U.S. Policy Toward China Robert G. Sutter, 1998 Increased fluidity and pluralism in U S policy toward China in the postDCold War period have led to growing non governmental influence as both the administration and Congress have become the target of intense lobbying by organized groups concerned with human rights trade opportunities relations with Taiwan and other hotly debated issues This balanced study examines the central role of these organizations focusing especially on two key cases of policy reversal President Clinton s 1994 decision to delink human rights concerns from trade access and his 1995 decision to allow Taiwan s president to visit the United States albeit in a private capacity The recent movement toward a more consistent and coherent administration policy on China remains tentative and has been under mounting attack especially in the wake of Asian campaign contributions Although recognizing that U S policymakers must consider a wider range of interests than was the case during the Cold War Sutter argues that following the prevailing consensus among organized interests may lead to bad policy Instead he contends that U S foreign policy must strike a balance between satisfying domestic concerns while buttressing interests abroad

Chinese Student Migration and Selective Citizenship Lisong Liu, 2015-08-20 Since China began its open door and reform policies in 1978 more than three million Chinese students have migrated to study abroad and the United States has been their top destination The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigration out of China have aroused wide public and scholarly attention in both China and the US This book examines the four waves of Chinese student migration to the US since the late 1970s showing how they were shaped by the profound changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the selective nature on both ends of the negotiations between nation states and migrants It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community Bridging the gap between Asian and Asian American studies the book also integrates the studies of migration education and international relations Therefore it will be of interest to students of these fields as well as Chinese history and Asian American history more generally
