The Reshaping of West European Party Politics Christoffer Green-Pedersen, 2019-07-31 Long gone are the times when class based political parties with extensive membership dominated politics Instead party politics has become issue based Surprisingly few studies have focused on how the issue content of West European party politics has developed over the past decades Empirically Reshaping of West European Party Politics studies party politics in Belgium Denmark France Germany the Netherlands Sweden and the UK from 1980 and onwards This book highlights the more complex party system agenda with the decline but not disappearance of macroeconomic issues as well as the rise in new politics issues together with education and health care Moreover various new politics issues such as immigration the environment and European integration have seen very different trajectories To explain the development of the individual issues this volume develops a new theoretical model labelled the issue incentive model of party system attention The aim of the model is to explain how much attention issues get throughout the party system which is labelled the party system agenda To explain the development of the party system agenda one needs to focus on the incentives that individual policy issues offer to large mainstream parties i.e. the typical Social Democratic Christian Democratic or Conservative Liberal parties that have dominated West European governments for decades The core idea of the model is that the incentives that individual policy issues offer to these vote and office seeking parties depend on three factors namely issue characteristics issue ownership and coalition considerations The issue incentive model builds on and

develops a top down perspective on which the issue content of party politics is determined by the strategic considerations of political parties and their competition with each other Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Emilie van Haute Professor of Political Science Universit libre de Bruxelles Ferdinand M ller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow John and Rebecca Moores Professor of Political Science University of Houston

Constraints on Party Politics Thomas M. Meyer, 2013-04-30 Political scientists are quite good at predicting optimal policy positions that under the given circumstances allow parties to get maximal payoffs in terms of policy office or votes What we do not know is whether parties are actually able to take these positions or whether they are constrained to do so This book attempts to narrow this gap The major argument is that parties do not choose policy positions from scratch and that they cannot freely change their policy platforms Rather voters lacking perception of changing party platforms and intra party factors constrain parties when shifting their policy positions An empirical analysis of party policy shifts in ten Western European democracies shows that these constraints differ across parties and thus affect the parties position taking differently Considering this variation is important to derive more precise predictions for parties policy platforms and for our understanding of party behaviour in general This book attempts to narrow this gap The major argument is that parties do not choose policy positions from scratch and that they cannot freely change their policy platforms Rather voters lacking perception of changing party platforms and intra party factors constrain parties when shifting their policy positions An empirical analysis of party policy shifts in ten Western European democracies shows that these constraints differ across parties and thus affect the parties position taking differently Considering this variation is important to derive more precise predictions for parties policy platforms and for our understanding of party behaviour in general
