Embryonic Mortality In Farm Animals

David Baud

Embryonic Mortality In Farm Animals:

Embryonic Mortality in Farm Animals J.M. Sreenan, M.G. Diskin, 2012-12-06 Reproductive wastage is a major inefficiency in all livestock production with embryonic mortality accounting for a major portion of this loss Accordingly the Commission of the European Communities encouraged the organisation of a seminar on embryonic mortality in farm animals which was held in Brussels on the 11th and 12th of December 1984 This book contains the text of the papers discussions and final summary presented at that Seminar As a background to the Seminar the extent and timing of embryonic loss was described for farm animals Particular consideration was then given to the various mechanisms and signals both embryonic and uterine in origin that are so far known to be involved in the establishment of pregnancy Possible causes of embryonic death including physiological endocrinological genetic and immunological components were outlined and discussed The final summary contains general conclusions from the Seminar and recommendations for future research work on this topic J M Sreenan M G Diskin July 1985 THE EXTENT AND TIMING OF EMBRYONIC MORTALITY IN THE COW J M Sreenan M G Diskin The Agricultural Institute Belclare Tuam Galway Ireland ABSTRACT The extent and timing of embryonic mortality in heifers normal cows and repeat breeder cows has been reviewed

Reproductive Technologies in Farm Animals Ian Gordon, 2004 In the past half century great progress has been made in the reproductive management of farm animals both mammals and birds This book aims to review developments and indicate which reproductive technologies can be used commercially or in research It begins by discussing artificial insemination and how this has recently been refined in semen sexing technology Embryo transfer in vitro embryo production technology and the control of oestrus and ovulation are then reviewed Subsequent chapters consider the control of postpartum ovarian activity seasonal breeding multiple births and litter size pregnancy testing parturition and the onset of puberty The author then describes more recent developments in cloning and the production of transgenic animals before a final chapter on suppressing reproductive activity

Embryonic Mortality in Farm Animals J. M. Sreenan, M. G. Diskin, 1986

Reproduction in Farm Animals E. S. E. Hafez, B. Hafez, 2013-05-13 When you're looking for a comprehensive and reliable text on large animal reproduction look no further the seventh edition of this classic text is geared for the undergraduate student in Agricultural Sciences and Veterinary Medicine In response to reader feedback Dr Hafez has streamlined and edited the entire text to remove all repetitious and nonessential material That means you'll learn more in fewer pages Plus the seventh editing is filled with features that help you grasp the concepts of reproduction in farm animals so you'll perform better on exams and in practice condensed and simplified tables so they're easier to consult an easy to scan glossary at the end of the book an expanded appendix which includes graphic illustrations of assisted reproduction technology Plus you'll find valuable NEW COVERAGE on all these topics Equine Reproduction expanded information reflecting today's knowledge Llamas NEW CHAPTER Micromanipulation of Gametes and In Vitro Fertilization NEW CHAPTER Reach for the text that's revised with the undergraduate in mind the

seventh edition of Hafez's *Reproduction in Farm Animals* **Reproductive Technologies in Farm Animals, 2nd Edition**
 Ian Gordon, 2017-06-23 Building on the successful structure of the first edition the second edition of *Reproductive Technologies in Farm Animals* has been totally updated and revised to provide an up to date account of the key techniques employed in manipulating reproduction in farm animals including beef and dairy cattle pigs sheep goats buffaloes camelids horses and poultry A classic introductory text to the subject the book is based on a comprehensive review of the current literature This text remains key reading for students in animal science agriculture veterinary medicine and biology and veterinary practitioners and farmers who wish to keep updated on developments in techniques that may be useful in their daily practice **Embryonic Mortality in Farm Animals** J. M. Sreenan, M. G. Diskin, 1985 *Laboratory Production of Cattle Embryos* Ian Gordon, 2003-01-01 3000 new references added since the first edition Gives information necessary to produce embryos totally through in vitro techniques Shows commercial applications of embryo and oocyte research Cattle remain at the forefront of many new developments in reproductive technology and what can be done for the cow today will later be applicable to other farm livestock and perhaps humans This new edition reviews the considerable advances and issues in embryo production technology based on reports since the first edition in 1994 This is a must have volume for those who own the first edition and in itself an incredibly informative text *Library of Congress Subject Headings* Library of Congress, 1989 **Library of Congress Subject Headings: F-O** Library of Congress.  Fuller W. Bazer, G. Cliff Lamb, Guoyao Wu, 2019-10-25 *Animal Agriculture Sustainability Challenges and Innovations* discusses the land based production of high quality protein by livestock and poultry and how it plays an important role in improving human nutrition growth and health With exponential growth of the global population and marked rises in meat consumption per capita demands for animal source protein are expected to increase 72% between 2013 and 2050 This raises concerns about the sustainability and environmental impacts of animal agriculture An attractive solution to meeting increasing needs for animal products and mitigating undesirable effects of agricultural practices is to enhance the efficiency of animal growth reproduction and lactation Currently there is no resource that offers specific knowledge of both animal science and technology including biotechnology for the sustainability of animal agriculture for the expanding global demand of food in the face of diminishing resources This book fills that gap giving readers all the necessary information on important issues facing modern animal agriculture namely its sustainability challenges and innovative solutions Integrates new knowledge in animal breeding biotechnology nutrition reproduction and management Addresses the urgent issue of sustainability in modern

animal agriculture Provides practical solutions on how to solve the current and future problems that face animal agriculture worldwide
