration are introduced and discussed through a geographical lens This updated edition will assist readers in

their research by providing factual information historical perspectives theoretical approaches reviews of literature and provocative topical discussions that will stimulate creative thinking Presents the most up to date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with understand and contribute to problem solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context *Environmentalism* David Pepper, Frank Webster, George Revill, 2003

Critical Political Ecology Timothy Forsyth, 2004-11-23 Critical Political Ecology brings political debate to the science of ecology As political controversies multiply over the science underlying environmental debates there is an increasing need to understand the relationship between environmental science and politics In this timely and wide ranging volume Tim Forsyth uses an innovative approach to apply political analysis to ecology and demonstrates how more politicised approaches to science can be used in environmental decision making Critical Political Ecology examines how social and political factors frame environmental science and how science in turn shapes politics how new thinking in philosophy and sociology of science can provide fresh insights into the biophysical causes and impacts of environmental problems how policy and decision makers can acknowledge the political influences on science and achieve more effective public participation and governance

The Routledge Handbook of Indigenous Environmental Knowledge Thomas F. Thornton, Shonil A. Bhagwat, 2020-11-29 This volume provides an overview of key themes in Indigenous Environmental Knowledge IEK and anchors them with brief but well grounded empirical case studies of relevance for each of these themes drawn from bioculturally diverse areas around the world It provides an incisive cutting edge overview of the conceptual and philosophical issues while providing constructive examples of how IEK studies have been implemented to beneficial effect in ecological restoration stewardship and governance schemes Collectively the chapters in the Routledge Handbook of Indigenous Environmental Knowledge cover Indigenous Knowledge not only in a wide range of cultures and livelihood contexts but also in a wide range of environments including drylands savannah grassland tropical forests mountain landscapes temperate and boreal forests Pacific and Indian Ocean islands and coastal environments The chapters discuss the complexities and nuances of Indigenous cosmologies and ethno metaphysics and the treatment and incorporation of IEK in local national and international environmental policies Taken together the chapters in this volume make a strong case for the potential of Indigenous Knowledge in addressing today's local and global environmental challenges especially when approached from a perspective of appreciative inquiry using cross cultural methods and ethical collaborative approaches which limit bias and inappropriate extraction of IEK The book is a guide for graduate and advanced undergraduate teaching and a key reference for academics in development studies environmental studies geography anthropology and beyond as well as anyone with an interest in Indigenous Environmental Knowledge *Doing Political Ecology* Gregory L. Simon, Kelly Kay, 2024-10-02 Since its inception the field of political ecology has served as a critical hub for inclusive and transformative environmental inquiry Doing Political Ecology offers a

distinctive entry point into this ever growing field and argues that our scholarly foundations today more than ever comprise a cross cutting latticework of research approaches and concepts This volume brings together 28 leading scholars from a range of backgrounds and geographies with contributions organized into 18 analytical lenses that highlight different approaches to critical environmental research and ways of seeing nature society interactions The book s contributors engage the breadth and depth of the field recognizing a variety of roots and genealogies and give ample voice to these rich and complementary lineages This inclusive presentation of the field allows diverse theoretical and empirical approaches to intermingle in novel ways Readers will emerge with a wide ranging understanding of political ecology and will attain a diverse toolkit for evaluating human environment interactions Each chapter astutely grounds key methodological theoretical topical and conceptual approaches that animate a range of influential cutting edge and complementary ways of doing political ecology

Global Ecologies and the Environmental Humanities Elizabeth DeLoughrey,Jill Didur,Anthony Carrigan,2015-04-10

This book examines current trends in scholarly thinking about the new field of the Environmental Humanities focusing in particular on how the history of globalization and imperialism represents a special challenge to the representation of environmental issues Essays in this path breaking collection examine the role that narrative visual and aesthetic forms can play in drawing attention to and shaping our ideas about long term and catastrophic environmental challenges such as climate change militarism deforestation the pollution and management of the global commons petrocapitalism and the commodification of nature The volume presents a postcolonial approach to the environmental humanities especially in conjunction with current thinking in areas such as political ecology and environmental justice Spanning regions such as Africa Asia Eastern Europe Latin America and the Caribbean Australasia and the Pacific as well as North America the volume includes essays by founding figures in the field as well as new scholars providing vital new interdisciplinary perspectives on the politics of the earth disaster vulnerability and resilience political ecologies and environmental justice world ecologies and the Anthropocene In engaging critical ecologies the volume poses a postcolonial environmental humanities for the twenty first century At the heart of this is a conviction that a thoroughly global postcolonial and comparative approach is essential to defining the emergent field of the environmental humanities and that this field has much to offer in understanding critical issues surrounding the creation of alternative ecological futures

Curriculum and Environmental Education Alan

Reid,2019-11-14 This collection traces the development and findings of curriculum studies of environmental education since the mid 1970s Based on a virtual special issue of the Journal of Curriculum Studies the volume identifies a series of curriculum challenges for and from environmental education These include key questions in curriculum politics planning and implementation including which educative experiences should a curriculum foster and why what the scope of a worthwhile curriculum should be and how it should be decided organised and reworked why distinctive curricula are provided to different groups of students and how curriculum should best be enacted and evaluated The editor and contributors call for

renewed attention to the possibilities for future directions in research in light of previously published work and innovations in scholarship They also offer critical commentary on curriculum critique and crisis in environmental education through new material and previous studies from the journal by addressing three key themes perspectives on curriculum and environment education accounting for curriculum in environmental education and changes in curriculum for environmental education

Political Ecology Karl S. Zimmerer, Thomas J. Bassett, 2012-06-15 This volume offers a unique integrative perspective on the political and ecological processes shaping landscapes and resource use across the global North and South Twelve carefully selected case studies demonstrate how contemporary geographical theories and methods can contribute to understanding key environment and development issues and working toward effective policies Topics addressed include water and biodiversity resources urban and national resource planning scientific concepts of resource management and ideas of nature and conservation in the context of globalization Giving particular attention to evolving conceptions of nature society interaction and geographical scale an introduction and conclusion by the editors provide a clear analytical focus for the volume and summarize important developments and debates in the field

Land Cover Change and Its Eco-environmental Responses in Nepal Ainong Li, Wei Deng, Wei Zhao, 2017-08-22 This book offers a systematic investigation of the ecological and environmental issues related to the land cover changes in Nepal by researchers from both China and Nepal It discusses the eco environmental issues faced by Nepal particularly in the hills and mountain regions It also sheds light on the global concerns regarding the eco environment issues of mountains and analyzes the various causes and potential consequences of eco environmental degradation in Nepal The book is of particular interest to students researchers experts and decision makers wanting to gain a general overview of land cover in Nepal and its dynamics environment and natural resources as well as mountain hazards

River Restoration Bertrand Morandi, Marylise Cottet, Hervé Piégay, 2021-09-27 River Restoration River restoration initiatives are now widespread across the world The research efforts undertaken to support them are increasingly interdisciplinary focusing on ecological chemical physical as well as societal issues River Restoration Political Social and Economic Perspectives provides a comprehensive overview of research in the field of river restoration in humanities and the social sciences It illustrates how in the last thirty years or so such approaches have evolved and strengthened within the restoration sciences The scientific community working in this domain has structured itself often regionally and circumstantially to critically assess and improve restoration policies and practices As a research field river restoration tackles three thematic axes Human river interactions especially perceptions and practices of rivers and how these interactions can be changed by restoration projects Political processes with a particular interest in governance and decision making and a specific emphasis on the question of public participation in restoration projects Evaluation of the social and economic benefits of river restoration River Restoration Political Social and Economic Perspectives encompasses these three topics and more to provide the reader with the most up to date and holistic view of this constantly evolving area The book

will be of particular interest to human and social scientists biophysical scientists hydrologists geomorphologists ecologists environmental scientists public policy makers design or planning officers and anyone working in the field of river restoration

Resources in Education ,1995-10 Sustaining Prosperity, Nature and Wellbeing Peter L.P. Bartelmus,2018-05-15 This book explores what is needed for an overall evaluation of the prosperity and wellbeing of people within a framework of sustaining the economy environment and development The book begins by assessing the validity of available data indicators and indices in decision and policy making It describes what the data tell us about the effects of economic activity on the quality of life and prosperity of people and nations now and in the future and highlights how a reliance on partial and distorted information can thwart rational policies It also examines whether less tangible notions of wellbeing and happiness lend themselves to quantification and prediction Overall Bartelmus demonstrates the need for integrated accounting and analysis to revise policy priorities around environmental social economic and sustainability concerns Confronting the persisting polarization of environmentalists and economists this book will be of great relevance to students scholars and professionals with an interest in environmental and ecological economics sustainability indicators and their use in integrative policy *Reader's Guide to the History of Science* Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn **Real Markets and Environmental Change in Kerala, India** Rene Veron,2018-10-26 First published in 1999 this volume explores the environmental change which is an increasingly serious problem for Third World countries and one that has a major impact on the health and livelihoods of the world s poor In light of economic liberalization and increased agricultural trade it thus becomes crucial to understand the varied impact of markets on environment and development This book provides a new understanding of the relationship between crop markets agricultural practice and sustainable development Both theoretical argument an detailed case studies from the South Indian State of Kerala are used to demonstrate the way in which these factors interrelate and how market induced changes affect human well being and environmental sustainability In conclusion V ron suggests that appropriate regulation of markets and consumer pressure rather than either free trade or withdrawal from markets have the potential to direct agricultural producers to apply more sustainable practices **Systems Approaches and Their Application** Mats-Olov Olsson,Gunnar Sjöstedt,2006-01-16 This book describes the application of systems thinking across a broad field of cases representing research teaching decision support and construction All cases are presented by experts who have actually been involved in the activities they describe The broad selection of cases captures the great variation of systems thinking and how it is integrated into models and theories and solid knowledge pertaining to different substantive areas Ecology Christian Leveque,2003-01-10 This book

provides an understanding of the joint dynamics of physical chemical and biological components of the ecosystem and describes the role of ecology as an operational environmental science in solving environmental problems Handbook of the Historiography of the Earth and Environmental Sciences Elena Aronova, David Sepkoski, Marco Tamborini, 2025-09-30 This open access handbook aims to provide a definitive assessment of the historiography and the future of major themes and approaches within the history of the earth sciences understood broadly The volume is intended for a broad range of readers including graduate students other scholars and scientists both familiar with and new to the history of the earth and environmental sciences Essays in the collection reflect on various problems in the study of the history of the earth sciences emphasizing crosscutting themes such as economics technology politics gender etc and featuring innovative ways of framing historiographic perspectives Since scholarship in the history of science is increasingly becoming entangled with environmental economic and bureaucratic political gender and other historical approaches the volume as a whole emphasizes the breadth and diversity of scholarship on the earth and environmental sciences

Decoding **Environmentalism Critical Concepts In The Environment And Physical Geography**: Revealing the Captivating Potential of Verbal Expression

In an era characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its ability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Environmentalism Critical Concepts In The Environment And Physical Geography**," a mesmerizing literary creation penned with a celebrated wordsmith, readers set about an enlightening odyssey, unraveling the intricate significance of language and its enduring impact on our lives. In this appraisal, we shall explore the book's central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
