Peter Goodrich

Emblem For An Era:

The Evangelical Repository and United Presbyterian Review, 1864 **Legal Emblems and the Art of Law** Peter Goodrich, 2014 The emblem book was invented by the humanist lawyer Andrea Alciato in 1531 The preponderance of juridical and normative themes of images of rule and infraction of obedience and error in the emblem books is critical to their purpose and interest This book outlines the history of the emblem tradition as a juridical genre along with the concept of and training in obiter depicta in things seen along the way to judgment It argues that these books depict norms and abuses in classically derived forms that become the visual standards of governance Despite the plethora of vivid figures and virtual symbols that define and transmit law contemporary lawyers are not trained in the critical apprehension of the visible This book is the first to reconstruct the history of the emblem tradition evidencing the extent to which a gallery of images of law already exists and structuring how the public realm is displayed made present and viewed [A Book of Emblems](#) Andrea Alciati, 2015-11-12 Andrea Alciati's *Emblematum Liber* was an essential work for every writer artist and scholar in post medieval Europe First published in 1531 this illustrated book was a collection of emblems each consisting of a motto or proverb a typically enigmatic illustration and a short explanation Most of the emblems had symbolic and moral applications Scholars depended on Alciati's book to interpret contemporary art and literature while writers and artists turned to it to invest their work with an understood didactic sense This new edition of the *Emblematum Liber* includes the original Latin texts highly readable English translations and the illustrations belonging to each of the 212 emblems The editor's introduction explains both the importance and the cultural contexts of Alciati's book as well as its innumerable artistic applications For instance close study of the emblems reveals to cite only two examples why statues of lions are traditionally placed before government buildings and what underlying political message was conveyed by innumerable equestrian portraits during the Baroque era The collection includes as an appendix the formerly suppressed emblem *Adversus Naturam Peccantes* accompanied by a translation of the learned commentary applied to it by Johann Thuius in 1612 An extensive bibliography points the student to scholarly research specifically dealing with artistic applications of Alciati's emblems Altogether this new edition of Alciati's seminal work is an essential tool for modern students of the liberal arts *Visions of Empire in Colonial Spanish American Ekphrastic Writing* Kathryn M Mayers, 2011-12-16 The process of shaping and asserting cultural identity in viceregal Spanish America occurred as much through the medium of pictures as through the medium of writing Focused on writing that references visual texts ekphrasis *Visions of Empire in Colonial Spanish American Ekphrastic Writing* examines the way words about pictures in the writing of three Spanish American Creoles Hernando Domínguez Camargo Juan de Espinosa Medrano and Sor Juana Inés de la Cruz negotiate the challenges that confronted the American born ruling elite in Spanish America during the contentious transitional period between the Conquest and Independence In Spanish America pictures have long served as a crucial medium for cultural communication In vast rural and urban regions where print culture is not deeply

rooted and being cultured is not synonymous with being literate visual texts ranging from pre Hispanic pictographic codices to Baroque architectural surfaces to postmodern painted murals have played an essential role in shaping and asserting cultural identity During the viceregal era texts that referenced such visual texts proliferated in Latin America particularly among Creole elites who found themselves trapped in an ambiguous political and social position between Spain and America At the level of content Creole ekphrases bear little obvious connection to categories of social privilege On the level of form however these ekphrases engage conventions of representation that reveal the social contingencies of the poetic gaze They refract the visual object through an ideologically charged language that invokes differentials of race class gender sexuality nationality and position within the colonial power structure Visions of Empire brings recent scholarship on visuality and ekphrasis to bear on twenty first century reexaminations of criollismo to explore how cultural productions of the Spanish American Creole elite exercised relations of power mediated social differences and presented symbolic organizations of social space Focusing on the way Creole adaptations of Gongoran ekphrases placed the Creoles in a position of epistemological economic or moral authority over peninsular Spaniards and Amerindian and casta majorities around them this book illustrates how Creole words about pictures propose alternate visions of empire symbolically reordering Spain's empire in the Americas around the figure of the Creole

The International Emblem Simon McKeown, 2010-02-19 The emblem a Renaissance literary genre which combined text and image conveyed erudition admonishment propaganda and piety with unparalleled concision and economy It arose out of humanist circles in the early sixteenth century and quickly became established as a staple tool in religious political and social discourses across the major European languages In recent years the emblem has come to be regarded by scholars working in all areas of the humanities and cultural studies as an interdisciplinary matrix of extraordinary utility in gaining insights into the mentalities and preoccupations of the early modern era Within its apparently slender frame the emblem embraces questions of foremost philological semiotic and iconographical importance and encompasses ideas and assumptions of exceedingly far range and reach This collection of essays attests to the pervasiveness of the emblem both within Renaissance and Baroque Europe and in those parts of the wider world where European influence came to bear It seeks to follow the

development of the emblem from its beginnings in various forms of bimedral artefact from early illustrated books and hieroglyphs to medals and ancient coins we then witness its deployment as a propagandistic tool in the temporal and confessional disputes of Europe Thereafter the emblem appears in non European contexts emerging as a place of cultural exchange as it became assimilated within indigenous visual traditions The latter parts of the book concentrate on the often subliminal role emblems played in diverse literary texts as well as their ongoing vitality in praxis or in the burgeoning area of emblem scholarship within early modern studies

Granting the Seasons Nathan Sivin, 2008-12-19 China's most sophisticated system of computational astronomy was created for a Mongol emperor who could neither read nor write Chinese to celebrate victory over China after forty years of devastating war This book explains how and why and reconstructs the observatory and the science that made it possible For two thousand years a fundamental ritual of government was the emperor's granting the seasons to his people at the New Year by issuing an almanac containing an accurate lunisolar calendar The high point of this tradition was the Season granting system Shou shih li 1280 Its treatise records detailed instructions for computing eclipses of the sun and moon and motions of the planets based on a rich archive of observations some ancient and some new Sivin the West's leading scholar of the Chinese sciences not only recreates the project's cultural political bureaucratic and personal dimensions but translates the extensive treatise and explains every procedure in minimally technical language The book contains many tables illustrations and aids to reference It is clearly written for anyone who wants to understand the fundamental role of science in Chinese history There is no comparable study of state science in any other early civilization
