**Embryogenesis, from Cosmos to Creature** Richard Grossinger, 1986      **Ecofeminism** Greta Gaard, 1993-01-14

Drawing on the insights of ecology feminism and socialism ecofeminism's basic premise is that the ideology that authorizes oppression based on race class gender sexuality physical abilities and species is the same ideology that sanctions the oppression of nature In this collection of essays feminist scholars and activists discuss the relationships among human beings the natural environment and nonhuman animals They reject the nature culture dualism of patriarchal thought and locate animals and humans within nature The goal of these twelve articles is to contribute to the evolving dialogue among feminists ecofeminists animal liberationists deep ecologists and social ecologists in an effort to create a sustainable lifestyle for all inhabitants of the earth Among the issues addressed are the conflicts between Green politics and ecofeminism various applications of ecofeminist theory the relationship of animal liberation to ecofeminism harmful implications of the romanticized woman nature association in Western culture and cultural limitations of ecofeminism In the series *Ethics and Action* edited by Tom Regan      *Sacred Ground to Sacred Space* Rowena Pattee Kryder, 1994-10 In her magnificent *Sacred Ground to Sacred Space* visionary artist Rowena Pattee Kryder weaves together the scientific and spiritual traditions to reveal how the sacred is inherent in nature and how we can get in touch with the qualities of subtle energy and light that are the power and codes for manifesting harmonious culture      **Metamorphosis through Conscious Living** Ingo B.

Jahrsetz, Lindy McMullin, 2017-08-21 *Metamorphosis* the theme of this book derives from the Ancient Greek language and refers to a transformative process that often includes disintegration and reintegration on the route to conscious living with self community and the world This collection proposes that engagement with the sacred is what makes research and practice transpersonal the sacred other that lives both within and beyond us as individuals and unique cultures The transpersonal approach is distinctive in that it regards the potential metamorphosis of all those involved in research and professional practice a core value This volume engages the audience in professional practical as well as inquiry related topics that reflect the diverse nature of the transpersonal studies field and extend an experience of metamorphosis to the reader The book moves scholarship forward in an innovative and creative way with relevant themes that not only honour the sacred but lend a transpersonal paradigm to scientific and professional methods and models      [The Night Sky, Updated and Expanded Edition](#)

Richard Grossinger, 2014-09-30 Ever since *Homo sapiens* first looked up at the stars we as a species have been looking for meaning in the mysteries of the night sky Over the millennia as our knowledge science and technology developed the stories we told ourselves about the universe and our place in it developed as well In *The Night Sky* Richard Grossinger traces those developments covering multiple aspects of humanity's complex relationship to the cosmos Covering not only astronomy but also cosmology cosmogony astrology and science fiction he offers us a revelatory look at the firmament through his own telescope fitted with an anthropological lens Throughout his explorations Grossinger continually reflects on the deeper

meaning of our changing concepts about the universe and creation offering insight into how each new discovery causes us to redefine the values moralities and aesthetics by which we live He also calls into question the self aggrandizing notion that humanity can and will conquer all and injects our strident confidence in science with a healthy dose of humility and wonder Filled with poetic observation and profound questions *The Night Sky* is a brilliant reflection of humanity's relationship with the cosmos a relationship fed by longing doubt and awe      **Parenting Begins Before Conception** Carista

Luminare-Rosen,2000-05 Prospective parents learn how they can lay the foundations for a healthy happy family life even before their children are conceived This guide shows parents how they can optimize children's physical emotional and spiritual health Illustrations      *Bone, Breath, and Gesture* Don Hanlon Johnson,1995-07-19 This book is a collection of

writings on principles and techniques by the pioneers of bodywork and body awareness disciplines Together they represent a historical record of the field of somatics Ranging from hands on workers like Ida Rolf to phenomenologist Elizabeth Behnke their lives span this century In these lectures writings and interviews editor Don Hanlon Johnson has sought to reveal the unbroken lineage theoretical differences and major similarities of these originators      *Living with the Earth : an*

*Introduction to Environmental Philosophy* Kent Alan Peacock,1996 *Living with the Earth* offers a unique approach to environmental philosophy featuring a number of significant Canadian authors and issues and a coherent interdisciplinary viewpoint linking scientific economic ethical and historical aspects of the environmental problem Core chapters examine environmental ethics the basics of ecology emphasizing symbiosis and ecosystem wholeness environmental vs economic priorities and environmental crises both current and historical      **Parapsychology Abstracts International** ,1988

**Dark Pool of Light 3 Volume Set** Richard Grossinger,2012-12-18 In books like *Embyogenesis* and *Embryos Galaxies and Sentient Beings* author Richard Grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied The embryo is the universe writing itself on its own body In *Dark Pool of Light* his latest creation Grossinger weaves neuroscience based behaviorism and the phenomenology of being and reality together with psychological and psychospiritual views of that single thing which is most difficult to understand or vindicate our own existence In 2008 Grossinger began studying with noted psychic teacher John Friedlander who helped him refine his vision of cerebral and somatic awareness to still subtler levels *Dark Pool of Light* began unnamed in the journals of my psychic work with John Friedlander says Grossinger not so much a record of actual practices as insights from them and extensions out of them An expansive inquiry into the nature of consciousness the series examines the tension between the scientific and philosophical and psychic views of the same phenomena and includes field notes and experiential exercises that invite the reader to make their own explorations *Dark Pool of Light* is divided into three volumes in Volume 1 Grossinger begins with the scientific and philosophical analytical views of reality exploring the science parascience philosophy and psychology of consciousness Covering topics as diverse as current discoveries in neuroscience and the philosophy of the

ancient Greeks the book gives a broad overview of the bodies of knowledge concerning the nature of reality and consciousness Volume Two discusses the similarities and differences between European esoteric traditions and Buddhism in their approaches to the subjects and gives a detailed description of the psychic training Grossinger undertook that informs much of his worldview This expansive inquiry into the nature of consciousness ends with this third volume in the series The Crisis and Future of Consciousness Grossinger addresses the perennial question of evil and shares the author's hopes and fears for the future of humanity While wisdom gleaned from such seemingly disparate sources as science philosophy religion and spirituality might appear very very different things Grossinger nevertheless finds their meeting place in subjective lived experience

**Character and Personality Types** Nick Totton, Michael Jacobs, 2001 It is very difficult for the student or practitioner to find their way through the jungle of different personality typographies that has sprung up in the field of psychotherapy and even harder for them to find a point of sufficient height above the forest canopy to get their bearings in order to compare one system with another This volume offers such an observation point together with some possible mappings It surveys how different schools of therapy approach a basic topic the differences that exist between people including their attitudes feelings concerns and talents It examines different systematic and non systematic approaches to identifying different types of human being exploring whether there are systematic ways in which humans vary how we can assess the merit of different typologies and whether personality typing is a helpful approach to therapy Character and Personality Types looks in detail at the arguments for and against the use of typologies of character and personality as a clinical tool and offers general criteria for judging the merits of particular personality systems as well as exploring the possibility of a wider synthesis

**Cognizers** R. Colin Johnson, Chappell Brown, 1988-10-18 One of the most dramatic developments in computer science has been the effort to create machines that duplicate the neurotransmitter biology of the human brain Describing for the general reader how human neural networks work the authors explain how this cutting edge technology could be the breakthrough that makes artificial intelligence a reality The approach combines history and hard science with exhaustive research all presented in an engaging lively writing style
