**Miracles and Machines** Elizabeth King, W. David Todd, 2023-08-15 An abundantly illustrated narrative that draws from the history of art science technology artificial intelligence psychology religion and conservation in telling the extraordinary story of a Renaissance robot that prays This volume tells the singular story of an uncanny rare object at the cusp of art and science a 450 year old automaton known as the monk The walking gesticulating figure of a friar in the collection of the Smithsonian Institution's National Museum of American History is among the earliest extant ancestors of the self propelled robot According to legend connected to the court of Philip II of Spain the monk represents a portrait of Diego de Alcalá a humble Franciscan lay brother whose holy corpse was said to be agent to the miraculous cure of Spain's crown prince as he lay dying in 1562 In tracking the origins of the monk and its legend the authors visited archives libraries and museums across the United States and Europe probing the paradox of a mechanical object performing an apparently spiritual act They identified seven kindred automata from the same period which they argue form a paradigmatic class of walking prime movers unprecedented in their combination of visual and functional realism While most of the literature on automata focuses on the Enlightenment this enthralling narrative journeys back to the late Renaissance when clockwork machinery was entirely new foretelling the evolution of artificial life to come

**The Look of Van Dyck** John Peacock,2017-07-05 Based on a close study of Van Dyck s Self portrait with a Sunflower this book examines the picture s context in the symbolic discourses of the period and in the artist s oeuvre The portrait is interpreted as a programmatic statement made in the ambience of the Caroline court after Van Dyck s appointment as Principal Painter of his view of the art of painting This statement formulated in appropriately visual terms characterizes painting as a way of looking and seeing a mode of vision In making such a claim the artist steps aside from the familiar debate about whether painting was a manual or an intellectual discipline and moves beyond any idea of it as simply a means of representing the external world the painter s definitive faculty of vision can reach further than those realities which present themselves to the eye John Peacock analyses the motif of looking the ways in which figures regard or disregard each other throughout Van Dyck s work and the images of the sunflower and the gold chain in this particular portrait to reveal what is essentially an idealist conception of pictorial art He contradicts previous opinions that the artist was pedestrian in his thinking by showing him to be familiar with a range of ideas current in contemporary Europe about painting and the role of the painter
