Elusive State International And Comparative Perspectives:

The Elusive State James A. Caporaso,1989 *Law, Power, and the Sovereign State* Michael Ross Fowler,Julie Marie Bunck,2010-11-01 In the wake of the collapse of the Soviet bloc it is timely to ask what continuing role if any the concept of sovereignty can and should play in the emerging new world order The aim of *Law Power and the Sovereign State* is both to counter the argument that the end of the sovereign state is close at hand and to bring scholarship on sovereignty into the post Cold War era The study assesses sovereignty as status and as power and examines the issue of what precisely constitutes a sovereign state In determining how a political entity gains sovereignty the authors introduce the requirements of de facto independence and de jure independence and explore the ambiguities inherent in each They also examine the political process by which the international community formally confers sovereign status Fowler and Bunck trace the continuing tension of the chunk and basket theories of sovereignty through the history of international sovereignty disputes and conclude by considering the usefulness of sovereignty as a concept in the future study and conduct of international affairs They find that despite frequent predictions of its imminent demise the concept of sovereignty is alive and well as the twentieth century draws to a close

Arctic Environmental Cooperation Monica Tennberg,2017-11-01 This title was first published in 2000 The book analyses the development of arctic environmental cooperation since the late 1980s until the establishment of the Arctic Council in 1996 The study is based on the discourse analysis of statement documents and interviews by the different actors in the cooperation In this book the problem of the environment is seen as a problem of order it is a problem of ordering relations among related actors of ordering priorities of action and of ordering relations between different institutional arrangements locally regionally and internally Three discourses were found in the cooperation discourses of sovereignty knowledge and development In the discourse of sovereignty the development of relations between state and indigenous peoples in terms of international environmental cooperation is central In the discourse of knowledge the different forms of knowledge and the role of different producers of knowledge in cooperation has been discussed The discourse of development focuses on the idea of sustainable development and its applications in defining the future of the Circumpolar North and the activities of the Arctic Council The arctic cooperation can be understood as a regional effort to make an order of sustainability into practice

Explaining Social Processes Charles Tilly,2015-12-03 Built upon decades of experience at the frontiers of history and social science Charles Tilly s newest book offers innovative methods and approaches that are applicable in a wide range of disciplines politics sociology anthropology history economics and more The book covers approaches to analysis ranging from interpersonal exchanges to world historical changes economic political and social He shows how a thoroughgoing relational account of social processes coupled with the careful identification of causal mechanisms illuminates variation and change in the ways people live at the small scale and the large

European Integration and Supranational Governance Wayne Sandholtz,Alec Stone Sweet,1998-09-24 The European Union began in

1957 as a treaty among six nations but today constitutes a supranational polity one that creates rules that are binding on its 15 member countries and their citizens This majestic study confronts some of the most enduring questions posed by the remarkable evolution of the EU Why does policy making sometimes migrate from the member states to the European Union And why has integration proceeded more rapidly in some policy domains than in others A distinguished team of scholars lead by Wayne Sandholtz and Alec Stone Sweet offers a fresh theory and clear propositions on the development of the EU Combining broad data and probing case studies the volume finds solid support for these propositions in a variety of policy domains The coherent theoretical approach and extensive empirical analyses together constitute a significant challenge to approaches that see the EU as a straightforward product of member state interests power and bargaining This volume clearly demonstrates that a nascent transnational society and supranational institutions have played decisive roles in constructing the European Union

State Control over Private Military and Security Companies in Armed Conflict Hannah Tonkin, 2011-08-11 The past two decades have witnessed the rapid proliferation of private military and security companies PMSCs in armed conflicts around the world with PMSCs participating in for example offensive combat prisoner interrogation and the provision of advice and training The extensive outsourcing of military and security activities has challenged conventional conceptions of the state as the primary holder of coercive power and raised concerns about the reduction in state control over the use of violence Hannah Tonkin critically analyses the international obligations on three key states the hiring state the home state and the host state of a PMSC and identifies the circumstances in which PMSC misconduct may give rise to state responsibility This analysis will facilitate the assessment of state responsibility in cases of PMSC misconduct and set standards to guide states in developing their domestic laws and policies on private security

Constructing the Stable State Kathleen H. Hawk, 2002-08-30 The United States and the international community intervened in a number of internal conflicts throughout the 1990s generally justifying their actions on humanitarian grounds In most cases the external military intervention largely halted the fighting and allowed humanitarian assistance to be distributed However as Hawk makes clear simply halting the fighting has not allowed these countries to create stable governments and harmonious societies This study is based on the premise that if external actors foreign governments international organizations and private groups can not figure out how to lay a foundation for a stable longer term peace there will be decreasing support for international intervention and peacekeeping peacebuilding missions in the future Although external actors have undertaken many activities in the aftermath of a military intervention in an attempt to consolidate peace sufficient attention has not been paid to re constructing the state as a capable effective and legitimate entity While re constructing the state is only a portion of what needs to be done to bring about a stable long term peace it provides a necessary foundation upon which to structure the other activities Through her examination of external actions in Somalia Bosnia and Kosovo Hawk draws 23 lessons nine of which are applicable to interventions in general and the remaining 14 specific to statebuilding efforts This study will be of

particular interest to scholars students and policymakers involved with conflict resolution and international relations *The Sources Of Russian Foreign Policy After The Cold War* Celeste A Wallander, Anne Wildermuth, 2019-07-11 In this timely and pathbreaking volume scholars in comparative politics and international relations build upon earlier theoretical work on the interaction of domestic and international systems applying it innovatively to the study of post Soviet Russian policy and conduct Individual chapters focus on regime type leadership politics interest group politics nationalism as ideology international conflict and threat and international economic opportunities and constraints The complex interplay between domestic and international factors is highlighted Exploring both the origins and the outcomes of Russian policy and behavior this book provides a telling measure of the direction and significance of political change since 1991 **Defence Industrial**

Cooperation in the European Union Daniel Fiott, 2019-03-28 This book provides an empirical understanding of how EU level defence industrial cooperation functions in practice Using the Liberal Intergovernmental theoretical model the book argues that while national economic preferences are an essential factor of government interests they only explain part of the dynamic that leads to the development of defence industrial policy at EU level Moving beyond a simple adumbration of economic preferences it shows how the EU s institutional framework and corpus of law are used by governments to reaffirm their position as the ultimate arbiter and promoter of national economic preferences in the defence industrial sector To this end the work asks why and how EU member state governments European defence firms and EU institutions developed EU level defence industrial policy between 2003 and 2009 The book also analyses significant policy developments including the establishment of a European Defence Agency and two EU Directives on equipment transfers and defence procurement This book will be of much interest to students of EU policy defence studies security studies and International Relations in general

The Study of World Politics James N. Rosenau, 2006-05-02 James Rosenau s work is known for its originality and clarity and the sixteen articles in this new volume are no exception Tackling the specific challenges posed by globalization and governance this book covers four key areas the challenge tensions contradictions outcomes and global affairs the profession community globalized space and international relations globalization complexities contradictions and theory governance understanding and future The Study of World Politics presents the thinking of one of the most innovative scholars in the last half century The subjects addressed provide the big picture whilst also being meticulous in detail This new book gives the reader an unparalleled understanding of globalization and governance and is an invaluable tool to students and scholars of politics and world affairs alike **Libya since Independence** Dirk Vandewalle, 2018-09-05 Although Libya and its current leader have been the subject of numerous accounts few have considered how the country s tumultuous history its institutional development and its emergence as an oil economy combined to create a state whose rulers ignored the notion of modern statehood International isolation and a legacy of internal turmoil have destroyed or left undocumented much of what researchers might seek to examine Dirk Vandewalle supplies a detailed analysis of Libya s political and economic

development since the country's independence in 1951 basing his account on fieldwork in Libya archival research in Tripoli and personal interviews with some of the country's top policymakers Vandewalle argues that Libya represents an extreme example of what he calls a distributive state an oil exporting country where an attempt at state building coincided with large inflows of capital while political and economic institutions were in their infancy Libya's rulers eventually pursued policies that were politically expedient but proved economically ruinous and disenfranchised local citizens Distributive states according to Vandewalle may appear capable of resisting economic and political challenges but they are ill prepared to implement policies that make the state and its institutions relevant to their citizens Similar developments can be expected whenever local rulers do not have to extract resources from their citizens to fund the building of a modern state

Promoting Women's Rights Chrysttala Ellina,2004-06-01 This dissertation examines the impact of international institutions on women's rights policies by focusing on the European Union EU as a case study in order to illustrate the influence and the ways in which international factors affect women's right as a global policy concern The principle proposition of this study is that beyond states institutions are autonomous agents that influence policy outcomes often against member states preferences *People, States & Fear* Barry Buzan,2008-03-01 This widely acclaimed book examines how states and societies pursue freedom from threat in an environment in which competitive relations are inescapable across the political economic military societal and environmental landscapes Throughout attention is placed on the interplay of threats and vulnerabilities the policy consequences of overemphasising one or the other and the existence of contradictions within and between ideas about security Barry Buzan argues that the concept of security is a versatile penetrating and useful way to approach the study of international relations Security provides an analytical framework between the extremes of power and peace incorporates most of their insights and adds more of its own *People States Fear* is essential reading for all students and researchers of international politics and security studies A new introduction placing this classic text in a current context was added to this book by the author in 2007

Realism Benjamin Frankel,2013-04-03 Realism has been the subject of critical scrutiny for some time and this examination aims to identify and define its strengths and shortcomings making a contribution to the study of international relations **The European Union and National Industrial Policy**

Hussein Kassim,Anand Menon,2002-09-11 Although the implications of EU membership have been the subject of intense political debate and academic enquiry throughout the member states the actual impact of EU action on those states remains under researched The lack of empirical investigation has meant that it has not been possible to arrive at any informed judgement about how the EU has affected traditional policy making in the member states or to evaluate competing claims The *European Union and National Industrial Policy* investigates the extent to which action at the EU level in a range of industrial financial and service sectors has affected the substance of national policy and the behaviour of and relationships between national actors It looks at the policies pursued by the four larger member states in these areas discussing the

initiatives launched by the EU and assessing the Union's impact on national policy compared with other internal and external factors The European Union and National Industrial Policy offers a unique investigation of the relationship between the Union and member states that is empirically based and theoretically reflective In an attempt to overcome the boundaries that have traditionally separated international relations political science public policy and other social sciences it uses insights from a number of perspectives to assess the impact of the EU on the ability of member states to choose and implement their goals

The Political Economy of Managed Migration Georg Menz, 2010-12-16 European governments have rediscovered labour migration but are eager to be perceived as controlling unsolicited forms of migration especially through asylum and family reunion The emerging paradigm of managed migration combines the construction of more permissive channels for desirable and actively recruited labour migrants with ever more restrictive approaches towards asylum seekers Non state actors especially employer organizations trade unions and humanitarian non governmental organisations attempt to shape regulatory measures but their success varies depending on organizational characteristics Labour market interest associations lobbying strategies regarding quantities and skill profile of labour migrants will be influenced by the respective system of political economy they are embedded in Trade unions are generally supportive of well managed labour recruitment strategies But migration policy making also proceeds at the European Union EU level While national actors seek to upload their national model as a blueprint for future EU policy to avoid costly adaptation top down Europeanization is recasting national regulation in important ways notwithstanding highly divergent national regulatory philosophies Based on field work in and analysis of primary documents from six European countries France Italy United Kingdom Ireland Germany and Poland this book makes an important contribution to the study of a rapidly Europeanized policy domain Combining insights from the literature on comparative political economy Europeanization and migration studies the book makes important contributions to all three while demonstrating how migration policy can be fruitfully studied by employing tools from mainstream political science rather than treating it as a distinct subfield

Arming the Two Koreas Taik-Young Hamm, 2012-10-12 North Korea has traditionally been seen as militarily superior to South Korea in the long feud between the two nations This brilliantly argued book taps into a great deal of news interest in North Korea at the moment in the wake of recent hostility against Japan Hamm controversially shows that the received idea of Korea's military strength is partly a myth created by South Korea to justify a huge programme of rearmament

NGOs and Transnational Networks William E. DeMars, 2005-04-20 Non Governmental Organisations and their networks are proliferating in all regions of the world They address every transnational issue from population to peace human rights to species rights genocide to AIDS Supporters claim NGOs are effective in achieving their goals while detractors counter that NGO power is paltry compared to governments and corporations Challenging both views DeMars irreverently reveals the political claims implicit in every transnational NGO They are best conceptualised he argues not in terms of either principles or power but through the partners they make in transnational

society and politics NGOs and transnational networks institutionalise conflict as much as cooperation and reshape states and societies often inadvertently NGOs have overthrown dictators provided life support for collapsed states and reengineered the family Their historical origins contrast sharply with current realities and show signs of radical change in the future

Organizing the World Galia Press-Barnathan,2004-06-01 This book offers a conceptual framework that explains when and why a great power would choose to cooperate with smaller states via regional cooperation forums rather than in a bilateral setting

Introduction to international relations ,2024-07-30 This innovative accessible book highlights contemporary and historical insights into international relations By looking core themes globalization international political economy regionalization the fragmentation of states and cooperative problem solving the authors formulate a likely pattern of future developments in the 21st century
